

To be smartly coated is to be ready for everything "on the spur of the moment" occasion in winter months—motoring, walking, driving. This Wooltex coat is a garment for these occasions. No. 2065.....Price

**\$65**

Whether one is young or old, one may enjoy the comfortable warmth of this Normandy mixture coat of Teal Duck, Taupe and Brown. No. 2000.....Price

**\$50**

## Week of August 12th to 17th You Are Promised a Rare Opportunity in the Annual August Exhibition of **Wooltex Fall Coats** While They Last

**\$35, \$40, \$45, \$50 to \$95**

This sale is of special interest to the woman who wants in her Fall coat assured smart style—in choice fabrics unobtainable later in the season—and at saving prices—not to be had again until the war is over.

**T**O every woman who attends this exhibition of clever models, originated and designed at the Wooltex Fifth Avenue studio, we say—be prepared to select your Fall coat now. Later you will be envied by those who waited and were disappointed on account of the extreme scarcity of the most desirable fabrics.

You will learn the pleasing truth that these exhibition Wooltex Coats—as usual only of all-wool fabrics—are based on cloth prices prevailing months ago, and not to be duplicated at present market values.

Wooltex and our refusal to profiteer reward our alert patrons with this limited and exclusive opportunity to purchase, during this ANNUAL EXHIBITION, coats of youthful style and grace at \$7.00 to \$10.00 saving.

We have refrained purposely from elaborate descriptions of these artistic garment productions; we

prefer that you judge at a personal inspection.

See these exquisite tailored styles of youthful, graceful lines in Fall colors most desired—feel the truly scarce and precious fabrics—then note the thrifty prices rare these days.

Knowing as you do the real lasting merit of Wooltex Garments and our opportunity of selecting the choicest styles from the fashion leaders of America—we want you to believe that these assured styles, created at the Wooltex studio, represent our best appeal to the fashionable taste of this community.

One really longs for a ticket to the matinee as this coat is tried on. It's so suggestive of theatre parties and afternoon teas. No. 2050.....Price

**\$58**

Spain inspires this new Trocadero effect—Fifth avenue commends it. Fully lined. No. 2540.....Price

**\$75**

Australia is reported to be the chief source of the world's wool supply, though it is said that South America and Australia have about the same number of sheep, approximately 100,000,000.

The oldest woman preacher in the United States is Mrs. Mary Goddard, of Brunswick, Me. Mrs. Goddard, though 107 years old, continues to preach occasionally to congregations of Friends.

**URGES SILENCE TO HALT HUN POISON**

Florence King.

Florence King is president of the Woman's Association of Commerce of the United States. She indorses the suggestion to kill Hun propaganda by an organization of persons to refuse to listen to the "poison."

### SUDAN GRASS GIVES BIG PROFIT

ONE FARMER REPORTS THREE CUTTINGS LAST SEASON SEED PRICE HIGH

Demand Far Exceeds Supply; Acreage Comparatively Small.

Kansas has a new crop, Sudan grass, which is producing some amazing yields and profits. On the farm of Harmon Hobart, in Allen county, it gave three cuttings last season, with a total yield of 7.3 tons of hay. The part of the field that was left for seed average 781 pounds an acre. The seed of this grass is selling for \$1 a pound; the reason for this abnormal price of course is that there is a demand for the seed, which is much larger than the limited acreage of last year can supply, says Floyd B. Nichols in the Illustrated World.

Sudan grass is an annual crop, which is planted in rows usually, and cultivated two or three times during the season. When it is handled in this way it requires from two to three pounds to plant an acre. It may be cut several times for hay, or a seed crop and also a hay crop can be obtained. At the present high prices, the most profit is in the seed of course.

The astonishing drought resisting ability of Sudan grass is the main thing that gives it value.

It resists a drought much more readily than the standard crops for the drier regions, such as kafir, milo and feterita. Sudan grass is being pushed by the demonstration agents and extension men for the Kansas State Agricultural college. Lee H. Gould, the demonstrating agent for southwestern Kansas, where the rainfall is very limited said:

"There is certain to be an immense increase in the acreage of Sudan grass in this section within the next few years. We had plantings of this crop in every county district in 1914, and they all did well. The crop makes good feed, and it will produce high yields with very limited rainfall. It will do much in the coming years to add wealth to the drier sections in the western part of the United States."

Mr. Gould's opinion is the same as that of the other demonstrating agents in Kansas. There is more interest among the farmers in Sudan grass than in any other crop.

Sudan grass was imported into this country from Africa, and was grown in a small way in an experiment station in Texas. It produced good results in these station trials from the start but of course the agents of the United States department of agriculture did not put the seed out to the farmers until they were sure of their results. The seed was quite generally distributed over the country last season.

Although this crop is a valuable substitute for the Bermuda grasses, and should be introduced wherever farmers find their soil too dry for the latter, one of its characteristics should be well borne in mind before planting. This is the fact "at once given a start, it spreads with great rapidity. Each spear of grass possesses a network of tough, fibrous roots, which spread over a radius of a foot. Each fiber is segmented, and from each segment another blade of grass may spring up. In the Southern states, Johnson grass, which is similar to Sudan grass, has proved itself the most formidable pest with which cotton growers have to contend. Because of the thick root network, it is next to impossible to stop once it has got into a field.

Lots of persons are willing to let their enemies alone, but they draw the line on loving them.

The man who has a steady job need not envy the man who boasts that he is living by his wits.

A considerable measure of one's happiness depends on not knowing too much about other persons.

Many persons appear to be making contentment depend on a great many things not worth the having.

In the anxiety of some persons to do for themselves they are disposed to do others as often as possible.

It's easy to please a woman after you find out what she wants—but there's the rub.

A woman isn't satisfied if her husband's life is an open book—unless it is a checkbook.

Even if you have gained but an inch you haven't put your best foot forward in vain.

The smaller the woman the easier it is for her to twist a bad man around her finger.

If men were compelled to practice what they preach most of them would give up preaching.

A man might have some excuse for exercising the privilege of playing the fool if it affected no one but himself.

The man who never changes his opinion is hardly worth more consideration than the one who is always changing.
