

HIGH OFFICIAL OF S. P. IN GLOBE

J. K. Kruttschnitt, Director of Operations of the Harriman Lines, Visits City.

COL. RANDOLPH TALKS ON SAN CARLOS EXTENSION

Work Will Begin This Fall and Will Probably Be Completed Within Year from the Date of Beginning Work.

Julius K. Kruttschnitt, one of the principal officials of the Harriman system, was a visitor in Globe for a short time last evening. He is the director of operations and maintenance of ways for the entire system and arrived in Globe on a special from Bowie at 5:30 o'clock. In the party were Colonel E. Randolph, president of the Harriman lines in Arizona and Mexico; Superintendent Averill of the Tucson division; and Assistant Superintendent Washington of the same division. Superintendent C. C. Mallard of the Gila Valley, Globe & Northern, went to Bowie yesterday morning to meet the party and returned with them as far as the junction last evening. Mr. Mallard worked as a rodmaster for Mr. Kruttschnitt in the early days of the latter's noteworthy career, which began in the south.

The party traveled in a special consisting of the private cars of Messrs. Kruttschnitt, Randolph and Averill, and upon their arrival here two of the cars were left at the depot, while the other took the party to the Old Dominion smelter for an inspection of the reduction plant and other surface workings of the company. On their return the visitors were taken over the city by Superintendent Mallard and shown the various points of interest.

The special left Globe at 7:10 for Bowie, where Mr. Kruttschnitt's car was attached to the first eastbound train. The other members of the party returned to Tucson.

Mr. Kruttschnitt stated that no especial significance could be attached to his visit over the Gila Valley road, as he is just completing a tour of all the lines of the Harriman system. He expressed much satisfaction at the manner in which the Gila Valley road has been practically reconstructed and at the rapid advancement that was evident both in Globe and the Gila Valley.

Randolph Gives Interview
Colonel Randolph was asked by a Silver Belt representative for information concerning the extension of the Phoenix & Eastern from Winkelman to connect with the Gila Valley road at San Carlos.

"It is a certainty that the connection will be made," said Harriman's representative in this section, "but the report that we have already advertised for contracts to complete the line is untrue. This business, however, is first on the list and work will be started in a very short time. A quarter of a million has already been expended on it. If our plans work out as prepared, actual work of construction will begin this fall and I do not think it will take over a year, or at most fifteen months, to complete it. By the first of 1909, I believe that trains between the east and the coast will be running on what is now the Gila Valley road between Bowie and San Carlos, and Globe will not be nearly so far away from the main line as it now is.

"The work of reconstructing the Gila Valley line, which is practically completed, has given this road a truckage

which is as good as any on the main line, which was intended, as the greater part of it will be a section of the main line of the Southern Pacific."

DAVIS PRELIMINARY TO BE HELD ON SATURDAY

The preliminary hearing of Charles Davis on the charge of having killed William H. Koeny, which was to have been held today, has been postponed until Saturday morning at 10 o'clock. Davis was held blameless by the coroner's jury, but at his own request was arrested on a murder charge so that his case might eventually go to the grand jury and be disposed of by that body.

SLIGHT WASHOUTS ON GILA VALLEY ROAD

The heavy rain Tuesday night caused two slight washouts on the Gila Valley road west of Geronimo, but the damage was soon repaired and the train from Globe yesterday morning was only twenty minutes late into Bowie. The track is still soft in some places, but not enough to cause any serious delay to traffic. The rain was general over the entire line and there was a heavy fall as far south as Solomonville.

BLACK HAWK TO HAVE NEW SHAFT

Work Already Started on New Three-compartment Shaft on Eureka Claim

Another large shaft will soon be going down in the Globe district. Work has been commenced clearing away the ground for the new three-compartment shaft for the Black Hawk mine of the Arizona Commercial, a project which has been for a long time considered by the management of the company. Several days ago Superintendent Snell received word from President Amster to start the work and he is following instructions.

The new shaft will be located on the Eureka claim, the claim adjoining the Black Hawk on the west, and the location chosen for the shaft is about 750 feet west of the present Black Hawk shaft. It is about fifty feet from the Arizona Commercial railroad and grading for a spur has already begun. The hoisting machinery has not as yet been ordered, but specifications have been sent to the large machinery houses.

The present incline shaft at the Black Hawk is wholly inadequate as the hoisting capacity is limited to such an extent that the maximum production of ore is restricted to narrow dimensions. It has long been the intention of the company to sink a large working shaft, as the present one was merely intended as a prospect and development shaft.

It has been estimated that the new shaft will cut the Black Hawk vein at a depth of 500 feet, as it dips sharply to the west. Mining men who are familiar with that section of the district believe that the Black Hawk is destined to become one of the greatest producers in the Globe district.

Another Hunting Party
Another hunting party leaves for the White mountains this morning. The party will consist of F. E. Conboy, manager of the Palace pharmacy; Dr. J. L. Wales, F. E. Wales, Mr. Wales Sr. and Arden Phillips, and they will go to the mountains by way of Roosevelt. "Tonto Doc" will act as guide for the party and they expect to be absent a month.

After being given away at the altar many a bride discovers that she has been sold.

It is fortunate for the average man that he doesn't have to pay cash for the advice his wife hands him.

PRESCOTT PAPER MAKES BOLD TALK

Tell Western Union that Office Will Be Destroyed Unless the News Is Furnished.

TELEGRAPH COMPANY ASKS PROTECTION

Editor Says Union Men Would Tear Up Things Unless Paper Got Associated Press Report—Company Defiant.

An interesting result of the telegraphers' strike is contained in the following dispatch with a subsequent note from the Phoenix Republican:

LOS ANGELES, Cal., August 18.—Serious trouble is threatened because of the Western Union telegraph operators at Prescott, Ariz. Because of the failure of the telegraph company to transmit Associated Press reports, physical violence has been threatened the company's property and Superintendent F. H. Lamb of this division has appealed to Governor Kibbey of Arizona to protect the company's interests at Prescott. The governor replied that he had been assured that there would be no violence used in the strike.

The Western Union office at Prescott is closed, two of the operators having struck in response to the order of President Small, the third, the manager of the office, being ill and unable to attend to his duties. The Journal Miner, an Associated Press paper at Prescott, following the closing of the telegraph office at Prescott, wired the correspondent of the Associated Press at Los Angeles as follows:

"Have secured operator to take press stuff exclusively. Wire us immediately if you can furnish service. Arrange with Lamb."

The correspondent replied that it would be furnished if the Western Union could transmit it. Superintendent Lamb wired the Journal Miner as follows:

"Associated Press has shown me your message. We cannot permit the arrangement you suggest."

It was Superintendent Lamb's contention that he could not agree to serve one person to the exclusion of the public in general. To Lamb's message the Journal Miner then replied:

"Your reply declining to send press matter has been bulletined. This is a strong union camp and union labor men threaten to wreck your office unless you supply Associated Press service as they are greatly interested in the strike. Would advise you to do it and save trouble for both of us. Have loop to our office and we have our own operator."

Immediately upon receipt of the message Superintendent Lamb wired Governor Kibbey at Phoenix asking protection for the company's property. The message to the governor was as follows:

"I respectfully state that we propose to reopen our office at Prescott when we are ready to do so and in the meantime the Western Union Telegraph company is entitled to the full protection of the law in its property and the persons of its employees and the lawful and peaceable pursuit of its business. The reply of the Journal Miner was either sent to intimidate me into complying with his request or there is danger of serious damage to the company's property. On account of the impossibility of communicating with the sheriff of Yavapai county by telegraph and with the belief that danger to the company's property is imminent, I respectfully call upon you as the chief executive of the territory of Arizona to exercise your authority to prevent the threatened violence."

Governor Kibbey's answer, received today, read:

"I have communicated with Prescott and have been assured that you need apprehend no violence to your office there. I will keep advised."

The Western Union now has no communication whatever with Prescott. Because of the interference of railroad operators along the line of the Santa Fe, Prescott & Phoenix railroad no message of any sort can be transmitted. Three railroad operators have been discharged in this section for interference with Western Union business. The railroad company on whose line was interference and these discharges occurred, declines to allow any particulars to be printed concerning it.

The Associated Press last night wired the Republican for particulars of the trouble at Prescott. It was learned that there was none and that no one had heard that any had been threatened. Governor Kibbey as according to the foregoing had taken immediate steps to ascertain if there was any ground for the Journal Miner's representation of the situation. Late in the evening the governor received a telephone message from Attorney General Clark saying that he had been unable to learn of any threats against the property of the Western Union.

GOOD PROGRESS MADE ON BRIDGE OVER GILA
It is expected that the new steel bridge over the Gila river at San Carlos will be completed some time in October, according to Engineer P. Jones, who has

charge of the construction. Day and night shifts are at work and good headway is being made in the construction of the piers in both the Gila and San Carlos rivers. Four of the seven concrete piers in the Gila and the abutments are completed and work is being pushed on the remaining three. The five steel cylindrical piers in the channel of the San Carlos river are about done.

NO ASSOCIATED PRESS REPORT THIS MORNING

Three times since the telegraphers' strike started the Silver Belt has been issued without a line of Associated Press news and this morning is one of the three. But few messages were handled at the local Western Union office yesterday and last evening the wire was down entirely. Manager Reynolds yesterday received word from Superintendent R. H. Lamb to accept no messages except when the sender was willing to take chances on their being "accepted subject to indefinite delay." Reports from other territorial cities indicate that conditions are similar to those in Globe, although they have better wire facilities.

MINER MUST FACE A SERIOUS CHARGE

Held for Attempting to Assault Young Girl with Revolver at Gibson Camp

John L. Gilbert, a miner employed at the Gibson mine, is in the county jail with a serious charge preferred against him. He is accused of having attempted to make a vicious assault on Hazel Hamilton, a 16-year-old girl living at the Gibson camp, with a six-shooter, but the girl managed to evade him before he could strike her. Just what prompted the attempted assault is not known to the officers.

Gilbert was placed under arrest Saturday evening by Bob Henderson, the deputy sheriff at the camp, and was turned over to W. J. Feagles, the road overseer, who was to bring him to the county jail. Gilbert is evidently somewhat of a bad actor and before they had gone half way to Globe he made his escape from Feagles.

Monday afternoon Sheriff Thompson located Gilbert in the lower end of town and took him in custody. The hearing will be held tomorrow.

WALL COLLAPSES AT BUCKEYE MINE

Rains Undermine Foundation and Stone Wall Caves in on Hoisting Engine

Early yesterday morning the hoisting plant of the Buckeye mine of the Old Dominion company was put out of commission for several days by an accident resulting from the heavy rain of Tuesday night. Just after the night shift had been hoisted at 2 o'clock, one of the stone walls surrounding the gas-line engine collapsed and fell on the engine, the foundation having been undermined by the heavy rainfall. Fortunately, the engineer managed to make his escape in time to save himself from injury.

The accident limited operations at the Buckeye yesterday owing to the inability to do any hoisting. Another engine was secured yesterday and its installation will probably be completed today.

COMMITTEE WILL START CAMPAIGN

Will Canvass City for Members of Chamber of Commerce, Beginning Today

President Ewing of the chamber of commerce last evening appointed the following committee to make a canvass of the city for new members: Judge Hinson Thomas, Pat Rose, Roland H. Jacobs, George Sultan and J. J. Keegan. All have consented to serve and they will start immediately on an active campaign. The future of the chamber of commerce will largely depend upon the amounts which are subscribed by the members in addition to the quarterly dues and judging from the voluntary action of several of the members to date, there will be but little effort required to secure subscriptions which will make the organization one of the liveliest and most up-to-date in the southwest. The charter list of the chamber will be closed on August 29 and all of those who are members at that time will be eligible for appointment on the various standing committees.

The committee will begin its canvass today and will report on what it has accomplished at a meeting of the board of governors to be held on the evening of August 29.

SWITCHMEN AT TUCSON STRIKE

Walk Out Sunday Night Because One Hour's Wages Was Cut Off by New Order.

SPECIAL OFFICERS TO GUARD LOCAL YARDS

Extra Brakemen Quit Rather than Take Places of Men Who Walked Out—Thirty-four Men in All Are Out.

Eight special officers were sworn in Monday evening and are on duty for the Southern Pacific Railroad company. They are, according to report, special guards in the railroad yards as a result of the strike.

No trouble is anticipated, but the extra officers are put on as a precautionary measure.

Eighteen men in the yard who had been employed by the company quit work and according to the statements of the switchmen sixteen extra men who were running out of the city quit work rather than take the places of the strikers.

"We are not on a strike," remarked one of the switchmen, "We simply quit work. That is all there is to it. The company endeavored to get a bunch of extra brakemen to work and they refused and were discharged. There were sixteen in the bunch."

Trainmaster Bonorden when seen said that the strike was merely one of the occasional happenings among the switchmen. He added also that cars are being switched and transferred in the yards.

The difficulty is caused over the allowance of an hour's time. Heretofore the switchmen have been allowed twelve hours pay for eleven and a half hours work. They were given the thirty minutes for lunch, but were allowed twelve hours pay.

Under a new order they were to receive only eleven hours pay for eleven hours work, and were not to be employed the extra half hour.

"We did not want this rule," remarked one of the switchmen, "and as a result we simply quit. What is the good of an hour off? Is there any place in Tucson to go at midnight?" he added.

Everything has been peaceful in the yards. The men who are at work have not been molested thus far and the switchmen who quit are taking matters calmly.

RICH STRIKE AT THE LIMESTONE

Good Ore Uncovered in Shaft of the Superior & Boston—May Run High

One of the best strikes made in the Globe district during the summer is that made in the Limestone shaft of the Superior & Boston company during the last few days. Five feet of high grade oxide, some of which will assay about 15 per cent copper, has been struck in the crosscut on the 215 level of the Limestone. It is the same vein which was only eighteen inches wide when encountered in the shaft.

There are at present indications of the close proximity of the hanging wall and the vein will probably be about six feet wide. The ore is growing richer as the wall is approached, and it is believed that the entire vein will average about 10 per cent. There is considerable glance in the ore, the first that has been struck in any of the Superior & Boston workings.

ELKS AND EAGLES WILL PLAY SUNDAY

Exciting Game of Ball Anticipated—Both Teams Greatly Strengthened

The ball game Sunday afternoon between the Elks and the Eagles will be a real "sure enough" ball game and not a burlesque, as many erroneously believe. The first game of the season between the two orders resulted in a

bad beating for the Eagles and they have resolved to get revenge for their cost. The Elks are looking for surprises and consequently are strengthening their team, wherever needed, but the antlered bunch are confident that they can turn the trick again. Manager Ed Stewart of the Elks will probably be in the box for his team and is busy taking the kinks out of his whip. If successful in disposing of the Eagles, he says that a challenge will be sent to the Douglas Elks, the strongest lodge team in the territory.

Manager Carroll of the Eagles refuses to say much, but does a lot of expressive winking. The lineup will not be given out until Sunday morning, so that it will be too late for either team to make any changes. Only bona fide members of the orders will be allowed to play on the respective teams and the entire gate receipts will go to the charity funds of both local lodges. The game will be called at 2:30 sharp.

Eleven Useless Biped

A woman in a nearby town announced a "white elephant" party. Each guest was told to bring something for which she had no use, but which was too good to throw away.

Eleven of the nineteen guests present brought their husbands.—Somerset, Pa. correspondence Philadelphia Record.

HEALTHIER TONE IN STOCK MARKET

Slight Advance Made in Leading Issues—Old Dominion Some Stronger

From the meager telegraphic information received yesterday, the market is apparently recovering from the recent heavy decline, as the few quotations received indicate considerable strength in both the New York and Boston markets without any tendency to overdo things by hysterical buying.

The following is the close received on some of the stocks: Amalgamated, 68½; Smelters, 94½; Union Pacific, 124½; Old Dominion, 29½ bid, 30 ask; Arizona Commercial, 14½ bid, 16 ask; Globe Consolidated, 11 bid; Superior & Boston, 2½ bid, 3 ask; Calumet & Arizona, 150 bid, 151 ask; Denn, 9 bid, 9½ ask; Green-Canaan, 12 bid, 12½ ask; Superior & Pittsburgh, 14½ bid, 14¾ ask; Utah Consolidated, 42½ bid, 43½ ask.

SENATOR DUBOIS ROASTS MORMONS

Tells Illinoisans that They Control Utah and Still Practice Polygamy

AURORA, Ill., August 18.—In an address at the Chautauqua this afternoon, Senator Dubois of Idaho urged his hearers to exert their influence with the Illinois representatives in congress to secure an amendment of the constitution, under which the federal government will have power to deal with unlawful cohabitation and polygamy.

He devoted considerable time to the Mormon question, which he said required attention in order to stamp out the growing power of Mormonism.

"You can't convict the Mormons of polygamy," he said. "To prove polygamy you must prove a second marriage. Plural marriages among the Mormons are performed by high officials of that church in secret places, either in their

(Continued on Page Six)

DESPERADO SENDS DEFY TO OFFICERS

Outlaw Wanted at Morenci for Attempted Murder of Wife Is at Silver Belt.

DARES DEPUTY SHERIFF SCOTT TO TAKE HIM

Desperate Battle Expected when Officers Meet Desperado—Alleged to Have Killed Several Men—Bad Hombre.

"Come and take me if you can. I have my gun and am ready for you. I will kill you like a dog if I ever lay my eyes on you. Why don't you try to take me?"

This was the message that Glenn Scott, deputy sheriff of Graham county, received two weeks ago from Juan Tonce, a desperado who is badly wanted in Morenci for the shooting of his wife. This morning armed to the teeth, Scott and Deputy Sheriff Alberta Mungia started for Silver Belt, where they have learned the desperado is in hiding.

So insulting was the letter Scott received from the murderous outlaw that he determined to personally capture the desperado. Usually he would have turned the matter over to the authorities of Pima county, but in this instance he came all the distance from Morenci to meet face to face the man who dares him to battle to the death.

Scott is a typical western deputy. He is considerably over six feet in height and is known as a perfectly fearless man. There had been bad blood between him and the desperado before the latter committed his latest crime. After Tonce shot his wife, Scott was particularly active in his efforts to capture him. Through friends the desperado heard of this and mailed Scott the insulting letter, calling the sheriff many names and daring him to fight.

Two days ago Scott was given a tip that Tonce was in hiding at Silver Belt. The deputy, with Alberta Mungia, another Graham county deputy, immediately started for Tucson. They arrived here yesterday afternoon and after conferring with the local sheriff's office, started for Silver Belt this morning. Both men are armed with rifles and revolvers and expect a desperate battle. They are expected to arrive in Silver Belt at about 2 o'clock in the afternoon.

While here Scott was very anxious to escape reporters. To friends, however, he said he would take no chances in arresting Tonce. Scott desired to get Tonce all alone, but was advised and practically ordered to take Mungia with him in order to make more certain of the capture of the criminal.

Tonce has a long criminal record, and is said to have killed several men. His most recent exploit was the shooting of his wife, a crime so brutal that lynching was threatened if the man was caught. In a fit of fury at the woman Tonce drew his revolver and shot her through the face. For several weeks it was expected that she would die, but she finally recovered, although horribly disfigured. This last crime was committed in Morenci about three months ago, and through the aid of friends Tonce escaped and was not heard of again until Scott received the letter daring him to fight.

A Paradoxical Challenge
"Women are so inconsistent."
"What's happened now?"
"Maria told her young man that she would never marry him while he used tobacco in any form, and that he could put that in his pipe and smoke it."—Baltimore American.

LIEUTENANT U. S. GRANT 3D.
Lieutenant Grant, who is to wed Miss Edith Root, daughter of the secretary of state, is a son of Major General Frederick Dent Grant and a grandson of General U. S. Grant. Unlike both his father and grandfather, U. S. Grant 3D distinguished himself for his scholarship while at West Point. For some time he has been one of President Roosevelt's aids at the White House.

FRANCIS J. HENEY.
When District Attorney Langdon of San Francisco began his great task of rounding up the city's brazen grafters, he chose as his principal assistant Francis J. Heney, Nemesis of the western land thieves. In numerous instances Heney has already demonstrated his fitness for the work. Mayor Schmitz is in jail, Abe Ruef has confessed his guilt, and their satellites and confederates are rapidly squaring accounts with justice.
