

THOMAS E. WATSON.

Populist Leader Wants to Head Georgia's Democratic Delegation.

Atlanta, Ga., May 30.—Thomas E. Watson, the former Populist leader and candidate for president, went into the Georgia state Democratic convention here with the determination to head the delegation to Baltimore.

AUTHOR DAVIS AGAIN SUED.

Suit Filed in Chicago Charges Him With Desertion.

Chicago, May 30.—Mrs. Cecil Clark Davis again instituted suit for divorce from Richard Harding Davis in the superior court. She alleges desertion, but at the home of her father, Johnson M. Clark, refused to add anything to the statement in her formal complaint.

In this complaint Mrs. Davis recites that she was married to the defendant at Marlton, Mass., on May 4, 1899, and that "until the early part of the year 1909 she lived with him as a true, dutiful and kind wife." She adds that on May 1, 1910, he "willfully deserted her and absented himself without reasonable cause for the space of two years."

Mrs. Davis returned to Chicago but a short time ago, preparatory, as it now appears, to bringing this action. She declared in reply to all questions, however, that she had come back to devote herself to illustrating, in which she had won some distinction before her marriage even.

BACK YARD LIFE FOR LEPER.

Permitted to Reside at Home, but Cannot Go on Street.

Bay City, Mich., May 30.—Dr. A. S. Warthin of the University of Michigan and Dr. R. L. Dixon, secretary of the state board of health, have made a personal examination of Herman Hirschfeld, the suspected leper who recently was brought from Centerville, Ia., to his home here. The physicians confirmed his disease as typical leprosy.

It has been decided by the local health authorities to permit the man to remain in his own home. He is to build a porch on the back of his house and fix up his back yard as he sees fit. He will be allowed to spend his time out of doors there, but will be required to keep off the front porch and will not be allowed on the street.

MAKES WORLDWIDE HUNT.

Father Renews Search for Harvard Student Who Vanished in 1907.

The search for Albion Davis Pike of Lubec, Me., who disappeared from Cambridge on March 15, 1907, while he was studying as a junior at Harvard, has been renewed vigorously. The young man's dropping from sight as so preyed on the mind of his father that he has become almost a nervous wreck. He has now caused a quarter of a million circulars to be distributed throughout the civilized world, all bearing the picture and an accurate description of the missing student.

30,041,328 Sovereigns Coined. Sovereigns to the number of 30,041,328 were coined by the British mint last year, an increase of approximately \$800,000 over the year previous.

Oh, justice claims some large amounts of money as its due, still running up expense accounts while turning down a clew! —Washington Star.

"But come now, senator, why did our election cost so much more than the average cost?" "Simply because my pile was so much bigger than the average pile." —leveland Plain Dealer.

He sleeping car porter will polish your shoes. Tip as you leave him he cannot refuse. He lives on the largess he gets from his load and acts like the president of the railroad. —Buffalo Express.

"What makes do way of do trans-essor particlar hard," said Uncle Ben, "is dat it looks so easy." —Washington Star.

I love the oyster, though at meals I do not eat my fill. But it cannot be trained like seals To act in vaudeville.

Interesting Experiment To Be Made by the Army

Provisional Regiment Will Have All Units of an Actual Campaign.

THE United States army is organizing a provisional regiment along entirely new lines, equipped with new accoutrements, and sending it into the field for nearly three months for practical demonstration and experiment.

Captain Alfred W. Bjornstad of the Twenty-eighth Infantry and member of the general staff thought out the details, which Major General Leonard Wood, chief of staff, and the heads of the Army War college thought so good when presented to them in draft form that they directed him to work them out. The plan involves the organization of an efficient brigade, and its equipment and instruction along more extensive lines than ever before attempted in the army.

In the Spanish-American war the infantry regiment consisted of twelve companies armed with rifle and bayonet, a small detachment of hospital corps men, a chaplain, a doctor and sometimes a band. Since then the army, and particularly the infantry arm, the most important, has undergone many changes. The latest change of consequence was about 1906. It increased the units of a regiment of infantry considerably. The new plan increases these units to an even greater number, making it strong enough to carry on, without aid from artillery or cavalry, quite an extended campaign.

The provisional regiment organized by Captain Bjornstad and now in course of assembling consists of a colonel, a lieutenant colonel, an adjutant, a quartermaster, a commissary, a chaplain, a surgeon and twelve companies of 150 men and three officers each, divided into three battalions, at the head of each of which is a major. Under each major are a battalion adjutant, quartermaster and commissary, a combat train, a battalion sergeant major, two wagoners for combat train and two mounted orderlies.

Directly under the colonel and separate from the rest of the organization are a train sergeant, a trumpeter sergeant, two mounted orderlies (noncommissioned officers), six mounted orderlies (privates), eighteen wagoners for field train, two wagoners for combat train, two horsehoes, a farrier and a saddler.

Composition of New Regiment.

The new regiment, taken as a whole, is composed of these units:

Table with columns: Units, Officers, Enlisted men. Rows include Regimental headquarters, Band, Headquarters detachment, Machine gun company, Mounted scouts, Personnel, Three battalions, Twelve companies, Total.

It will be seen that this regiment is equipped with a mounted detachment, which virtually is a detachment of cavalry. The work of this mounted detachment is scouting, which is about all that cavalry is now used for in any army.

The machine gun detachment or company means field artillery.

In addition to these units the regiment is equipped with a sanitary detachment and a field hospital. In battle the two combined would bury the dead.

This provisional regiment is assembling at Dubuque, Ia. It is comprised of Companies A, B, C and D of the Twenty-eighth Infantry, now at Fort Snelling, in Minnesota; Companies E, F and G of the Fourth Infantry, now at Fort Crook, in Nebraska; Company H of the Twenty-sixth Infantry, now at Fort Brady, in Michigan, and Companies I, K, L and M of the Twenty-seventh Infantry, now at Fort Sheridan, in Illinois. Each will have a captain, a first lieutenant, a second lieutenant, a first sergeant, a quartermaster's sergeant, six sergeants, sixteen corporals, three cooks, two musicians, an artificer and 120 privates. The total will be 54 officers and 1,955 men.

Purposes of the Plan.

Captain Bjornstad's idea was to place under command of one colonel and into one organization what heretofore has been under several officers and many organizations. It will not be necessary to send cavalry with such

TO REPRODUCE ANIMAL LIFE.

Freshman at Trinity College Makes Successful Experiment.

Announcement was made at Trinity college that Lewis Bradford Ripley of Glastonbury, Conn., seventeen years old and a freshman, has completed successful experiments in the reproduction of animal life, with only one sex involved.

The student has accomplished what scientists have been striving after for years by the use of sulphuric acid in connection with the eggs of the moth and has hatched caterpillars.

Professors of the scientific department have examined Mr. Ripley's experiments and approve of his conclusions, which will be embodied in a pamphlet to be issued soon and sent to the leading universities of the world.

Practice March of 300 Miles to Sparta, Wis., Mobilization Rendezvous.

a regiment, the mounted detachment serving as such. Neither will it be necessary to send a field battery, the machine gun department answering the purpose.

Captain Bjornstad said the purposes of his plan were:

To determine the correct organization of an infantry regiment and the component parts or units.

To determine what is necessary in equipment, including arms, kits, transportation and the correct infantry equipment manual.

To test certain proposed articles of equipment which will be furnished after the initial equipment.

To test every provision of the infantry drill regulations and to recommend such changes as the experiment might suggest.

To give officers and noncommissioned officers instruction in combat firing and to procure data and suggestions that will be of value in prescribing training in infantry fire.

To further carry out his plan Captain Bjornstad has arranged for a practice march of over 300 miles, at the conclusion of which the regiment will engage in maneuvers at the regular army and national guard mobilization and maneuvers at Sparta, Wis.

Start on June 4.

The regiment, it is expected, will be fully organized and ready for departure on its long "hike" by June 4. On June 5 the regiment is scheduled to begin its march overland to Sparta, traversing parts of Iowa, Missouri, Illinois and Wisconsin. It is scheduled to arrive at Sparta on or about July 10. From then until the middle of August it will engage in maneuvers with the regular army from the central division and the national guard of the states of Michigan, Indiana, Illinois, Wisconsin, Minnesota, North Dakota, Iowa, Missouri, Kansas, Nebraska, South Dakota and Wyoming. The maneuvers will consist of regular camp duty, a mimic battle, scouting duty and the study of war.

The regiment will carry with it a full supply of quartermaster's and commissary and medical supplies. The troops will live on field rations, everything being cooked on the "hike." That means that the regiment will carry with it the same material and supplies it would in actual warfare, except that there will be only blank ammunition.

Colonel Robert N. Getty of the Twenty-seventh Infantry will be in command of the regiment. He will have as his commissioned personnel the officers of the first battalion of the Twenty-eighth Infantry, the second battalion of the Fourth Infantry and the third battalion of his own regiment.

The mounted detachment will consist of one officer and fifteen men.

The machine gun company will consist of three platoons, two guns to the platoon, three officers and sixty-six men.

Officers Will Go Along.

The sanitary detachment will consist of three medical officers (a major, a captain and a first lieutenant) and eighteen enlisted men, three of whom will be ambulance drivers.

The regimental hospital will consist of two wagons, one officer and fifteen men.

In addition to the band the regiment will have twelve trumpeters equipped with the new style trumpet and twelve musicians equipped with drums. While in camp it will be the duty of the trumpeters and drummers who are attached to the twelve companies, two to the company, to do duty with the band.

Accompanying the regiment on the march and in camp at Sparta for observation and instruction will be these officers, who will make a report to the chief of staff: Lieutenant Colonel J. F. Morrison of the Twenty-first Infantry, Major S. A. Colman of the Twenty-sixth Infantry, Major W. R. Dashiell of the Twenty-seventh Infantry, Major Edmund Wittenmyer of the Twenty-seventh Infantry, Major D. B. Devore of the general staff, Captain A. W. Bjornstad of the general staff, Captain J. T. Moore of the general staff, Captain H. B. Fiske of the Twenty-eighth Infantry, Captain W. J. Lutz of the Twenty-eighth Infantry.

SAVES CONFEDERATE MONEY.

Big Stock in United States Treasury Will Be Sent to Various Libraries.

Confederate currency seized by the Union army during the civil war and which has been stored in the archives of the treasury department for nearly fifty years will be distributed by Secretary MacVeagh to libraries—state, public and university—the country over to be preserved as historic relics.

Assistant Secretary of the Treasury Andrew communicated the treasury's proposition to the most important and representative libraries in each state of the Union. The supply is not sufficient to send to every library.

The vaults of the treasury hold a big stock of the currency. The notes came into the possession of the Union army about the close of the war and were turned over to the treasury in 1867.

THE POLITICAL CAMPAIGN OF 1912

Republicans, Democrats, Independents—WILL FIND—The New York Sun

the best means of keeping in touch with all that's worth knowing during the campaign. For many years THE NEW YORK SUN has exerted tremendous influence in developing the highest standards for National politics. Its efforts have been to serve the people, to uphold the traditions of representative government and to assist in the election of men best fitted to perform the duties of their offices.

THE NEW YORK SUN wants every one interested in the country's welfare to subscribe for it and become a regular reader during the 1912 Campaign. We ask that you interest your friends, for every right-thinking citizen will be enlightened and benefited by reading the political articles and reports which will be most complete in THE NEW YORK SUN.

A SPECIAL RATE.

A Special Campaign rate of \$2.50 for seven months—May 1st to Nov. 30—is offered to readers of this newspaper. The regular subscription price is \$6.00 per year.

Don't Miss This Opportunity.

Remember no other newspaper covers the campaign as thoroughly as THE NEW YORK SUN.

Send in your Subscription Now. Address The Sun, Circulation Department, Sun Building, New York.

HORSES

Wait for another consignment to arrive in Honesdale from Iowa the early part of June. It will consist of

DRAUGHT HORSES and MARES and FARM MARES

All horses will come directly from the farm and I will see all horses working in harness before purchasing.

Horses will be sold as represented

Watch this space for arrival of consignment.

GET THESE Money-making Secrets WITH Farm Journal

For \$1.00 you can get now not only the FARM JOURNAL for FOUR full years, but also your choice of any one of the famous booklets, "Money-making Secrets," which other people have bought by the HUNDRED THOUSAND.

Just note what the information given in one of these booklets, "The Million Egg-Farm," did for Robert Liddle, a clerk of Scranton, Pa.

In May, 1910, Robert bought 2300 day-old chicks. He spent just one week studying the methods now given in this book,—his only preparation for the business. Result—this "greenhorn" raised 95 per cent. of all his chicks, and 1350 of them were pullets. "Poultry Secrets" tells you this secret. In less than seven months he was getting 425 eggs daily, and selling them at 58 cents a dozen. His feed cost averaged \$4.00 a day, leaving him OVER \$17.00 A DAY PROFIT,—and this before all his pullets had begun laying. Isn't "Money-making Secrets" a good name for such booklets? Read what people say of the other booklets, and of the FARM JOURNAL itself:—

"I find your Egg-Book worth untold dollars," says ROY CHANEY, Illinois. "What it tells would take a beginner years to learn."

"I am much pleased with the Butter Book," writes F. J. DICKSON, Illinois, "and would like to know how I could secure 500 copies, one for each patron of our creamery."

"Duck Dollars is the best book I ever had on duck-raising," says F. M. WATSON, Pennsylvania.

"If your other booklets contain as much valuable information as the Egg-Book, I would consider them cheap at double the price," says F. W. MANSFIELD, New York.

T. F. MCCREA, a missionary in China, writes, "I found Garden Yield a great help in my garden this summer. I lost my health in the great famine, trying to save the starving Chinese, and I am trying to get it back by getting near to the soil. After a long tussle with the Chinese language and mission problems, it is a great treat to get out with the vegetables, trees, chickens, etc. I am saving money and regaining my health. My wife and I both find FARM Journal indispensable."

"The FARM JOURNAL beats them all," writes T. H. POTTER, Pennsylvania. "Every issue has reminders and ideas worth a year's subscription."

"One year I took another agricultural paper," says N. M. GLADWIN, Washington, "and it took a whole column to tell what FARM JOURNAL tells in one paragraph."

"I was very largely helped by your garden page," writes Mrs. JOE LAWRENCE, Saskatchewan. "I was never successful in growing cabbage until last summer, when I tried the FARM JOURNAL way. Now I have more than I need to use."

"FARM JOURNAL was a regular visitor at my boyhood home," writes Dr. WILLIAM DAVIS, New Jersey. "When the first copy came, it carried me back ten years, and I felt a boy again. I shall never be without it again—I want home to seem like home. When it arrives, I feel the gladness jump right into me. I begin on the first page and read to my wife until half-past ten, and all through the month I drink of its cream. You must work hard to keep it so rich."

"FARM JOURNAL is good for the man behind the counter, as well as the man in the field," says J. I. STUART, a Virginia bank clerk.

"If I could get as good interest on every dollar as I get from the FARM JOURNAL, I would soon be a millionaire," says A. W. WITZEL, Pennsylvania.

Farm Journal FOUR full years, with any one of the booklets,

"MONEY-MAKING SECRETS."

These booklets are 6 by 9 inches, all profusely illustrated.

POULTRY SECRETS is a great collection of discoveries and methods of successful poultrymen, long jealously guarded. It gives Felch's famous mating chart, the Curtis method of getting one-half more pullets than cockerels, Boyer's method of insuring fertility, with priceless secrets of mating, breeding, feed and feeding, how to produce winter eggs, etc.

HORSE SECRETS exposes all the methods of "hushpuppy," "plugging," cocaine and gasoline doping, and other tricks of "cups" and "sunders," and enables any one to tell an unsound horse. It also gives many valuable training, feeding, breeding and veterinary secrets.

The MILLION EGG-FARM gives the methods by which J. M. Foster makes over \$18,000 a year, mainly from eggs. All backyard chicken-raisers should learn about the "Rancocas Unit," and how Foster FEEDS his hens to make them produce such quantities of eggs, especially in winter.

STRAWBERRY SECRETS tells how you can have the finest fall-bearing strawberries almost until snow flies. It gives you the fruits of ten years' work and study of experts in this new industry. It reveals the secrets of fertilizing and blossom-removing to produce berries in the fall, tells inside facts about varieties, how to get three crops in two years, how one grower gets 30,000 quarts an acre and nets 25 cents a quart, etc.

CORN SECRETS, the great NEW hand-book of Prof. Holden, the "Corn King," tells how to get ten to twenty bushels more per acre of corn rich in protein and the best stock-feeding elements. Pictures make every process plain.

THE "BUTTER BOOK" tells of seven cows that produced half a ton of butter each per year (140 pounds is the average). An eye-opener for dairymen. Get it, weed out your poor cows, and turn good ones into record-breakers.

GARDEN GOLD shows how to make your backyard supply fresh vegetables and fruit, how to cut down your grocery bills, keep a better table, and get cash for your surplus. It tells how to plant, cultivate, harvest and market.

DUCK DOLLARS tells how the great Weber duck-farm near Boston makes every year 50 cents each on four poor cows, and turn good ones into record-breakers.

TURKEY SECRETS, the latest authority on turkey-raising, discloses fully the methods of Horace Vose, the famous Rhode Island "turkey-man," who supplies the wonderful Thanksgiving turkeys for the White House. It tells how to mate, to set eggs, to hatch, to feed and care for the young, to prevent sickness, to fatten, and how to make a turkey-ranch PAY.
