The person who buys a Thrift Stamp each day for every day of 1918, will spend \$91.25, which is the equivalent of 22 War Savings Stamps with a maturity value of \$5. The government, thus, will pay the "Thrift-Stamp-a-Day" man or woman \$110 in January, 1923, and in addition, from his 1918 savings, the person so investing will have for good measure 13 Thrift Stamps.

If as we grow we can encourage the smiles instead of the frowns much of life's drudgery will vanish. If we can learn to gather the sweets from goodness it will have more attraction for us. It's not the burdens that crush men to earth. It's the way we look at them. It's not toll that is the curse of man, but the fact that it has become a matter of compulsion. We need men who will show us how to rejoice in demands upon strength. We need characters that will show us how to turn toll to advantage that will give us pleasure as well as profit financially.

We believe we have exhausted all arguments against the divorce evil and probably nothing more that we can say would avail anything. Still, with coal at \$14 a ton it may be well enough for many scrappy couples to remember that divorce means twice as much fuel and blankets will be necessary. Save money by remaining hitched.

The gas attacks somewhere in France are as naught compared to the mud attacks in the Gotham campaign, where each side, instead of masking itself, as they are doing in France, is intent on unmasking the other. It is something on the order of the campaigns of the dear old times.

That control of exports which this country has begun puts Germany in a worse fix than she has been at any time since she sent the submarine Deutschland over to get a cargo of nickel, crude rubber and bar silver for her starving babies.

The Teutonic strategic retreat is still steadily and firmly drawing the British and French to the border and may even lead them over. At present, the magnificent possibilities announced for it have been indefinitely postponed.

From a cursory examination of the proper war diet it would appear that if you are in a hurry to get a line on the right course merely eat what you hate and cut out what you like and you can't miss it much.

The answer to the government expert who says \$45,000,000 are lost annually on eggs is that the excess paid for eggs leaves the speculators plenty after charging off their loss.

The frequency with which automobiles are found to be implicated in rural bank robberies reveals a streak of degeneracy that has been long suspected.

Fashion observers cannot help noting that there is a constantly diminishing neck exposure, as the drumstick display becomes more pronounced.

Economic pressure wisely exerted may end the war, and sentiment should not be allowed to stand in the way of its application.

Most of the little nations outside of the big war are neutral like a food speculator is patriotic.

Fashionable gowns with one sleeve will make it easy to locate the cold shoulder.

The army needs cooks, and the army just buys them.
