NOTE BURNING. In recent years the Methodist people have made extensive repairs on both their church and parsonage costing in the aggregate considerably more than \$4000. For about four years now they have been paying off this debt. Within the last nine months over \$1300 of this has been met. During the morning service this coming Sunday a pause in the worship will be called, the congregation will declare itself out of debt, burn its cancelled notes, sing the doxology, and fittingly rejoice. A fine representation of the membership is expected to be present. Friends of the church will be welcome.

The most important French port outside of France is Saigon, which ranks with Boulogne and Bordeaux among the ports of the mother country. It is the natural collecting and distributing center for the great rice-producing delta regions of the Mekong, Donnai, and other rivers, and is the port of trans-shipment for all the other ports of Indo-China. Saigon is located on the right bank of the Saigon river, about fifty miles from the sea and about ten miles above the point where the river empties into the Donnai, a short coastal river parallel to the Mekong and about one hundred miles east of it.

Total Resources More Than A Million Dollars

Tangible Property, Real Profits, Steady Dividends

Actual property values (the kind that can be seen and appraised by any well informed person), and ample earning power (the kind that makes itself felt in a cash income that is received year after year without fail) are the enduring foundations on which we have built our success in marketing 7% preferred stocks on which no investor has ever lost a dollar of principal or income. The Central Steel Company, of Massillon, is a splendid example of the enterprises whose preferred stocks we recommend. On conservative appraisal this property is worth more than \$200 for each \$100, par value, of preferred stock outstanding. Net profits are several times the amount that goes to pay current dividends on the preferred stock. The company has an actual surplus of about \$250,000, which is sufficient to pay dividends on the preferred stock for more than two years. If you have \$100 or more to invest, send us your name and address and let us give you complete information about this 7% preferred stock and others that we recommend. Ask for our 1916 "Portfolio of Anniversary Reports." It contains 32 pages of condensed information of great value to manufacturers, bankers and others who have funds to invest in large or small amounts.

Destroying Germs. Chemists employed by hospitals have found that disease germs die quickly on certain building materials. It has been found by the tests made that the strongest or most resistant germs perish within a day when placed on the surface of Inoleum. This is due to the large quantity of Inoleum oil used with the cork in making Inoleum. Tests have also shown that it is the use of Inoleum oil as a binding medium which gives to many wall paints their claim of being effective for hospital use. It is claimed that as the oil leaves the paint they lose their powers of sterilization.
