Globe Real Estate Office

F. L. TOOMBS, Manager

We buy large areas and subdivide same into good size residence lots. Note the advantage to our customers. First cost of lots is less than half what it would be if we were to buy a few lots at a time. Again, we survey the entire tract at once. Then, if there are any defects in titles, the work necessary to perfect title to one lot will cover one hundred lots.

That is the reason we sell choice lots properly surveyed with clear titles at 50 to 70 per cent of prices currently paid for the same class of ground

We also furnish abstracts; you are never safe without an abstract. With a complete transcript of the county records we are able to furnish our customers with complete information regarding any property in the county.

JUR VERY BEST HOT BLAST

is the strongest and best hot blast stove made. It is a really wonderful heater (will hold fire 30 hours with half a pair of soft coal). It will burn ANYTHING—so coal is too cheap or poor for it.

Hot Blast Stove
The gas is heated and burned so that less coal is used and more heat is obtained. This is accomplished by means of the Hot Blast Stove, which takes in fresh air at the top of the stove, heats it to more than 500 degrees and forces it through the burning coal. The gas is then cooled and the heat is absorbed by the water in the boiler. This Hot Blast Stove will burn less hard coal than a base burner, to heat the same room. It gives off a uniform heat and is absolutely safe. Don't worry about the price of hard coal. This Hot Blast Stove solves the problem. Look it over and see for yourself. It is made better and heavier in every way than any other similar stove sold. See it before you buy.

The Hot Blast Stove

will pay for itself in one season by saving fuel
