

Get that Cold out of Your System

THE longer you let it hang on the harder it will be to get rid of it, and the more damage it will do. A continuous cold weakens the whole system, strains the lungs and leaves you exposed to attacks of other diseases.

Reall

COLD TABLETS

Will free you from the most stubborn cold. They cure La Grippe, prevent Colds, Feverish Conditions and Headaches that often accompany a cold.

PERSONAL

Walter Barkdull of Toledo spent Sunday at home. Chas. Storer and family spent Sunday in Archbold. Miss Florence Gingrich is visiting friends in Toledo. Miss Genevieve Simpson is spending the week in Detroit. Mrs. J. Q. Files and daughter Florida were in Toledo yesterday. Henry Harrison has gone to Toledo where he has a position. Mrs. C. M. Harrison and daughter, Eugenia, spent last Friday in Toledo. Mrs. Earl H. Hill was a Toledo visitor the latter part of last week. Miss Clara Miller spent this week with her parents in Kendallville, Ind. J. B. McLaughlin, of Alliance, is visiting relatives and friends in Wauseon. Mr. and Mrs. W. T. Campbell returned last Saturday from a visit in Cleveland. Harry Baker spent Monday with Clyde Barnes at his country home north of town. Mr. L. M. McDonald was in Detroit and Saginaw, Michigan, on business this week. Mrs. Daisy Underhill and brother Wesley Spade spent from Monday until Wednesday in Adrian, Mich. Mr. and Mrs. Arthur Miksell and little son Kenneth of St. Lawrence, S. Dak., are visiting the home folks a few days. Mr. and Mrs. Ed. Eager of Sidney, Australia, were guests of Mr. and Mrs. W. T. Campbell, and other friends this week. F. H. Reighard left for Columbus on Sunday night to be present at the opening of the special session of the legislature on Monday of this week. Mrs. C. E. Bennett made a trip to Chicago last Tuesday and returned Wednesday evening bringing her little grand daughter, Marian Bennett, with her.

LOCAL BRIEFS

Poultry show opened in Bryan on Wednesday this week. Mrs. Stephen Fourny has been suffering from a sprained arm for the past two weeks. The joint meeting of the Tuesday and Womens clubs has been postponed indefinitely. Miss Mary Delige, who resides with her brother on the old Allen Shade farm northeast of town is seriously ill. A fine baby boy arrived at the home of Mr. and Mrs. B. T. Cooper last Friday morning; mother and son doing nicely. Miss Mattie Baker, Miss Eugenia Harrison and Miss Ashley Ackerman are the forces who are assisting Tax Commissioner Tutbill. Spencer & Edgar awarded the set of silver spoons which they gave away Wednesday to the person who received the coupon bearing the number 983. Mr. John C. Cox and Miss Zella Hoppes, both of Liberty Center, were married at the Methodist Episcopal parsonage by Rev. J. C. Crider Tuesday evening, January 20th. Mr. George Kessler and Miss Beryl Daum, both of Henry county, were married at the M. E. parsonage in Liberty Center by Rev. J. C. Crider, Tuesday morning, January 20th. Dr. B. A. Stukeley of the Naval Hospital, Newport, R. I., in a recent letter to the Tribune, sends his best wishes to home friends and states that there are having fine weather in Rhode Island. Bryan Health Board are taking time by the forelock in the matter of preventing smallpox in that city; they have issued a warning to all citizens requesting those who have not done so to be vaccinated. The large plates of glass were placed in the show windows of the two store windows of the rooms of the new Peoples State Bank building on Thursday morning; the building is going to be one of the most attractive in town. Mrs. Curtis Porter and son Cecil made us forget at Mrs. Worley's by their pleasant call Wednesday afternoon the brooding stillness of the roadways since the edict was issued forbidding people without legitimate business calling on the streets of Wauseon. Mr. and Mrs. George W. Wales attended the fiftieth anniversary of the Second Baptist church in Toledo, on January 10th. There were but three charter members of the organization present. Mr. and Mrs. Wales and a Mrs. Clark, of Toledo, who were the guests of honor.

Mr. Horace B. Ames, well known to many Wauseon people, passed away at his home in Toledo last Tuesday afternoon at 4 o'clock, after a long illness which finally assumed the form of paralysis. The funeral services will be held at the home, Friday morning at 10 o'clock. Rev. E. H. Allen will preach the sermon, and masonic exercises will be conducted by Sanford L. Collins Lodge of Masons.

At 1 p. m. the body escorted by delegations from the Masonic lodge and Toledo No. 20, Knights of Pythias, will be brought to Wauseon for interment. Toledo Lodge No. 20, Knights of Pythias, will have charge of the services at the cemetery. The funeral party will reach Wauseon via the Toledo & Indiana Railway at 2:30 Friday afternoon. Members of Wauseon Lodge No. 156, Knights of Pythias are requested to join the funeral procession at the station and accompany them to the cemetery. Mr. Ames was born in Trumbull county, Ohio, November 25th, 1865; he came to Wauseon at the age of sixteen and about 1881 entered the office of the Fulton County Tribune where he remained for six years in the office. In 1888 he was married to Miss Lizzie Knapp of this city and the following year they removed to Toledo; this city has been their home since that time. Mr. Ames served as a foreman for the B. F. Wade Co. of Toledo for some years and in 1906 he with two associates organized the printing house at Toledo. He was an active member of Washington Street Congregational church, prominent in Masonic circles and an active member of Toledo Commandry Knights Templars, as well as of the Sanford Collins Lodge F. & A. M. and Toledo Chapter R. A. M.

He was especially enthusiastic and active in the work of the Knights of Pythias having been for 12 years the deputy grand chancellor of his lodge, No. 20. He is survived by his wife, his daughter Marian, a brother, Ernest, of Toledo, one half sister and one son, Mr. Swan will be remembered as having been mourned by a large circle of friends in Wauseon as well as by his hosts of friends in his home city. It was a pleasure to have known him. Mr. Ames will be remembered as a true Christian gentleman. The bereaved wife and daughter have the sincere sympathy of a host of friends.

JAMES F. BURROUGHS whose death we recorded in last week's issue of the Tribune, was one of the pioneers of Fulton County. He will be missed from the circles of the older residents of the county. Born in Palmyra, New York, April 4th, 1838, he was brought by his parents, Patrick and Ann (Forrester) Burroughs, to Toledo when but a few months old. In 1838 Patrick Burroughs purchased 130 acres of land in Royalton township and in 1837 the family settled down on the land and began the task of transforming the wilderness into a fertile field. James was the oldest of the family of six children and early in his life he began to share with his father the life and work of the pioneer. Especially in his studies in the common schools and under private tutors and fitted himself as a teacher; he taught fifty-five winter terms of school in Fulton and Lucas counties and is numbered among the pioneer school teachers of this section. He was a staunch and devoted friend of the cause of all who knew him irrespective of political party affiliations. A public spirited man, his father, James Burroughs, who attained maturity, a loyal member of the Catholic communion, he has rounded out a well spent and useful life of 79 years and his memory will be kept in honor in the annals of this county.

TWO LIVES SUDDENLY ENDED The following clipping will be of interest to those of our readers who were acquainted with the young ladies mentioned. Adrian, Mich., Jan. 12.—Gladys Kuey, popular young teacher in Adrian public schools, was instantly killed and Doris Dickerson, student in the Adrian high school, was fatally injured when the automobile in which they were driving was struck by a last mail on the Lake Shore road near the outskirts of the city Monday afternoon. The Dickerson girl died in the hospital shortly after 7 o'clock Monday night. Leroy Kuey, father of the first victim, and Mrs. U. S. Dickerson, aunt of the Dickerson girl, were eye witnesses of the shocking accident. Standing in the front yard of the Kuey home, they saw the train bear down upon the machine and were the first to arrive at the crossing after the train had passed. The young women apparently saw their danger. Miss Dickerson, who was driving, applied the brakes, but the machine skidded directly into the oncoming locomotive. The body of the Kuey girl was horribly mangled. Concussion of the brain caused the death of the second victim, and she never regained consciousness. The tragedy caused a shock to the entire city, as both were well known and unusually popular in school circles. Miss Kuey was 18 years of age; Miss Dickerson 17.

Terms made known on day of sale. Free lunch at noon. A. A. SMITH, Prop. Geo. Bodley, Auctioneer. M. B. Badger, Clerk.

Important Shipping Point As a distributing and trans-shipping center and a coaling station, Alden ranks with the most important ports in the near east. Millions of skins and hides are shipped to Europe and the United States every year. K. of P. Installation The Knights of Pythias will install officers at their regular meeting next Tuesday night. H. F. DIMICK, C. C.

HOW WEATHER IS FORECASTED Many people have an idea that there is something mysterious and occult about the work of the Weather Bureau in forecasting the coming of storms, frosts and floods. No few think that the observers must necessarily get their data by reading the planets, the stars and the moon. As a matter of fact the forecasts of the Bureau foretell the coming of disturbances in a businesslike way, very similar to that in which a man who has ordered a shipment of goods would estimate the date of its arrival.

Suppose a business man had ordered a carload of pineapples from the Hawaiian Islands. He would know the average time it would take the steamer to make the trip to the Pacific port, the average time for unloading and loading into refrigerator cars, and the average number of days to be allowed these cars for their trip across the continent to New York. His estimate, however, would be subject to error because the steamship might be delayed by fog, or the cars might meet with an accident. Storms, frosts and floods, do not originate in the United States. They come to us, some from the north, some from the south, some from the west, some from the east, some from the south, some from the north, some from the west, some from the east.

The weather bureau gets cable telegraphic or wireless notice of a forthcoming storm from a station on a vessel after vessel reports the storm's arrival in its neighborhood, so that the general direction and rate of progress can be determined very nearly. In fact, the arrival of some storms can be foretold ten days in advance. The forecasters watch for the region of low barometer which is the storm center around which the winds blow. This whirl or eddy moves bodily forward with the general eastward drift of about 850 miles a day in our latitudes. As the lines of equal pressure (isobars) around the low center crowd closer together, the low is intensifying and the storm force. The forecaster determines the direction of movement of the storm and velocity.

When weather disturbances are reported by the weather bureau from experience about how long it takes them to reach our Pacific Coast, and then how long after they will reach the Atlantic Coast. For example, if a storm coming from Siberia drifts eastward around the North Pole and reappears in Alaska it would appear near Washington and Oregon. About two days; should get to the Great Lakes in six days and to the Atlantic Coast in seven or eight days. Unexpected conditions may delay storms or divert them from the straight track just as a refrigerator car may be thrown off its schedule by a broken axle or a derailed freight car. Some of these storms delude themselves by running into regions of high barometer which are of greater extent than the storm itself. Some of them, however, travel completely around the world. To keep tabs on cold waves that come from the United States, from Canada and Alaska, the Weather Bureau studies the Canadian Weather reports. England sends reports from its ships in the Atlantic and the Continental Europe, and daily reports come from St. Petersburg on the conditions in Russia and Siberia.

The business system used in tracing the track of a storm is applied in determining the arrival of frosts. Flood forecasts are made in much the same way. Information as to the amount of rainfall at the head waters of streams that cause floods are obtained by telegraphic reports sent by local observers. As this rain reaches the main channel, the height of the water in the channel is determined by successive gauging stations. Past records establish how much a record, say 20 feet at Dubuque, Iowa, will produce at Davenport, and how much a record of 10 inches at Mississippi. This plan is followed all the way down the river, and at each point full allowance is made for the effects of water from tributaries, and from additional and local rainfall. As a result of these observations in the recent flood, the people of Cairo had been warned of the danger in advance. The Pittsburgh district can be given only 12 to 24 hours notice, because a flood is upon them within 24 hours after a heavy rain storm.

Leaky Radiator Stops Car. It may not seem possible that a leak in the radiator would kill a motor and prevent further movement of the car for more than an hour, but such was the case of one of the Indiana-Pacific tourists. The trouble, of course, was not due primarily to the radiator leak, but the magneto being directly behind the point of leakage, it was affected and refused to give up any current. The water coming from the puncture in the radiator was blown back on to the magneto, due to the force of the wind, with the result that the breaker points were short-circuited continually by the water. The mechanic examined every part of the motor and never dreamed of looking at the magneto, for the instrument never gave any trouble, and being of a good make was not expected to die. A glance at the radiator leak and another at the magneto near by concluded the search for the faulty part. The leak was repaired and the magneto cleaned and dried, and the car continued on its journey to the coast.

One Good Thing to Get. The stockbroker was busy and nervous. His caller was insistent and garrulous. He explained his ability to get for the broker important and confidential information. "There's nothing you can do for me," said the broker, decisively. "Nothing," asked the caller. "Absolutely nothing." "Well, I think I could get you some stuff that would be exceedingly useful to you." "That's fine! What can I get for you?" "Out," said the broker.—Popular Magazine.

Sees Good in Woman Suffrage. Although Abe of Waseon gets into a lengthy tirade against the suffrage of the countries and part of America which have given the vote to women. On the whole, these results have been beneficial. Instead of using the privilege for the assertion of their personal rights, the women have utilized it for the cause of prohibition and for the improvement of the conditions of child life. Japanese politicians are inconsistent in that they hesitate to extend to women and laborers the political rights which they strive to wrench from the "bureaucratic clan."—Bulletin of Japan Society of New York.

Vain Man. "No," said Smallwort, "I hardly feel justified in saying that Peppers is inordinately vain, but when a fellow has a photograph in his room arranged to play 'Hail to the Chief' as soon as he opens the door, what is one to think of him?"

WHERE YOUR MONEY HAS GONE will not puzzle you if you have an account at The Peoples State Bank. Your bank book will tell you how much you had. Your checks will tell you what you have spent and what for. We want accounts from women as well as men. The increasing number of women depositors shows they have found such an account an advantage.

RESOLUTIONS OF RESPECT Written on the death of Mrs. Ann Quackenbush who for many long years was a faithful member of our order, tried and true always, an efficient officer and a friend of everyone. Therefore, be it resolved by the Lo-ure Womens Relief Corps, No. 20, that in the passing of this highly respected member, we will remember her noble traits of character which endeared her to all. We also wish to recognize the kindly and cheerful spirit which she has shown in all the trying experiences through which she has passed. Therefore, in token of our appreciation for this departed Sister, we will appropriately drape our charter for a period of thirty days, present a copy of these, our sincere utterances of sympathy to her family, spread them upon our minutes and furnish the same to the press for publication.
