### DISCUSS VALUATIONS

Readjustment of Interest to Taxpayers of the County.

To the Tax-Payers of Wood County: The bill limiting the tax rate at one per cent will undoubtedly become a law at this session of the legislature. Every tax-payer knows that the farmer and those owning their own homes in the towns are paying more than their share of taxes under our present laws.

The aim of the one per cent law is to relieve the farmers and the freeholders of our towns from the unjust part of their burden.

Under this law it will be necessary to make a radical readjustment of the tax rates and of the valuations of the real and personal property of our county during the next two or three years, making it the most critical period in the financial affairs of Wood county that has ever been known.

Most of the tax-payers know that a very large part of the burden of the readjustment will fall on the auditor's office. When it takes from two to three years to become familiar with the duties of the auditor's office, a tax-payer can easily see how difficult it would be for an auditor without experience to render proper service during this critical period of the readjustment of the valuations.

For this reason many of the tax-payers of Wood county, who have carefully studied the question, have requested that I become a candidate for the nomination for county auditor at this time. Under ordinary circumstances I would not ask the support of the voters of Wood county as I have already been honored by two terms. But under the present conditions I have decided to become a candidate for the nomination, and therefore respectfully solicit your support and influence.

I hope the tax-payers of our county will carefully study over the matter and look at it from a business rather than a political standpoint.

Respectfully submitted,  
FRED W. TOAN.

### NO CALAMITY IN 1910 WHEAT CROP.

Official correspondents of this department estimate the present condition of the growing wheat plant at 83 per cent compared with a standard average. This is a decline in condition of 10 per cent since the issuance of the last report, December 1st. In comparison with condition on corresponding date last year it shows an advance of 21 per cent. Seeding generally was late, and fear was expressed that an early winter would cause serious damage. The plant, however, made remarkable growth during the month of November, and went into winter in fine condition. Throughout the severe weather it was well protected by a heavy covering of snow, and while a few correspondents note damage by ice covering the fields after the disappearance of the snow, its decline in condition is attributed chiefly to the extreme drought prevailing during the past month. The plant is suffering badly for want of moisture, and warm rains during April would greatly improve its appearance. Of the harvest of 1909, it is estimated that 16 per cent of the crop remains in producers' hands.

Winter barley and rye show the same growing condition, 88 per cent compared with an average.

The condition of corn in the crib is estimated at 95 per cent compared with an average. Ten per cent of the crop remained unhusked during the winter, and it is estimated that this suffered damage to the extent of 12 per cent.

Fruit prospects are excellent, being estimated at 90 per cent compared with an average.

Farm work generally is well advanced. Many correspondents report oats seeding as nearing completion and corn plowing in progress.

### Worse Than Bullets.

Bullets have often caused less suffering to soldiers than the eczema L. W. Harriman, Burlington, Me., got in the army, and suffered with forty years. "But Bucklen's Arnica Salve cured me when all else failed," he writes. Greatest healer for Sores, Ulcers, Boils, Burns, Cuts, Wounds, Bruises and Piles. 25c at C. P. Champney's.

### MAY BE HEIRS

To Large Fortune Left by English Relatives.

Wesley Bean and the heirs of Noah Bean, deceased, Stony Ridge, Ohio, are advised that a fortune of \$72,000,000 in the court of chancery in England, awaits the proper claimants and as far as can be ascertained at present writing, the above families are some of the heirs to the estate, says the Sentinel.

Among the heirs are G. W. Bean, Mrs. Sarah Langenderfer, Mrs. John Moon and James Packard, all of Toledo, Mrs. Emma Bean of Dayton, and the Pitchers of Indiana.

Above fortune is known in England as the "Pitcher Estate." Mr. Pitcher a rich sea captain, was lost at sea leaving no heirs in England.

Wm. Pitcher of Indiana, decided to make a trip to England to investigate the claim and advise the fortune is there awaiting proofs of the proper claimants.

The captain lost his life in 1849, and the Pitchers residing in Indiana have been investigating the above estate for a period of many years and now have hopes that their efforts are to be rewarded and their claims accepted.

The Beans have no lawyer engaged, as Mr. Wm. Pitcher is in England investigating personally. The latest is that Mr. Pitcher finds the estate there and all that is necessary now is for the Beans to prove ancestry, according to the story.

### ORATORICAL CONTEST

Best Entertainment of the Kind Ever Given in Perrysburg.

The first oratorical contest of the two societies of the High school was given Friday evening, April 8, as per the program published in the Journal. Nothing in the history of the schools has aroused among the students the enthusiasm which this contest has, and the Journal frankly states that it was justifiable. A better oratorical program was never given. Everyone was at his best and made good impressions upon the judges and the audience. The judges, Attorney Eugene Rheinfrank of Toledo, Hon. B. F. James of Bowling Green, and Supt. Chapman of Maumee, had no small task in selecting the winners, but after considerable debate, Attorney Rheinfrank announced Nona Meagley and Clayton Brown as the winners of the first positions.

He also took the opportunity to commend the high quality of work which all had done. The support each society gave its own members was fine. The yeilmasters, Donald Finkbeiner for the Corinthians, and Alfred Williams, for the Ionians, showed themselves splendid leaders. That the Ionian speakers won both firsts does not say that the Corinthians were poor, or weak; they were neither and not a few would have given first to Corinthians.

### ARBOR DAY

By Carl Simmons, Dist. 3.  
Arbor Day is for the planting of trees, plants and flowers. In large cities and towns they plant oak, elm, maple and many other kinds of trees. They are being used up fast so it is necessary to plant new ones.

The Aztecs are said to have planted a tree every time a child was born, naming the tree after the child. The people of Nebraska, in order to have more trees, offered a premium of \$25 worth of books to the school that planted the most trees on Arbor day. There were over 1,000,000 trees planted in the city of Lincoln. Now, in every school in Ohio, there is a day set apart for the planting of trees. We should always be careful and not cut down the growing trees unless it is necessary to do so.

There are a great many people in this world who don't know the value of trees. If there were no trees it would seem desolate and lonely. The trees are of great value to the soil. They make the ground rich and fertile. If trees were not here, the birds would have no shelter from the storms.

"Trees are silent sentinels that never desert their posts, till death or violence calls or drives them away. They are friends, protectors, and teachers; they lead us naturally by their innocent, lofty beauty, to look through nature up to nature's God."
