TALKING IT OVER.

Informal Meeting of the Republican Central Committee Last Evening.

Notwithstanding the extreme inclemency of the weather, the regular meeting of the republican central committee at the club rooms, Buckingham building, last Tuesday evening, was handsomely attended, and much interest was manifested.

No regular routine work was transacted, and nothing was done about the primaries of the spring convention. Everybody put in his time talking with the utmost enthusiasm over the splendid prospects for a republican victory in Springfield this spring, and sentiment was a unit on the subject of going to work with a will.

MEDWAY.

Medway, Feb. 15.—There is nothing more abundant in our vicinity at present than measles. We fear that our schools will be broken up on account of so many of the children having them.

The following are on record: Albert Harnish, Baby Hershey, Maurice Storm, Bessie Storm, Harry Storm, Eddie Carr, Albert Weaver, Lizzie Harnish, Anna Harnish, Susan Harnish, John Harnish. Quite a number of others are complaining and will no doubt have an attack before the end of the week.

present writing some better. Drew Garber has been suffering from an attack of sore throat but is some better. Charles Harnish, our jolly showmaker, had an attack of neuritis of the face. Charles says it is enough to wilt any cheek. We think it has accomplished a great deal since it has made an impression on his mind. But he is equal to the emergency, and bears it nobly. On last Thursday some person forced an entrance into Mr. Hammond's store in the rear of Charlie Shartle's grocery, and got into the main room in which the groceries are kept. It is not known whether they took anything out of the store or not. They got into the rear after they got into the store.

Willie Wallace is teaching in Greene county and is getting along very nicely. We predict that Willie will make a capital instructor.

James Marshall, familiarly known as "Uncle Jimmy Marshall," an uncle of D. H. Marshall, died at the residence of his daughter, Mrs. Benoni Creswell, at Cedarville, Saturday evening, February 12, 1887, at the advanced age of 86 years. He had been a farmer, residing near Selma, this county, most of his life, and was a most estimable and highly respected citizen. He was the father of Mrs. Landaker, of South Charleston, and of William Marshall, of Cedarville. Mr. Marshall has made his home with his children for the last few years, going from one to the other at short intervals. He had only been sick a few days. The funeral occurred at Selma, Tuesday.

One night last week dogs invaded the flock of sheep of John G. Logan, between this city and Urbana. The flock numbers over 200 head. There were three sheep and three lambs killed outright, thirteen wounded so badly that they will die, fifty-four wounded and the remainder, about 150, injured from fright. John A. Baker and J. J. Mumper of Chapman county were appointed to estimate the damage and placed the amount at \$247.

The little girl who lost her pocket book at the corner of High and Limestone streets can get the same by calling on Chief of Police Walker.

Hood's Sarsaparilla is made only by C. I. Hood & Co., Apothecaries, Lowell, Mass. It is prepared with the greatest skill and care, under the directions of the men who originated it. Hence Hood's Sarsaparilla may be depended upon as strictly pure and reliable.

8417. James Nelson vs. Board of Education, etc. Why the "Royal" is the Best.

The improved method by which it has been prepared is such that it has no tartar, has had an important bearing on the manufacture of baking powder.

By the process therefore generally employed, it has been found impossible to remove all impurities, more particularly the tartrate of potassium, which remained to such an extent as to greatly impair the quality of the cream of tartar, and to interfere seriously with the strength and wholesomeness of the baking powders into which it entered.

In the new process, which is owned by the Royal Baking Powder Company, of New York, and exclusively employed in its extensive tartar works, the imported crude tartar is so treated as to remove all vestige of tartrate of lime or other impurities, giving a product of unknown purity—a chemically pure cream of tartar.

By the employment of these superior facilities of the Royal Baking Powder Company has made the Royal Baking Powder, as the chemists all certify, of the highest possible degree of strength, "absolutely pure" and wholesome, and with an always uniform levenging power. It is for these reasons that the "Royal" never fails to produce bread, biscuit, cakes, etc., that are light and wholesome, and whose retention of the eating of which never followed by indigestion, or any of those physical discomforts attendant upon the partaking of impurely prepared food. In rendering possible the production of a baking powder possessed of these qualifications, the improved method of refining cream of tartar becomes at once a matter of material importance of the culinary world.

W. C. T. U. Meeting. The W. C. T. U. of Clark county will hold their convention in Temperance hall, Thursday, February 17, sessions opening promptly at 10 a. m. and 2 p. m. An interesting programme has been prepared. The public cordially invited.

By order of committee, Mrs. M. W. BAXTER, Mrs. J. A. DENWIDDE, Miss S. E. CAVILLE.

From Ex-Senator Al. Daggett. The Hon. Albert Daggett, writing from the Senate Chamber, Albany, New York, says:

I have used ALCOCK'S PINKETTS' PLASTER for the past ten years with marked results. I have found them especially effective when applied and worn out from weeks of incessant labor in political campaigns; the application of them to my chest and spine gave me great relief when my voice had become hoarse and worn down from speaking in the open air. They seemed to act as a tonic to the whole system, curing the soreness consequent from over-exertion and restoring the tone of the system more readily than any remedy I have ever found. I have also used them for rheumatism with beneficial results.

DYEING.

Ladies will please have their dyeing done here—their wash fabrics, at the Springfield steam dye works, Center street.

"DIRT rots the fibre and invites the moth." To cleanse and purify blankets thoroughly, wash them with IVORY SOAP. Professor Cornwall, of Princeton College, says the IVORY SOAP is an excellent Laundry Soap, of great purity and more than average cleansing power.

A WORD OF WARNING.

There are many white soaps, each represented to be "just as good as the Ivory," they ARE NOT, but like all counterfeits, lack the peculiar and remarkable qualities of the genuine. Ask for "Ivory" Soap and insist upon getting it.

Great Sale of Land at Rock Bottom Prices.

We, the undersigned trustees of Geo. Kions, being duly authorized by a deed of trust executed to us by Geo. Kions and Melinda Kions, his wife, of the county of Madison, township of Range, in the State of Ohio, and described as follows: viz. The land of the creditors of the said Kions, have received two parcels of real estate, in the State of Ohio, hereinafter described. To be sold at private sale, in parcels or as a whole, to suit purchasers; the proceeds to be applied in the payment of debts to the aforesaid creditor in their priority.

Tract No. 1 consists of about Six Hundred (600) acres, located about 12 miles east of London, the county seat of Madison county, Ohio, and about 6 miles west of Mt. Sterling, O., a live town on the Midland Railroad, and surrounded on three sides by free trunks. This is a very fertile piece of land, suitable for grazing and farming, or both; well watered; will divide into six farms running to free trunks, and all having good water, and near school houses. This land has nearly all been cultivated, and is in a good state of cultivation, and well drained with the buildings fair, with a railroad building near the farm, with station on the corner of the farm. This is a rare opportunity for parties wanting good homes in one of the best and most fertile counties in Ohio, or for anyone wanting a large farm for grain or stock raising, or both.

Tract No. 2 is situated in Clark county, Ohio, between the City of Springfield and South Charleston, about 3 miles from Clark station and 7 miles from Springfield, containing 162 1/2-100 acres of land, known as the Bennett farm, and formerly owned by Leonard Sprague. This is a good farm, all in grass. There could be 100 acres of soil ground put in corn this spring; timber enough on the farm for its own use, within three or four hundred yards of a good school-house; ordinary dwelling-house within 2 miles of railroad station.

The improved method by which it has been prepared is such that it has no tartar, has had an important bearing on the manufacture of baking powder.

By the process therefore generally employed, it has been found impossible to remove all impurities, more particularly the tartrate of potassium, which remained to such an extent as to greatly impair the quality of the cream of tartar, and to interfere seriously with the strength and wholesomeness of the baking powders into which it entered.
