Italy's 1917 metallic production was valued at \$96,323,000.

## OHIO CLEANINGS

Total death toll at Camp Sherman as a result of the influenza epidemic is in excess of 1,000. In the state 80,000 cases have been reported to the state health department.

Daniel J. Ganev, 23, Gallipolis dry goods merchant, is dead.

Mrs. John Hauth, 25, Massillon, was killed in an auto accident near Scott Young, postmaster at Roundhead, Hardin county, is dead.

Paul Halliday, 7, Youngstown, was killed by a streetcar.

Cyrus Crawshaw, 10, New Philadelphia, may die of a bullet wound accidentally inflicted by an officer of the E. J. Betts, 72, former Ohio supreme court judge, is dead at Jacksonville, Fla. He lived at Conneaut.

Rev. James M. Faris, pastor of Reformed Presbyterian church, Bellefontaine, died of apoplexy.

Mrs. Florence Tanner of Canton, by selling \$138,057.74 worth of war savings stamps during the vacation thrift contest, won first prize, \$1,000 worth of war savings stamps.

Boys at Camp Sherman are asking for jellies, jams and ice cream during the convalescent period.

Infant daughter of Mr. and Mrs. Murrin Henry of Ottawa was severely burned by the overturning of a kettle of boiling water.

For the fourth annual state adult Bible class convention at Bellefontaine, Nov. 14-15, automobile parties are being organized over Ohio to avoid railroad travel. A feature of the convention will be a silver trophy cup contest. Any class in the state may send a representative to tell of the class and its work.

Dennis Berry, 15, Findlay, was accidentally shot and instantly killed by Walter Stratton, 14. The boys had been hunting and were walking home.

Lieutenant Merton Campbell of Wakeman, former Ohio State student, was killed in action in France last week, according to the official casualty list. He was an aviator.

New city directory estimates the population of Columbus at 250,000.

Wages increases of 25 per cent were granted employees of the Wily-Overland company at Toledo and Elyria, now receiving under 45 cents an hour.

Christmas parcels for American troops abroad will not be accepted by the postal authorities for mailing after Nov. 20.

Oscar McVey, son of Albert McVey of Lancaster, was killed in action in France.

Schools, churches and places of amusement at Dayton were closed as a precautionary measure against influenza epidemic.

Resources of Ohio state and private banks were only \$7,000,000 short of the \$1,000,000,000 mark Aug. 21, the highest they have ever been, according to State Bank Superintendent Berg. The exact figure was \$993,003,119, an increase of more than \$20,000,000 since June 29.

Securities Commissioner P. A. Buehler reports that the operation of the blue sky law has been very successful during the past year, satisfying promoters of legitimate enterprises and putting a stop to promotion of millions of dollars of swindling schemes.

Federal government is planning to build 1,000 homes for workmen in Dayton.

Charles R. Meyers, president of the New First National bank, died at his home in Columbus.

State health officials are not alarmed over the daily increasing number of cases of influenza in Ohio. Dr. E. J. Schwartz, head of the division of communicable diseases, said he does not expect the crest to be reached until next week. The number of reported cases was approximately 65,000. Nearly 50 new municipalities reported outbreaks.

Fire at Marysville destroyed the residence of C. H. DeWalt.

Fire in the Grassell Chemical company's sulphuric acid plant at Cleveland caused a loss of \$175,000. Firemen, with water-soaked handkerchiefs tied over their mouths and noses, fought the flames in dense clouds of smoke.

Dr. G. A. Bierdemann, pastor of First Lutheran church, Findlay, has been appointed a chairman of the federal community labor board.

Bucyrus oversubscribed its fourth liberty loan quota of \$317,900 by giving \$324,450.

Charged with making disloyal utterances to hamper the liberty loan, Philip P. Smith, 64, retired farmer, was arrested at Tiffin. He was released under \$1,000 bond. He later bought a \$500 bond and the charge against him was dismissed.

On account of the influenza epidemic annual meetings and election of Red Cross chapters in Ohio will be postponed from Oct. 22 to Nov. 20.

Charles L. Bowman, for 15 years editor of the Ashland Times-Gazette, has resigned his position to enter the Toledo and Ohio Central railway at Bucyrus, in the air brake department.

Rev. P. A. Douglas, Ohio missionary, died of cholera at Urupiah, Persia.

Ohio Federation of Labor, in convention at Columbus, voted against statewide prohibition and for the proposed constitutional amendment which provides that legislative enactments of federal amendments shall be made referable to the people.

John B. Moore, president of the Ohio Mine Workers' association, was unanimously elected president of the Ohio Federation of Labor. Moore succeeds John A. Voll, Zanesville, re-elected.

Governor Cox granted a reprieve of one week to Brantle Spillman, who was to have been electrocuted for murdering a barn horse in Cincinnati. A petition 446 feet long, bearing signatures of hundreds of Clevelandans, was sent to Secretary of Labor Wilson, asking a rehearing for Cleveland women conductors ordered off streets Nov. 1 by federal investigators.

Biggest single subscription to the fourth liberty loan among soldiers at Camp Sherman was made by Corporal Edward Grassell of Cleveland. He signed up for \$20,000 worth.

A 50 per cent curtailment of the 1917 production of pottery ware for six months was ordered by the war industries board, according to East Liverpool pottery manufacturers.

Mayor Frank B. Hamilton, Councilman Louis H. Neff, Safety Director Herman Grunert, Israel C. Schuchart, Joseph Wagner and John Glass, all of Piqua, were arrested on sedition charges. Hamilton, Grunert, Wagner and Glass are charged with obstructing the fourth liberty loan. Neff and Schuchart are charged with attempting to foment revolution. All are Socialists.

## HOW TO REMODEL THE OLD HOUSE

### Modernize Existing Dwellings to Make Them More Efficient.

### PART OF GOVERNMENT PLAN

Nation's Wealth in Buildings Should Be Preserved—Easier and Cheaper to Keep House Constantly in Good Condition.

By WILLIAM A. RADFORD.

Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to the subject of building, for the readers of this paper. On account of his wide experience as Editor, Author and Manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 1821 Prairie avenue, Chicago, Ill., and only enclose three-cent stamp for reply.

U. S. WANTS BUILDINGS KEPT IN REPAIR.

No Permit Required for Repair or Remodeling Up to \$2,500.

The following is authorized by the war industries board in its circular No. 21, dated September 3, 1918, relative to nonwar construction:

"Structures . . . falling within the following classification are hereby approved, and no permits or licenses will be required therefor:

"(2) Repairs of, or extensions to, existing buildings involving in the aggregate a cost not exceeding \$2,500."

When one has a good house a very necessary thing is to keep it well preserved. The house that is damaged by accident should be repaired as early as possible so that it will always be in good condition. To prevent decay we must paint wood-

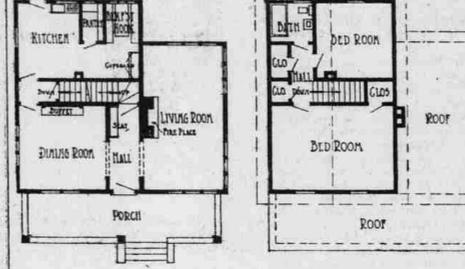

work or metal work, point up masonry and repair cracks in concrete and plastering.

It is far easier and cheaper to keep a house in constant good condition than to let it run down and then repair it all at one time. Parts subject to rot will do so very quickly if exposed to the elements. A leak in a roof is nothing serious, but if not attended to promptly the constant leaking will cause extensive damage to the ceilings, walls and floors. What would have cost perhaps a few dollars to repair at first has by neglect been allowed to cause damage that will cost ten times the amount to have it put in good condition again.

A house that is simply left alone will not only run down and look dilapidated, but it will go to ruin in a comparatively short while. It is like a machine that is kept in good condition, making a very warm house. Despite its excellent construction, it had no attractiveness and was sold at a good deal less than its cost.

The old owner had lost sight of the fact that it is the convenient and attractive house that can be sold at a good price when it is necessary to sell. The purchaser saw the possibilities in this house and got a bargain, and with the co-operation of the contractor and the lumber dealer he was able to remodel it into a comfortable, modern home at but slight cost.

But little need be said, as the pictures and plans tell the story better than words can. The principal changes were the addition to the living room and enlarging the front porch. Downstairs the big kitchen was altered and a new pantry and cupboards built, also a breakfast room. A partition with a wide eased opening was

First and Second Floor Plans of House After Remodeling, Showing Large Modern Living Room to the First Floor and Second Floor Rearranged to Provide a Bathroom.

placed across the old living room, dividing it into a hall and dining room. The old kitchen was a big, roomy affair. In the remodeling a new pantry was made alongside of the old one, the front wall of which was removed, and what was once the old pantry is now a delightful breakfast nook, and a cupboard added to the convenience and looks of the kitchen.

Upstairs the greatest convenience of all has been installed, and this is the bathroom—a portion of the large rear bedroom was partitioned off, thereby making a complete bathroom. In the house.

To only a very few does the thought occur that their good house can have all these modern conveniences and style. The majority of improvements can be made at comparatively little expense.

Many a good plain house can have a number of modern improvements added to it that will make it more convenient and comfortable on the inside.

Equal Right, but No Favor.

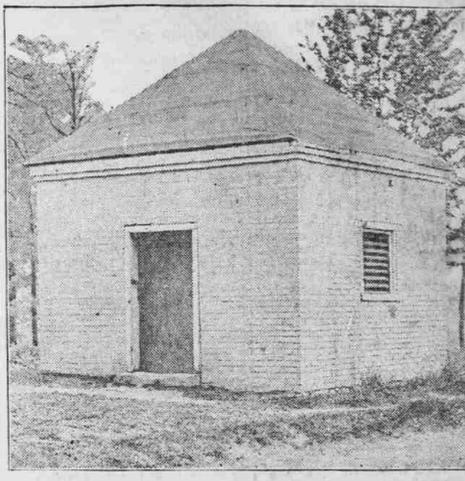

"I suppose," said a lady to a conductor, "if I pay the fare for my dog he will be treated the same as other passengers, and be allowed to occupy a seat."

"Of course, madam," the conductor replied politely, "he will be treated the same as other passengers, and can occupy a seat, provided he does not put his feet on it!"

Optimistic Thought.

There can be no lasting concord between liberty and tyranny.

## CONSTRUCTION OF GOOD SMOKEHOUSE AND PROCESS OF SMOKING TO PRESERVE MEAT

FARM SMOKEHOUSE, FIREPROOF AND FAIRLY LIGHT.

### THINGS TO REMEMBER AT BUTCHERING TIME.

(Prepared by the United States Department of Agriculture.)

Cleanliness is the most important factor in butchering and curing meats. Meat very easily becomes tainted.

Save all pieces of meat for sausage. There are many ways of converting it into a palatable product.

All waste fat trimmings and skin should be rendered and the products used to make soap.

Bones should be crushed or ground for chicken feed.

Never put meat in cure before the animal heat is out of it.

Always pack meat skin side down when in the curing process; except the top layer in a brine cure, which should be turned flesh side down.

Keep close watch on the brine; and if it becomes "ropy," change it. Do not forget to turn or change meat several times during the curing process.

The fat of dry-cured meat will sometimes become yellow. This does not make it unwholesome.

It takes more time to smoke dry-cured than brine-cured pork.

Slow smoking is much better than rapid smoking, and there is less chance of causing the meat to drip.

If meat becomes moldy, brush off the mold with a stiff brush or trim off the moldy parts with a knife. The entire piece is not spoiled. Be sure meat is thoroughly cooled before smoking.

Remember, the seasoning of sausage is generally governed by taste. Fresh sausage can be kept under a covering of lard for a number of days.

Put the strings from the hams or bacon before they are placed in the sacks. There is a great tendency to use the same string to hang up the meat after it is sacked. It is impossible to tie the top of the sack and make it insect proof if a string sticks out of the top. In tying the top of the sack make a double wrap before tying a knot and this will prevent the entrance of any insects. Each sack should be painted with yellow wash and then each piece can be hung up for future use. Never stack the hams and bacon in a pile after yellow wash has been applied.

**Recipe for Yellow Wash.**

For 100 pounds hams or bacon use: three pounds barium sulphate, 0.08 pound glue, 0.08 pound chrome yellow, 0.40 pound flour.

Half fill a pail with water and mix in the flour, dissolving and stirring thoroughly. Dissolve the chrome yellow in a quart of water in a separate vessel and add the solution and the glue to the flour; bring the whole to a boil and add the barium sulphate slowly, stirring constantly. Make the wash the day before it is required. Stir it frequently when using, and apply with a brush.

### DON'T LET MILK SPOIL

(Prepared by the United States Department of Agriculture.)

In this time of need for food every effort should be made to prevent milk from spoiling. Cows should be kept clean and should be milked in clean surroundings. Milk should be cooled and covered with a clean cover. Milk should be thoroughly sterilized with steam for at least five minutes, and milk should be cooled promptly to 50 degrees F., or less, and stored in a clean, cool place. Whenever these conditions are met, little milk will be wasted. In this time of terrible destruction of human life it is particularly necessary that milk be produced under such conditions as to insure a safe food for babies. This must be done by a decreasing number of men trained to do it. A great task and a great opportunity for dairymen are involved.

### TO INCREASE HONEY YIELDS

If All Beekeepers Would Use Modern Hives Profits Would Be Larger and Add to Supply.

(Prepared by the United States Department of Agriculture.)

Hundreds of thousands of bee colonies, representing about one-third of the number kept in the United States, are housed in log "gums" and in box hives, and produce for their owners an insignificant amount of honey compared with what they might do if they were transferred to movable-frame hives and handled by improved methods.

If all the beekeepers now using box hives would adopt the modern type of movable frame hive they would not only secure more profit from their bees for themselves, but would add many millions of pounds of honey to the nation's supply. Much of the honey produced by colonies in box hives is wasted by crude methods of securing the crop, and these colonies are reduced in earning value by uncontrolled swarming and by the annual loss of bees which die in winter because of lack of protection and sufficient food stores.

### Breed All Available Mares.

Every mare that is sound, of good type and with weight over 1,200 pounds should be bred to the best available draft stallion.

**Plowing in the Fall.**

Fall plowing is far more important in good farming than is generally thought.

**Green Pasture for Hogs.**

Good green pasture has no equal as a hog feed.

**Green Feed Necessary.**

Green feed is necessary for poultry. Rape is one of the best.

**Plows Rough Lands.**

A special type of plow for use in rough country, where labor is high and scarce, is known as the "stump-jump." This plow was invented and is used in western Australia, where the farmland is cluttered with roots and stumps.

**Has Not Learned Life's Lesson.**

A man who has lived and has not grown tolerant toward others does not deserve to meet with tolerance himself.—Turgeniev.
