

Make Christmas the Joy it Ought to be for Everyone

By doing your shopping by telephone.

It helps you and helps others. Every consideration of self-interest and regard for others urges you to use the telephone.

You'll be more cheerful when Santa Claus fills the stockings on Christmas eve and more pleasant when the presents are passed around on Christmas morning if you have sent in your orders early and have been saved much of the tedious work of shopping by using the telephone.

If you doubt the truth of our statement permit us to install a telephone in your home and when once you learn its great advantages and the time and labor it saves, you will never permit us to remove it from your home.

FATHER, MOTHER AND THE BABY

are alike benefitted by having a phone in the house, especially in cases of sudden sickness at night, when it is only necessary to ring up the doctor at any hour and have him come at once without the long delay and unpleasant task of walking or driving to the doctor's office.

The housewife finds it a great convenience to order her groceries by phone and have them promptly delivered without the necessity of dressing to go down town to give her order.

THE FARMER finds the telephone a great help, for by its use he can learn the daily market prices and take advantage of the right time to market his produce.

Let us place a phone in your home. The cost is very small, while the service is great.
