

Spray Your Fruit Trees Now If You Want Any Fruit

CORONA DRY (a very fine powder) is easy to mix with water—it mixes as easily as Paris Green. It stays in suspension longer, does not clog the spray pump, covers more evenly and is cheaper as it requires only 1 1-2 to 2 pounds to 100 gallons of water.

Is fine for potatoes and all vegetables either with water or in the dry powder.
40c per lb, or 35c per lb in 5 lb lots.

First Presbyterian Church

Rev. W. H. Pheley, Minister.

The most remarkable religious development of modern times is the Organized Bible Class movement, which in the last few years has enrolled over a million men.

This mighty army, standing for peace and prosperity, constitutes a moral and spiritual force that is to be reckoned with in all questions of Church and State involving moral issues.

Watch its influence and work in the next few years.

With the "Impregnable Rock of Scripture," as Gladstone called the Bible, as its manual of arms for study and action, the Men's Bible Class is equipped to engage in all forms of activity which it is desirable for a men's organization in a local church to undertake.

The Men's Organized Bible Class of this church, but little over a year old, enrolls 32 members and has already become a most important factor in all the life of the church.

Its simple basis of membership is broad enough for all men to enroll, which they are heartily invited to do.

See this space next week.
