

WOMAN GOSSIP.

The Financial Problem in the Marriage Relation—Why Young Men Do Not Marry.

The Effect of Hard Times on the Matrimonial Market—The Treatment of the Hair.

THE CARE OF THE HAIR.

The care of the hair, says the Boston Journal, is an important branch of fashion at all times, though often fashion dictates an injurious treatment and prescribes modes against the rules of health and reason.

THE MATRIMONIAL MARKET.

An Ohio man has compiled a table which shows very clearly the effect of hard times upon the matrimonial market, says the New York Post.

MARRIAGE AND MONEY.

Mrs. A. S. Dunaway, of the New Northside, discusses the financial relations of wives. She says: To educate a woman for independence, give her a few years of her early life in occupations where wage-earning becomes a habit, and then expect her to "marry and settle down," is a state of extreme contentment.

In pondering this subject, we can never reach but one conclusion, and it is that women must work hard and save for themselves. Married women are more to blame, on general principles, for their present financial dependence than men.

FOR THE FARMER.

Advantages of Raising Cattle on Farms Instead of on the Range and Pasture Ranges.

Suggestions for Summer Seeding of Grass and the Riddance of Weed Seeds.

BEEF PRODUCTION ON FARMS.

So much has been written during the past few years about the profits of beef production on the range and ranch that many farmers owning from a fourth to an entire section of land have come to the conclusion that they can not successfully compete with the "beef barons" in supplying the market with meat.

MUSIC AND MUSICIANS.

Music is a great and beautiful art. I am not musical myself, which has always been a great grief to me, but I have many friends, and in the course of many years of enforced association with musicians I have got to know something about the music business.

BEKIDING GRASS IN SUMMER.

When it is required to seed grass in summer, the stubble should be plowed as soon after harvest as possible, not more than four inches deep, and then harrowed down to a fine surface.

SMOKEY CHIMNEYS ON THE FARM.

In many farm-houses, as well as in those of cities, illy-constructed chimneys, or those near higher elevations and other local obstructions, cause much annoyance.

THE RAILWAY WHISTLE.

Massachusetts is leading the way in bringing about a beneficial reform—the abatement of locomotive whistling.

A CREOLIAN BARTENDER.

In a well-known restaurant in this city presides a very dashing bartender over the biblic portion of the establishment. Recently there appeared among his regular patrons a very quiet-looking, gentlemanly-looking man, who wore, however, a magnificent solitaire brilliant on one finger.

A SHORT HISTORY OF BLIND TOM.

The people of this country are familiar with Blind Tom, the musical prodigy, but all of them have not marked the wonderful incidents in his career.

SCIENTIFIC MISCELLANY.

In his latest meteorological paper, Prof. E. Loomis observes that north of thirty degrees of latitude storm tracks in all longitudes almost invariably follow an easterly course.

OPPOSED TO BATHING.

He laid down a package which he had just finished tying up, and wiped his hand on the front of his vest.

A GEORGIAN'S WONDERFUL EYE.

There is a man in America one of whose eyes is black and the other a real cat's eye.

BADLY SPOILED FORGERS.

If ears should have good memories forgers should certainly be able to spell. To embark on the profession of an utterer of forged checks if you are not quite certain of your orthography is always rash.

A RAILING PASSION STRONG TO DEATH.

What a typical story is that of the Tuponee woman brought up by the Jesuits of Paraguay, whose mother, when she lay a-dying, her confessor asked: "Now, what would you fancy—some fresh oranges, or half a chicken, or a slice of white bread such as the nobles eat?"

A HOPFUL CHINA MERCHANT.

The show windows in a store in Park place, kept by a dealer in glassware, have presented a variegated appearance of late.

PHILOSOPHY OF SAP FLOW.

The sap of most plants is taken from the soil by the power of causing osmosis which the roots possess.

THE OLD EMPEROR'S LITTLE ROMANCE.

I have a letter from Gastein, which tells a mildly romantic story of one Frauken Keon, the daughter of a manufacturer who is a habitual visitor at that resort.

THE PICKING OF THE HEAD OF A YOUNG TUPONEE BOY.

It was 720 deaths from cancer in New York City last year, and since 1874, 6,012 deaths from the same disease. The number is steadily on the increase, those of 1875 having been but 416.
