THE WAGE EARNERS.

What Wages They Receive in Several Countries, Gold and Silver.

The following table, taken from volume XLIX, United States consul reports, shows the wages per week paid, also whether of gold or silver value, in a number of countries. Workmen will be interested in making comparisons:

Table with columns for Country, Wages per week, and Unit. Includes entries for Australia, Canada, France, Germany, etc.

There is one thing to be borne in mind in studying the figures. That is, that the silver dollar has in this country the purchasing power of a gold dollar.

Results Tell the Facts.

The New York World says it is not admitted that the Wilson tariff bill is a failure. Well, the evidence is so apparent that it is not necessary to admit.

The Price of Wool.

The champions of free coinage of silver tell the farmers that it will give them better prices for their products. Now will they explain how free silver is going to increase the price of wool?

The Parity in Candidates.

After all, it may be as well to let Sewall and Watson both run. It would take two such men to make one average vice president.—Kansas City Journal (Rep.).

WELL! WELL!

That Meeting of the McKinley Club Last Night

Was Simply a Killer for the Deluded Brethren of the Opposition.

The Court Room Packed by Enthusiastic Republicans who Listen Attentively to Several Ringing Speeches by Local Orators.

Monday night's assemblage of Republicans at the meeting of the McKinley and Hobart Club was representative of the best element of citizenship in the city and larger than on any previous occasion.

In the absence of President Grafton the Club was called to order by Hon. C. S. Dana at 7:30 and the meeting opened with a song by the newly organized glee club.

Dr. John W. Simpson, who had been prevailed upon but a few hours previously to deliver an address, was introduced by the presiding officer and responded with a ringing Republican sound money speech that was enthusiastically received and frequently interrupted by generous applause.

He discussed the tariff and the financial issues in a clear and forcible manner and did not hesitate to characterize the tariff question as the most important now before the people of the United States.

After another song by the Glee Club the Club entered upon the regular business of the meeting. The Committee on headquarters reported that they had been unable as yet to secure suitable quarters and the committee was continued to the next meeting.

Prof. J. H. Chamberlain, R. C. Dawes and Prof. W. W. Boyd responded to repeated calls and delivered brief and forcible addresses.

The Committee on Uniforms reported having selected a uniform consisting of white duck trousers, colored leggings, blue cape and "gold" hat. Samples and prices were displayed and upon motion those submitted by the Diamond Pants Company, at \$1.75 per man for the complete outfit, were adopted.

Mr. C. R. Stevens was elected to the position of Drill Commander and D. W. Pickering was appointed a Committee to take orders for uniforms, after which the meeting adjourned.

Oil Fire at Sistersville.

SISTERSVILLE, W. VA., Aug. 17th.—At an early hour Sunday morning the citizens of this city were startled by a terrific explosion, which shattered a large number of window panes on this side of the river.

The scene of the explosion was at the Fisher Oil Co.'s No. 8, on the Tull farm, just across the Ohio. The boiler let go with terrific force, setting fire to the derrick and a tank containing 250 barrels of oil. The flames leaped high into the air and illuminated the whole country for a distance of five miles. No one injured. Loss about \$3,000. Cause cannot be ascertained.

Found on a Shanty Boat.

A telegram from Cincinnati Saturday says: Lillie Taylor, who left Belpre, O., Aug. 1, was found by the Covington police Saturday in a shanty-boat at the mouth of the Licking. She claimed she left home on account of ill treatment.

SIXTEEN TO ONE.

A Lucid Explanation of This Common Phrase.

THE FIRST CAMPAIGN DOCUMENT.

Fallacies of Free Silver Arguments Exposed—Should the Hopes of the Silverites Prevail All Gold Would Leave the Country and the Currency Would Be Greatly Depreciated—A Disastrous Panic Would Ensnare.

"Leaflet No. 1," entitled "Sixteen to One: What It Means," has been issued by the Republican national committee. It has the following extract from the Democratic platform adopted at Chicago at the head of the first page:

"Chicago platform of 1896: The free and unlimited coinage of both gold and silver at the present legal ratio of 16 to 1. The standard silver dollars shall be a full legal tender equally with gold for all debts, public and private."

Then following this comes the explanation: "Sixteen to one—what it means. A silver dollar weighs sixteen times as much as a gold dollar. This is what is meant by the coinage of silver at the ratio of 16 to 1.

"Free coinage of silver: When brought to the mint silver shall be coined into dollars at the expense of the United States government without cost to the owner. By the unlimited coinage of silver is meant that all the silver, American or foreign, brought to any of our mints, shall be so coined at the owner's demand. This is what is meant by the free and unlimited coinage of silver.

"When the ratio of 16 to 1 was established by the government, sixteen ounces of silver bullion was worth in the market just as much as one ounce of gold bullion. A silver dollar and a gold dollar were then worth precisely the same, before they were coined, when they were coined, or after they were melted; the face value of a silver dollar was its actual value. But of late years pure silver has declined in value, so that now the commercial ratio, instead of being 16 to 1, is about 31 to 1. That is to say, an ounce of gold bullion is exchangeable for thirty-one ounces of silver bullion, instead of being exchangeable for only sixteen ounces of silver bullion, as it formerly was. Silver bullion is thus worth in gold only about half as much as it was, when the coinage ratio was made 16 to 1.

"A silver dollar with the stamp of the government upon it passes for more than it is worth, just as a paper dollar passes for more than the paper upon which it is printed is worth. The credit of the government is behind the paper dollar, and the credit of the government is behind the silver dollar. But the credit of the government is not behind the uncoined silver, in the form of bullion, therefore the bullion is exchangeable for other commodities only to the amount of its actual or intrinsic value.

"Free and unlimited coinage of silver at the ratio of 16 to 1 means, therefore, that the government of the United States, instead of pledging its credit for the limited amount of silver, now worth only 31 to 1, at a parity with gold, would have to do so for an unlimited amount at a ratio of 16 to 1. By this the United States would undertake to double the value of every ounce of silver, coined or uncoined, in the world, and extend an invitation to all the nations to send their surplus silver here to be coined into silver dollars at the ratio of 16 to 1.

"These silver dollars, if coined in an unlimited quantity, would not be worth as much as gold dollars, because it is the credit of the government which makes those we now have equal in purchasing power to a gold dollar, and the credit of the government is not without limit. 'Unlimited' coinage of silver would exhaust its credit by exhausting its power to redeem its pledges to maintain silver at a parity with gold at a ratio of 16 to 1. The consequence would be that the silver dollar would soon decline in purchasing power to the commercial value of the bullion it contains, and would be worth little, if any more, than half a dollar in gold.

"As all private and public debts not explicitly payable in gold would then be payable in these half-rate dollars, our gold would disappear from circulation and would quickly be drawn out of the country in paying our obligations and purchases from gold-using countries where our silver coins would not be accepted. As a consequence we should in a few months lose all of our \$12,000,000 of gold, leaving us with a much contracted and greatly depreciated currency.

"A disastrous panic would ensue, followed by the suspension of thousands of factories and business houses, a general business collapse, and the loss of employment by hundreds of thousands of wage-earners and laborers."

A Good Object Lesson.

The Ohio State Journal uses a good object lesson by offering to all who will send them an American dollar to send the semi-weekly Journal for six months and give a Mexican dollar as change, though the Mexican dollar contains several more grains of silver than does the American dollar.

OFFER TO FARMERS.

Milling Company Will Give a Mexican Dollar for a Bushel of Wheat.

The Buchanan Milling Company of Niles, Mich., announces that it will pay to every farmer who sells wheat in lots of 500 bushels or over, one Mexican dollar per bushel. The manager explains that the company would take small lots of wheat on the same basis were it not for the expense and trouble of shipping in Mexican dollars in small amounts. If wheat holders will club together and sell in lots of 1,000 bushels the company will make the seller a present of two good American dollars for each 1,000 bushels delivered to it. The Mexican dollars contain more silver than the American dollars, and for the farmer to realize \$1 per bushel for his wheat all that is necessary to do, it is claimed, is to store the Mexican dollar until free silver wins, should that event come, and then get them coined by the government. The offer is being taken up by many farmers in Berrien county, Mich.

Wheat Versus Money.

In 1867 the price of wheat ranged from \$1.55 to \$2.85 per bushel, and the per capita circulation of money in the United States was \$18.28.

In 1877 the price of wheat ranged from \$1.01 1/2 to \$1.76 1/2 per bushel and the per capita circulation of money was \$15.58.

In 1887 the price of wheat ranged from 68 1/2 cents to 91 1/2 cents per bushel and the per capita circulation of money was \$23.45.

In 1894 the price of wheat ranged between 50 cents and 65 1/2 cents per bushel and the per capita circulation of money was \$24.80.

If more money is all that is needed to insure a better price for wheat, will some of the Bryanite school of politicians bring their ponderous intellects to bear upon these figures and explain how it is that wheat commanded three times more money when the per capita circulation was from \$15 and \$18 than it does now when the per capita circulation is about \$23?—New York Commercial Advertiser.
