MEN IN SUNKEN SUB OVER FORTY HOURS

AMATEUR WIRELESS OPERATOR PICKED UP THE DISTRESS CALL FOR AID.

VESSELS RUSHED TO RESCUE

Submarine S-5 Submerged in 28 Fathoms of Water—Air Pumped to Men by Ships Standing by on Surface.

New York.—The submarine S-5 of the United States navy, has been submerged for more than 40 hours in 28 fathoms of water, 55 miles southeast of Cape Henlopen, one of the Delaware capes, and her crew of two officers and 35 men are being kept alive by air which is being pumped into the vessel by two ships which are standing by on the surface. Latest radio reports received by navy yards along the coast said that the men are still living and are in good condition. Destroyers and repair ships equipped with apparatus for cutting through the hull of the submarine were rushed to the rescue shortly after the radio message telling of her plight was received. The navy department first learned of the accident to the S-5 which was only recently commissioned and which was going from Boston to Baltimore on a recruiting trip, when this wireless from the steamship General George W. Goethals was picked up: "On board U. S. S. General Goethals, at Sea.—Send destroyers with gear to relieve crew in submerged submarine S-5. Been in this condition for 35 hours. Bring material for cutting through hull." The radio message was also picked up by a number of amateur wireless operators along the coast. One of them, David L. Moore, picked up the message in Farmington, Conn., where he has an amateur's outfit and made it public.

Philadelphia.—Twelve of the crew of the S-5 had been taken off and the rest were being rescued, according to a wireless message received at the Philadelphia navy yard from the steamship General Goethals via Cape May.

STORM PLAYS HAVOC.

Standing Crops, Trees and Farm Buildings Demolished.
 Kansas City, Mo.—A windstorm approaching proportions of a tornado, swept Bates county, Mo., leveling standing crops trees and farm buildings. In Hume, Mo., where the severity of the storm was greatest, a garage was demolished and nearby buildings damaged. Many trees in the city park, and along the streets of Hume were uprooted. Eight inches of rain fell at Hume. Pleasanton, Kas., reported heavy property damage. Almost every window glass in the town was shattered. Garnett, Kas., reported 3 1/2 inches of rain and severe hail, which did heavy property damage.

KILBY HEADS SYNDICATE.

Lynchburg Foundry Company Disposes of Plant For \$200,000.
 Lynchburg, Va.—The Lynchburg Foundry company announced here that it has sold its Anniston (Ala.) cast iron pipe plant to a syndicate, headed by Gov. Kilby of Alabama, the purchase price being around \$200,000 cash. The new owners get possession this week. The local company built the Anniston plant about seven years ago.

NEEDING BREADSTUFFS.

France Must Import Near Five Billion Pounds, Says Economic Editor.
 Paris.—Andre L'Ess, editor of the financial journal Economiste, declares in an article that France will be obliged to import 20,000,000 quintals (4,905,400,000 pounds) of breadstuffs and that the United States has the largest disposable quantity for that purpose. He remarks that France will be able to profit by the fall in the Chicago wheat market.

Killed by Skidding Auto.
 Huntsville, Ala.—William Vinson, 50 years old, of Gurley, was instantly killed near Chase when an automobile in which he and Allen Sanford were riding skidded into a ditch and threw Vinson into a tree. Sanford, who was driving, attempted to avoid a bad place in the road and lost control of the car.

Calls Special Session.
 Baltimore.—Gov. Ritchie has called the Maryland legislature into extra session Sept. 20, limiting its activities to amending the registration laws in order that women may have ample time to enroll their names.

One Killed, Two Hurt.
 Lake Charles, La.—W. R. Stokes was killed by asphyxiation and Dr. E. A. Edwards, of Shreveport, La., and a negro helper, John Redford, severely injured as a result of an experiment they were conducting for manufacturing lubricating oil at the plant of a refinery at West Lake.

New York.—Arrival here of 18,691 aliens during the past week broke all immigration records at Ellis Island since before the war.

URGES USE OF CORNED BEEF

The United States Department of Agriculture Issues Circular to American Housewives.

Washington.—Eat more canned beef, advises the department of agriculture in a circular to American housewives. It is cheap, succulent and nourishing and, unlike many other meats, it adds savoriness to the diet.

In the appeal for greater use of this article of food, W. A. Wheeler, in charge of market information for the department, says:

"With fresh beef selling at prices ranging from 40 to 75 cents a pound retail, cooked corned beef at 25 cents a pound can, wholesale, only costs about one-fourth of the fresh meat price on uncooked and boned basis. Its relative value as compared to fresh beef, such as Porterhouse, round and sirloin steaks and chuck and rib roasts can be readily seen when it is understood that to produce one pound of canned corned beef it takes approximately two and one-half pounds of boned meat."

The war department has released thousands of dollars' worth of canned corned beef from its accumulated army stores.

MOB IS CONDEMNED

GUARD DECLARES TWO NEGROES HANGED WERE NOT ONES ASSAULTING HIM.

GUILTY ARE STILL AT LARGE

Corinth, Miss.—At a mass meeting held Sunday night at the First Baptist church here, in which the best citizens of the city and county attended, resolutions were passed condemning the mob which held a pistol on Jailer J. D. King, forced him to turn over Blucher Higgins and Dan Callicott, negroes, and then hanged the black to a telegraph pole.

Hundreds of citizens, known not to have participated in the lynching, have been summoned and will be examined for service on the jury. The sessions probably will last several days, and it is expected arrests will be made. James Whitehurst, the guard who was assaulted by one of the four negro prisoners who escaped from the jail, has declared that neither of the negroes who were hanged were implicated in the assault upon him. He says George York, the negro who struck him down and made the jail delivery possible, is still at large. Citizens here are condemning the mob for hanging two innocent negroes.

TWO BURNED TO DEATH.

Burned Beneath Overturned Car at California Fair Grounds.

Santa Rosa, Cal.—Two automobile racers were burned to death beneath their overturned car and a 7-year-old spectator was killed when a light car in the Sonoma county fair races blew out a rear tire, left the track and crashed into a tree. The dead are Arlo Beattie, pilot; Delbert Walker, mechanic, and Clarence Pregar. Beattie was leading in the 50-mile free-for-all event when one of his tires exploded on the nineteenth lap. The car swerved off the track into a tree. The gasoline tank exploded in a burst of flames. Pregar, who had been standing at the foot of the tree, was fatally scorched.

QUAKE SHAKES MALTA.

Buildings in Floriana and Surrounding District Damaged.
 London.—The island of Malta suffered an earthquake shock of considerable force, said a Central News dispatch from Rome, quoting advices from Syracuse, Sicily. Numerous buildings in Floriana and the surrounding district were seriously damaged and the population was in a panic, the dispatch says.

Woolen Mills to Resume.

Boston.—The American Woolen Co., whose mills have been shut down, will start the preparatory departments Sept. 1, and other departments thereafter as soon as possible.

Panama Record Broken.

Panama.—All traffic records since the opening of the Panama canal were broken during August. Three hundred ships passed through the waterway, the tolls being \$936,209.

Advised to Avoid Politics.

Washington.—Army officers were advised "to keep scrupulously out of politics" by Secretary Baker, in addressing student officers at the second term of the General Staff college.

City Buys Shipyard.

Washington.—Sale of the Liberty shipyard at Wilmington, N. C., to the city of Wilmington for \$37,500 was announced by the shipping board.

Successful Test Reported.

Washington.—A successful preliminary test of the radio plotting cables laid in the Ambrose channel approach to New York harbor as a means of plotting vessels to the harbor in foggy weather, was announced by the navy department. The test was made with the navy tug Algoma, which navigated the sixteen-mile stretch of the cable from the Ambrose channel lightship to the Narrows entirely on the bearing received from the electrical waves emanating from the cable.

TEETH'S BIG FOE

Pyrorrhea Responsible for Immense Amount of Suffering.

Infection of the Gums Which Frequently is Not Suspected Until Much Harm Has Been Done—How to Recognize It.

(Supplied by the United States Public Health Service, Washington, D. C.)

Pyrorrhea is an infection of the gums or tooth-sockets. It begins beneath the edges of the gums that have been injured and especially where there has been an accumulation of tartar or lime-deposit. As the infection progresses and destroys the membranes that attach the root of the tooth to the socket, a pocket is formed around the root and the tooth becomes loosened. It is said that this disease is responsible for far more loss of teeth than is decay.

But this is not the only evil. In the pocket pus is continually being formed and discharged into the mouth and swallowed. Also, as the teeth rise and fall in their diseased sockets in ordinary chewing, bacteria are forced into the circulation and may be carried to distant parts, where they work harm according to their nature, selecting tissues for their operation in which they can best thrive.

It was formerly supposed that the ill effects from such conditions as dental abscess and other pus foci were wholly due to the toxins or poisonous products thrown into the blood-stream by the bacteria at the focus. It is now known, however, that the bacteria migrate into outside tissues through the blood and lymph-streams. In joint affections they clog and obstruct the nutrition of the joint-tissues, causing deformity and enlargement, as in arthritis deformans, as well as in acute inflammation, such as rheumatic fever. Indeed, this condition of sub-infection, or "focal infection," is coming to be recognized as a far more important cause of disease than the time-honored auto-intoxication, a term which has been greatly abused and misused.

Wanted an Audience.

During my vacation I started in a canoe, one afternoon on a four-mile trip across the lake. There had been a hard storm the night before, and the lake was quite rough. The wind carried me out of my course, the canoe dipped water with every roller, and I was soaked and terrified. When I reached the opposite side I decided that I would never go back until something more substantial should come along and pick me up.

An hour later one of the finest speed boats on the lake docked at the wharf. I boldly asked the pilot to take me back to the hotel. On the return trip I entertained him with a gay line of chatter, and as we came near the hotel I noticed that there were very few guests out, and asked him if he would mind going on a little further, coming back when there was more of an audience to appreciate my impressive home coming. When I finally did get out of his boat I offered him the 40 cents, which is the usual fee for hired boat service on the lake. The most embarrassing moment of my life came when the guests excitedly informed me that I had been riding with one of the most important and dignified political figures of the day, who had a summer estate nearby.—Exchange.

Vacuum Best Known Insulator.

In answer to a question, the Scientific American says: "A vacuum is the best insulator against heat which is attainable. A perfect vacuum would be a complete insulator and would retain or exclude heat indefinitely. The common thermos bottle is an example of the use of a vacuum for keeping liquids either hot or cold. Heat is retained in hot liquids and kept out of cold liquids. However, there is a difference between heat from a white hot body like the sun or an electric lamp and heat from a liquid or solid such as may be contained in a thermos bottle. The intense heat from a white hot body will pass easily through the best vacuum man can make, as witness the heat given off by an incandescent lamp bulb, which will char and set paper on fire. A vacuum will restrain heat of low intensity, but not heat of high intensity."

Krupps May Build Plant in Spain.

Spain is one of the great iron-ore centers of the world, shipping ore heavily to other European countries as well as to the United States, and while it has some large iron and steel works, its output of the finished product has never been commensurate with its ore developments. Now, however, according to the London letter of the Whaley Eaton Service, there is a well-defined project of the Krupps to set up a great branch at Bilbao, Spain, to manufacture agricultural machinery for the purpose of driving out of the market American companies who now have a large share of the business.—Manufacturers' Record.

She's Found Them Useful.

Flatbush—You know, my wife threatened to smash all those steins and flasks I had in my den. Bensonhurst—But she didn't do it, did she?
 "No, she didn't; and she's glad of it."
 "Why so?"
 "She's using 'em for jelly and preserves now."

GOODRICH TIRES & TUBES
 BEST IN THE LONG RUN

"BEST IN THE LONG RUN"

IS a slogan almost as old as the history of tires. It means "the long run" of Good Faith and Good Will—a mirroring of the confidence placed in GOODRICH TIRES by users everywhere.
