CAUGHT ON THE FLY.

An Interesting and Matter of Fact Communication.

The all-absorbing topic agitating the residents of this, the largest, town in the county, is the prospective electric railway. It is certainly a very interesting argument, now that it is practically settled, that we are indebted to council's kind consideration and considerable persuasion on the part of a number of our earnest and hard-working-for-the-town's-future-benefit citizens for the brilliant future that is foreshadowed by the proposed connection of the surrounding mining towns with Shenandoah.

The gentlemen, particularly the town members, who have been instrumental in securing the railway charter, have been the subjects of many animated street-corner debates and remarks of not a very complimentary order have been overheard by the writer concerning them.

You may call the gentlemen referred to lobbyists, political wire-pullers and self-interested, if you will, but there is one fact I will call your attention to, in the future records of the town's history their names will receive just and prominent mention for their far-sightedness and shrewdness.

Supposing they have benefited themselves by the railway undertaking, is it not a profitable and acceptable improvement for the town? And did they not give the moneyed men of this and other towns ample opportunity to secure stock in the enterprise? But the people with the advantage within reach turned a deaf ear to the call. Why? Because the holders of the charter were not as wealthy as some deemed necessary, or because they might ask for a certain amount of stock in return for the time and labor they expended in securing the charter.

In the estimation of some they were nothing but adventurers, endeavoring to enrich themselves under cover of the charter and at the expense of these would-be capitalists, themselves disguised as promoters of home enterprises when, in reality, they were nothing more than dandies, who have wasted opportunities and are now squandering and attempting, by foolish arguments, to delay a profitable improvement to the town.

The other evening I happened to be within hearing distance of a number of citizens who were discussing the privilege granted the electric railway by council, with the provision that they were to lay flat rails. "Well," remarked one of the group, who is known as a noted glib-edged speculator and one who ridiculed the railway idea when the opportunity to secure stock presented itself to him, and who is now embittered by the prospects of outside capitalists controlling the franchise, "it is about time that we sit on these half-don political manipulators and self-styled representatives of Shenandoah. They are endeavoring to have the Borough Council erase 'flat' and insert 'T' rail. There is the technicality upon which we can base an argument with our friends in council and prevent any suggestion of amendment recommended by them to council relating to the right of way. We should embarrass as much as possible these schemers. I, for one, will bring all the influence I possibly can to bear on my friends in council to insist on the original agreement, including flat rails."

Another prominent business man, on being questioned the other evening as to his opinion of the "T" rail being used, replied that he was opposed to it as it is injurious to vehicles. On being told that the rail is being used on the streets of some of the largest towns and cities in the state he expressed about the statement and added, "I have traveled as much as anybody and I never saw them." He further added that it didn't make any difference, anyway, that he was going to fight the rail, no matter who used it. Continuing he said, "I am aware that the railway will benefit my business, and as I am one of the largest real estate owners in the town, it will certainly benefit me by increasing the value of my property, but do you suppose I am going to have my wagons ruined and

keep a wheelwright constantly employed repairing them, owing to driving over "T" rails. No, sir!"

"And not draw any dividends" was the appropriate remark of a listener. Councilmen, do your duty! Remember your deeds will live after you. Would you go on record as voting to delay a much-needed improvement to the town?

When the constructors are willing to remove the cause of the present objections, if required to do so at the end of six months, do not be influenced by men with absurd prejudices who, to get even for some petty or imaginable injury, would attempt to poison your minds and interfere with your good judgment, even when the welfare of the town is at stake; and who, if successful in having you refuse this reasonable request, would exult in their triumph over your weakness and in future years, when approbrious epithets would be hurled by an injured public against your past administration and abilities as town officials, they will not stand up and proclaim to your accusers and the people that they were your advisors and counselors in the attempt to embarrass a prospective enterprise essential to the town's future prosperity.

ANTIQUE can be tolerated in almost any thing but hats. If the head is out of date the rest of the body is pretty sure to follow suit. Nobody but a millionaire or a genius can afford to wear ancient headgear, and even they take a good many chances when they do it. It will cost you no more to be up with the times than it will to be half a mile behind them. Everything about our \$1.50 hat is handsome but the price, and \$1.50 for such a hat can scarcely be called anything but a ridiculously low figure. The same can be said of our 25c neckwear. Our line of gents' furnishing goods is the lowest priced in the market.
