TUNIS MONORAIL RAPID TRANSIT SYSTEM.

Howard H. Tunis, a young civil engineer of Baltimore, has invented a monorail system which is attracting much attention. At the Jamestown exposition a single rail track half a mile long has been constructed under the direction of Mr. Tunis. A car, operated by electricity, carries passengers. While the track is too short for great speed to be achieved, the successful operation of the system has so impressed some New York capitalists that a project is on foot to build a Tunis monorail line between Newark and Jersey City, N. J.

FAIR MINERS FIND NUGGETS

FAIR TOUCH

Home to Husbands and Sweethearts Several Dollars' Worth of Nuggets in Brief Wash

Four fair placer miners of Prescott this morning inspecting the Granite placer dig, one half mile south of the city dig, in the neighborhood of the Snake ranch, "washed" enough pay to bring home to their husbands and sweethearts several dollars' worth of nuggets. The party was composed of Mesdames Monte Broaded and Hopkins and Misses Duke Lewis and Brown, says the Journal-Miner.

The gold is supposed to have been covered during the recent heavy rains that flooded Granite creek, along whose banks, in the days when the rampant Apache roamed untrammelled, save by the presence of adventurous miners, thousands of dollars' worth of placer gold was mined in the early days. The ground has been worked over from four to six times since its initial discovery, but each time yields well to the miners who scratch the bedrock; and that the soft, white hand of the fair miners can purify from its secreted places the yellow metal is proof sufficient that old Granite creek still contains the stuff that glitters.

Even yet old-timers can be found wintering along the banks of this historic and famous stream, digging for the yellow metal, or, when water is scarce, extracting the little nuggets by the dry washer process.

About a mile above the Brooks placer miners still wash the bedrock dirt whenever water is sufficiently plentiful, and on a side creek, known as English gulch, the ground is being worked over in some instances for the seventh time with profit.

Near the point where the female prospectors found their nuggets yesterday the early pioneers dug out the yellow metal from the crevices between the rocks in the bed of the stream, while others of their comrades stood on guard to sound the first warning of the approach of the bloodthirsty redskins, who were exceedingly hostile to the palefaces at that time.

Superintendent Grasp of the Wolfstone Extension at Manhattan has been doing considerable prospecting on the ground of that company recently and has been rewarded with an important find.

C., October 23.—The supreme court today took jurisdiction of the meat packers' case, wherein the Armour, Swift, Morris and Cudahy packing companies were fined \$15,000 for accepting preferential rates from the Burlington railroad on shipments of meat for seaports from Mississippi river points to the Atlantic seaboard. A motion for writ of certiorari was granted.
