AIN'T IT AWFUL MABEL!

Napoleon newspapers are authority for the statement that for a period of sixteen days not a single marriage license was issued in Henry County. The cause for this "drought" or whatever such a calamity may properly be called is not given in afor-said newspapers.

Perhaps its the High Cost of marriage or of living after marriage. Perhaps its because the supply of marriageable young people in Henry County is exhausted. Perhaps its because love makers and gossips have gone on a strike for short hours and better working conditions; but what the use guessing? "The time to set a hen is when the hen is ready to set" and young folks will have and marry when and where they feel like it.

Lessons In OPTOMETRY

In the last lesson astigmatism was mentioned. What causes it? Astigmatism is caused by the eyeball being improperly shaped. With what result to the patient? If astigmatism is pronounced objects appear distorted to him. If the astigmatism is slight the muscles of the eyes may be able to overcome it, and objects may appear clear and distinct.

If a person with a slight degree of astigmatism sees objects clearly, in what way is this defect a detriment to him?

As before explained, a slight degree may be overcome, but in accomplishing this the muscles of the eyes are unduly strained, which often results in a nervous reflex.

What is a nervous reflex? It is an annoying result of eye strain, which through the nervous system may be manifested in headaches, nervousness and other disorders.

AT THE AUTOMOTIVE BODY PLANT

A new concrete floor is in process of construction in what was formerly the foundry room at the Wauseon Automotive Body Plant, this room with its spacious floor space will be used as the painting department by the Automotive Body Company.

Five or six car loads of the company's standard Ford cars and bodies have been shipped out while others are in process of manufacture and assembly.

Orders for custom work are coming daily, just now the company is turning out motor-bodies that are to be used in Amboy township for transportation of school children, the design and construction of these bodies is attracting the attention of the motor-bus manufacturers of Michigan, Indiana and Ohio and orders are coming fast.

The company are still at work on local orders; every one of our local business firms who have purchased bodies built by the Wauseon Company are well pleased and enthusiastic over the bodies they have purchased.

One unique feature about the Wauseon Automotive Body Company is its versatility; it is confined to no special types of trucks, but designs and builds bodies for all makes of trucks and for all classes of transportation, with the possible exception of tank bodies.

It is a real source of interest and pleasure to watch the rapid development of this latest of Wauseon's industrial plants. We predict that the time is not far distant when the company will be producing double or triple their floor space and working force. They are already crowding their capacity.
