It is composed of one of the best alteratives known and is one of the best blood purifiers made. Dr. Casper has sold thousands of bottles in the last ten years. Put up in 50c and \$1 bottles. For sale only at

CASPER'S Drug Store.

Fisher's Block, Main Street, 2d Door West of Limestone, Springfield, O.

MORNING GLOBE-REPUBLIC.

The interest in today's election is intense. The announcement of the result will be awaited with great interest.

In order that the public may get the news at the earliest possible hour the GLOBE-REPUBLIC will tomorrow (Wednesday) issue a MORNING edition containing the full election returns up to 4 o'clock in the morning, the hour of going to press. We have arranged for special service from all of the counties in this congressional district; Mr. Little's district, and from Columbus, in addition to the Associated Press reports.

The greatest interest is centered in the result in this city and county, and we will be able to give the correct returns from every precinct in the city and county, and the result. The paper will be sold by newsboys, at the news stands and at our counting-room for ONE CENT single copy.

LOCAL BREVITIES.

A grand day and a glorious victory. W. M. Wigan, of Put-in-Bay, is in the city today.

It was "the little side door" in operation today.

Rev. Wm. S. Gotwald, of York, Pa., is in the city today.

E. K. McNally went to Loveland on business this morning.

John Fullerton and wife, of Greenfield, O., are in the city.

Indications point to a very heavy vote, at least in the city.

The Hungarian Gypsy students left this morning for Maryland.

A. W. Brevoort, of Columbus, is registered at the Lakonia house.

Mr. and Mrs. S. K. Smith returned last evening from their trip to Missouri.

Mr. and Mrs. R. K. Weiland left this morning for Fargo, Dakota territory.

Jonas Drury predicts clear, cooler weather, commencing tomorrow. Jonas is striking it about right.

The grand final of the republican campaign was a rouser. It was a veritable republican love feast.

The streets were crowded with people yesterday afternoon and especially last night, but the police say that the order was excellent.

The free lunch men were inebriated today. Saloons all closed. He missed his maternal tripe and his regular mouthful of "padding".

The wife of Jonas Strauberg residing now at St. Paris, died on Saturday night of typhoid fever. The funeral took place yesterday at 10 o'clock a. m.

Edward Archer a former workman in the bicycle shops, has had a severe attack of malaria fever, but is some better now and will return to work in a few days.

A dancing club of well known young people gives a very pleasant ball every alternate Friday evening, in the Lakonia house dining-room, finishing up with a supper.

Richard S. Nichols, the handsome conductor on the Pan Handle, is running the regular train in place of Conductor Doogan, who met with an accident Thursday morning in this city.

The Worthington Circle (C. L. S. C.) will celebrate Bryan's day tomorrow afternoon, Nov. 3d, at the residence of Gen. Dearborn, south Plum street, exercises being nine promptly at half-past two.

The hospital matter remains in statu quo, and the fact that council does not meet tonight will permit it to remain so. The contracts for the work cannot be let until the site is selected, because nobody is willing to bid until the character of the ground becomes known, and the distance the dirt will have to be hauled. The trustees say that unless a site can be secured by next Tuesday they will recommend the standpoint ground.

Prohibition Headquarters. The Prohib. will have their headquarters at Temperance hall, where they will receive full associated press dispatches, and have speaking and singing. They will also serve oysters and coffee from 6 p. m. to 2 a. m. the net proceeds of which will go towards the hall debt.

Station House Note. Yesterday and last night the following persons were arrested: Mike Doyle, drunk; William Donnelly, disorderly; Samuel Clayton, drunk and disorderly; Henry Moore, drunk; Henry Goble, disorderly; John Conner, drunk, and James Welsh, drunk.

Patrol Report. During the month of October the force at the patrol house made 119 arrests, 119 runs, traveled 189 miles, attended 49 accidents, and conveyed four sick persons home.

DIPHThERIA DISINFECTANT.

Methods of Disinfection Suggested by the State Board of Health.

An Important Circular Which Should be Preserved for Future Reference—Notes to be Followed for Disinfection—Pure Air, Pure Water.

A few days ago the GLOBE-REPUBLIC published extracts from a circular issued by the state board of health, on the dread disease, diphtheria. Following are the formulas for solutions to be used as disinfectants, and rules for their use:

SOLUTION No. 1.—Dissolve chloride of lime, of the best quality, in soft water, in the proportion of four ounces to the gallon.

SOLUTION No. 2.—Dissolve sulphate of iron (known also as copperas) in hot water, in the proportion of two pounds to the gallon.

RULES FOR DISINFECTION. 1. The discharges from the throat, mouth and nose are exceedingly poisonous, and should be received in a vessel containing Solution No. 1. Retain the vessel fifteen minutes, when the contents may safely be thrown into the water closet or outhouse.

2. The soiled clothing, bed linen, towels, etc., should at once, before being carried from the sick room, be placed in a boiling water and boiled for thirty minutes. If, for any reason, this cannot be done, they may be soaked in the following solution:

Solution No. 3.—Dissolve corrosive sublimate in hot water, in the proportion of two ounces to the gallon. Label poison, and keep in a wooden or earthen vessel.

Take two fluid ounces, or a half teacupful of this solution to one gallon of water, and let the articles to be disinfected be thoroughly soaked in this, remaining immersed at least two hours; they may then be wrung out and sent to the wash.

4. The body of a person who has died of diphtheria should be washed with solution No. 1 and wrapped in a sheet wet with the same. The body should be buried at once, and in no case should be exposed to view.

5. After death or recovery of the sick, the room, furniture, and other contents not to be destroyed, must be thoroughly disinfected.

6. It is best to burn all articles which have been in contact with the patient, and too valuable to destroy, may be treated as follows:

7. All articles which can be washed may be treated according to Rule 3, under Disinfection.

8. Clothing and bedding which cannot be washed may be disinfected by exposure to a heat for three or four hours. A temperature of 230 degrees Fahrenheit must be maintained during this time, and the articles freely exposed, i. e., not folded or arranged in piles or bundles.

9. The room and all articles in it, which cannot be treated by either of the above methods, must be thoroughly fumigated.

10. The contents of the room should be so arranged as to expose the greatest amount of surface to the action of the disinfectant.

11. Heavy woollen, cotton, silks, furs, stuffed bed covers and similar articles should be hung up in the room and pockets turned inside out. Pillows, mattresses, upholstered furniture, etc., should be out of the room and sent for fumigation.

12. Carpets are best fumigated on the floor. After fumigation, these articles must all be hung in the open air and thoroughly beaten and shaken.

13. To disinfect a room by fumigation, proceed as follows:

14. Close the apartment as completely as possible, stopping all openings through which the gas might escape. Thoroughly dampen the floor, walls and furniture.

15. For a room about 1000 square feet, take three pounds of sulphur burned in small fragments. For larger rooms, use a proportionately larger amount of sulphur.

16. Put into an iron pan, or other metal vessel, a quantity of sulphur, and set it on fire, supporting the pan on bricks, placed in a tub containing a few inches of water. Mix ten parts sulphur with alcohol and set on fire, being careful to breathe the fumes of the burning sulphur. When certain the sulphur is burning well, leave the room, close the door, and allow the room to be tightly closed for several hours.

17. Open all the windows and air the room for several hours. If the walls and ceiling are papered, remove the paper and burn it.

18. The floor, walls, ceiling, and walls, etc., should be thoroughly washed with a solution made by adding two pints of solution No. 3 to four gallons of water. Allow this to remain on the walls for twenty minutes, then scrub thoroughly with soap and hot water.

19. The house and premises generally should be put in the cleanest condition possible, and every means taken to secure pure air and pure drinking water.

20. The foregoing methods of disinfection are applicable in all contagious diseases.

If solution No. 1 is objectionable on account of the color of the chloride of lime, an equally efficient disinfectant, to be used in the same way, may be made by adding one pint of solution No. 3 to one gallon of water. It is necessary to leave it a longer time—at least an hour—in contact with the material to be disinfected.

Fifteen years ago the buffalo ranges of Kansas and Colorado were covered with thousands of the animals. The other day a party went out from Denver, and after a week's hunting managed to kill three from a herd of twenty-nine that they found in Lost Park. It is said that there are not more than 2,000 buffaloes now in existence. Systematic slaughter has produced this shameful result.

It will be remembered that the Hebrews used to spit out the land in Moses's time, and so we find that they found in Lost Park. It is said that there are not more than 2,000 buffaloes now in existence. Systematic slaughter has produced this shameful result.

A witness in a lawsuit in Portland, Me., was considerably shocked the other day to learn that there are places in which profane swearing is discouraged. He was testifying in regard to an overcoat of water and said: "I don't think I've ever heard of a man who would swear in a court."

They would have been in "the judge" checked the ledger for that fellow and fined the witness \$25 for contempt of court.

Australian farmers are still troubled by rabbits, which are bred there at an enormous rate. One farmer has just offered \$25,000 for a rabbit-proof wire fence to extend 200 miles.

The smallest residence in Washington is that just built by a newly married couple. It is a cottage with a frontage of six feet eight inches, and a depth of about two feet eight inches, and contains four rooms.

The chestnut gong was rung so continually in the public schools of Portland, Ore., that it became an unbearable nuisance, and any pupil who carries out or returns permanently expelled if the teachers discover it.

Bear in mind that the I. B. & W. will run elegant sleepers, chair cars and coaches through to Chicago without change on express Nov. 2d. Excurs will be good for 7 days to return, and the fare for the round trip only 85.

During the past year Danville, Va., has sold over forty million pounds of tobacco and Lynchburg near \$2,000,000 worth. The most of it was raised in the counties contiguous to these cities. The aggregated value was about \$8,000,000.

THE DERVISHES OF PERSIA.

They are a Lot of Conquerors, Sensationalists—Higher Grades.

Among the religious institutions of Persia the dervish deserves mention. From among the ranks of the noblest thinkers, teachers and poets—spring in the days of old, but this is a long past. Today the dervishes are a lot of consequence, and are a great power in Persia.

The common beggar dervish is a fellow of pronounced depravity. His appearance is loathsome. He wears rags, bearded and fully grown, and his eyes are wild and staring. He carries a long staff, the handle of which is carved so as to resemble the Persian character for "Yah Ali," and besides that he exhibits the kashkash (sawdust) habit of the dervish.

The dervish is a man of great energy and vigor, and is generally more educated than the other kind, ardent vagabonds, and worse if it be possible. They wear a clean, white, and part their hair in the middle, but smoke hank, too, and generally have women companions, the lowest of their sex, along with them.

The dervish is a man of great energy and vigor, and is generally more educated than the other kind, ardent vagabonds, and worse if it be possible. They wear a clean, white, and part their hair in the middle, but smoke hank, too, and generally have women companions, the lowest of their sex, along with them.
