

ASPIRIN

Name "Bayer" on Genuine

Warning! Unless you see the name "Bayer" on package or on tablets you are not getting genuine Aspirin prescribed by physicians for twenty-one years and proved safe by millions. Take Aspirin only as told in the Bayer package for Colds, Headache, Neuralgia, Rheumatism, Earache, Toothache, Lumbago and for Pain. Handy tin boxes of twelve Bayer Tablets of Aspirin cost few cents. Druggists also sell larger packages. Aspirin is the trade mark of Bayer Manufacture of Monacelcaidester of Salicylicacid.—Adv.

WERE OTHERS IN THE FIELD

School Superintendent Learned That He Was Not Alone in His Devotion to Fair One.

The superintendent of schools in a small Indiana town recently persuaded the school board to revoke its ruling to employ only single women as teachers in the school. At the first school at which he called he tried to joke at the young teachers. "Now you'll all be getting married," he laughed. "Have any of you been getting any proposals since the ruling was passed?"

Accidentally his eyes happened to meet those of the young teacher in whom every one knew he was interested. She thought the question was addressed to her and blushing answered, "Just three others besides yours."

Amid the roars of the other teachers the young superintendent made his exit from that building. But never since that day has he mentioned the new ruling.—Indianapolis News.

If You Need a Medicine You Should Have the Best

Have you ever stopped to reason why it is that so many products that are extensively advertised, all at once drop out of sight and are soon forgotten? The reason is plain—the article did not fulfill the promise of the manufacturer. This applies more particularly to a medicine. A medicinal preparation that has real curative value almost sells itself, as like an endless chain system the remedy is recommended by those who have been benefited, to those who are in need of it. A prominent druggist says "Take for example Dr. Kilmer's Swamp-Root, a preparation I have sold for many years and never hesitate to recommend, for in almost every case it shows excellent results, as many of my customers testify. No other kidney remedy has so large a sale."

According to sworn statements and verified testimony of thousands who have used the preparation, the success of Dr. Kilmer's Swamp-Root is due to the fact, so many people claim, that it fulfills almost every wish in overworking kidney, liver and bladder ailments; corrects urinary troubles and neutralizes the uric acid which causes rheumatism.

You may receive a sample bottle of Swamp-Root by Parcel Post. Address Dr. Kilmer & Co., Birmingham, N. Y., and enclose ten cents; also mention this paper. Large and medium size bottles for sale at all drug stores.—Adv.

His Method.

Two negro men were discussing the eloquence of a certain member of the faculty of an educational institution for negroes in a Southern state.

"That Professor Biggs sure does like to use high soundin' words, don't he?" asked one of them.

"Maybe dat's jest an affection on his part," said the other darky. "Some folks do like to put on airs in talkin'."

"No, I don't figure it out dat way," said the other. "I kinder thinks he uses them big words because he's afraid dat if people knew what he was talkin' about they'd know he didn't know what he was talkin' about."—Harper's Magazine.

Catarrh

Catarrh is a local disease greatly influenced by constitutional conditions. HALL'S CATARRH MEDICINE is a Tonic and Blood Purifier. By cleansing the blood and building up the system, HALL'S CATARRH MEDICINE restores normal conditions and allows Nature to do its work.

All Druggists. Circulars free. F. J. Cheney & Co., Toledo, Ohio.

Growth of the Kansas Language.

Judge J. C. Ruppenthal of Russell, author of a western Kansas dictionary, and student of American dialects to such an extent that he is recognized as an authority, is of opinion that much of the corrupted French the boys brought home from overseas will remain and become part of our language. "No doubt," he writes in the Luray Herald, "our language will permanently keep such words as bean tote, bone jar, by Joe, bullion, calf, fox paws, Jenny's pa, silver plate, three beans and toot sweet."—Kansas City Star.

If You Have a Pain try Yacher-Balm. Keep it handy, as avoid imitations.—Adv.

His Interpretation.

"The presiding elder says something has got to be done about the acoustics in the church," remarked an acquaintance.

"Aw, I d'know!" returned Gap Johnson of Rumpus Ridge, Ark. "If folks are just nacherly bound and determined not to believe what's preached to 'em I'm willing to let 'em go to—yaww-wn!—hell in peac."—Kansas City Star.

Hoary Old Asia.

The history of Asia goes back very far. One of the earliest events recorded and regarded as authentic is the founding of the temple of Bel at Nippur, 6000 B. C. The Accadian-Sumerian kingdoms are placed at the head of the ruling powers. When they commenced is not clear but they continued to the year 2230 B. C.

KEEP CHICKS IN BEST CONDITION

Young Fowls When Old Enough to Shift for Themselves Must Be Given Care.

NEGLECT IS CAUSE OF LOSS

Bulletin Given Out by Department of Agriculture Especially for Beginners Gives Essentials for Proper Growth.

(Prepared by the United States Department of Agriculture)

The enthusiasm with which many poultry raisers, particularly beginners, start in the spring with young chicks sometimes lags as the season advances and the chicks get old enough to shift for themselves. If care is neglected at this period, however, success is improbable. The baby chicks may be smart little fellows from strong, vigorous parent stock, and they may have been brooded carefully for the first two or three weeks, but unless they receive proper care and management during their later growing period they will not develop properly, and many of them will be lost by sickness and disease. This is the timely warning made by poultrymen of the United States Department of Agriculture in Farmers' Bulletin 1111, "Management of Growing Young Chicks," published by the department, in which is given the essentials to proper growth and development of chicks. The bulletin is written briefly and in simple terms for beginners, especially members of boys and girls' poultry clubs.

Suitable Food and Care.

The chief essentials to the proper growth of chicks, according to the bulletin, are good coops, or houses, cleanliness, proper feed and water, shade and free range. Growing chicks should be provided with large, roomy coops or houses, which will give them a comfortable place to stay at night and during stormy weather. The bulletin suggests no particular kind of house, but states it should be so built that it will provide the chicks with

Member of Boys' Poultry Club and His Flock.

plenty of light, pure air and sunshine, and protect them from dampness and storms of all kinds.

Chicks should never be crowded in brood coops, for crowding will cause them to become overheated, resulting in improper growth and sometimes in dead chicks.

Sickness or disease usually starts in unclean quarters, and in such places lice and mites are always more plentiful, the bulletin says. The coops should be cleaned and sprayed once a week, and clean shavings, chaff, or sand put on the floor. Examine the chicks and houses often for lice and mites, and if found they should be gotten rid of at once. Farmers' Bulletin 1110 gives directions for fighting lice and mites.

Feed Right for Rapid Growth.

The three kinds of feeds most necessary for rapid growth are grain feed, green feed and dry mash. A grain mixture should be fed night and morning, giving as large a quantity as the chicks will eat clean, but no more. A good mixture for growing chicks consists of three parts cracked corn, two parts wheat and two parts hulled oats. Kafir corn or rolled or hulled barley may be substituted for hulled oats. A supply of fresh green feed is almost as necessary as grain for growing chicks. They obtain plenty of it if they have free range, but if kept in confinement, lawn grass, beet tops, cabbage, lettuce or other such green feed should be supplied regularly.

Grit and oyster shells should be provided so the chicks may help themselves whenever they wish. When sour milk can be obtained it should also be kept before the chicks, as no feed is regarded better for them. When this is given the amount of beef scrap in the dry mash may be reduced one-half. Plenty of fresh, clean water is absolutely necessary, and in hot weather it should be provided twice daily in dishes that have been thoroughly cleaned.

The bulletin emphasizes the importance of free range and shade for growing chicks. They are necessary if chicks are to grow rapidly and develop into vigorous fowls. When growing chicks have free range they obtain quantities of green feed, bugs, worms and other things, therefore they require less grain and are less liable to sickness and disease.

STARTING HORSES IN SPRING

Watch Necks and Shoulders Carefully and Wash With Salt and Water on Removing Collars.

In starting horses to work, see that their clothes fit them and that their collars are kept clean. Watch their necks and shoulders, and wash them with salt and water every time the collars are removed.

KILL OUT DODDER SEED

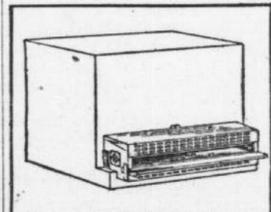

During the first season of infestation in clover or alfalfa, dodder usually occurs in small scattered areas. Such infested areas should be either mowed and removed before the dodder matures seed or else burned in the field. If seed has formed, burning is the only remedy, since it kills not only the plants but also the seeds of dodder which may be lying on the soil surface.

AUTOMATIC TRAP ON BEEHIVE

Primary Object of Invention is to Prevent Bees From Leaving in Large Numbers.

The Scientific American in describing an automatic beehive trap, the invention of D. S. Rowe of Marseilles, Ill., says:

"The invention relates more particularly to an automatic bee trap. The primary object is to provide means whereby the entrance and exit openings of a beehive may be automatically closed by the weight of the occupants to prevent the bees from leaving."

A Perspective View of a Hive, With Invention Attached.

ing the hive in large numbers, which is commonly known as 'swarming,' is a further object to provide a means by which the ordinary passage of the bees in their performance of gathering honey is unobstructed.

WHITE ANTS INJURE TIMBERS

Insects Enter Wood Wherever It Comes in Contact With Damp Earth and Eat Into Beams.

Winged white ants are often observed flying about houses in spring, and are sometimes supposed to have come in from outside. The bureau of entomology of the United States Department of Agriculture explains that these winged insects really are hatched inside the buildings, and usually are to be taken as indicating nests of wingless white ants working destruction in the timbers.

These insects, which really are not properly ants, enter the wood wherever it comes in contact with damp earth, and often eat into the center of an upright beam without manifesting their presence on the outside until the wood is entirely ruined, and possibly a settling and cracking of the building has resulted.

The department urges that buildings be constructed with such foundations that no wood touches the ground, or if it is necessary to use wood, that it be impregnated with tar creosote. Concrete floors should be laid on a gravel base to prevent dampness and cracking, and where cracks occur they should be promptly filled.

UNIFORM PRODUCTS FAVORED

Find Better Market, Bring Higher Prices and Are Handled at Less Expense Than Others.

Without uniform standards for farm produce there is no recognized basis for the business of buying and selling, says the bureau of markets, United States Department of Agriculture. Standardization of products gives seller and purchaser a common language, and a set quality upon which prices may be compared and fixed. Experience has shown that the products which are sold by grade find a better market, bring letter prices, and can be handled at less expense than those sold without reference to standards. Standards have already been fixed for many farm commodities, such as American Upland cotton, shelled corn, wheat, oats, and for small fruit containers. These Federal standards apply only when the product is intended for interstate or foreign commerce. It is highly important to secure state cooperation so that the provisions that apply to a few products will apply to all that are offered for sale.

DIARY OF MUCH IMPORTANCE

Well Adapted to Cost-Accounting Records When Information Wanted on Few Enterprises.

A diary is well adapted to cost-accounting records when information is wanted on only a few farm enterprises, say specialists of the United States Department of Agriculture. If the diary is written up each day it takes but a moment to enter the hours and minutes spent in working the crop, and the necessary notes regarding the cost of seed, fertilizer, and equipment. The common form of diary is a book containing a blank page for each day's record and with space in the back for financial accounts. Another form has a page for each day divided to give space to the records of two years. A similar type furnishes space for a five-year period.

Keep Incubator Clean.

After each incubator hatch comes off, the interior of the machine should be cleaned most thoroughly. Sponge it out well and then spray it with a good disinfectant.

Utilizes Idle Land.

The home garden utilizes idle land and spare time for food production. The use of vegetables conserves meats, grains and other food produced on farms.

STUCCO HOME OF PLEASING LINES

Many Attractive Features Are Seen in This Design.

ROOMS ARE LIGHT AND AIRY

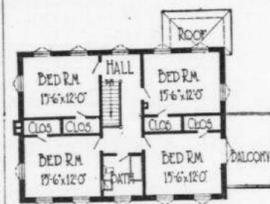

House is Built of Hollow Tile With Stucco Exterior and Presents a Very Appealing Picture—Not Expensive to Build.

By WILLIAM A. RADFORD.

Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to the subject of building, for the readers of this paper. On account of his wide experience as Editor, Author and Manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 187 Prairie avenue, Chicago, Ill., and only inclose two-cent stamp for reply.

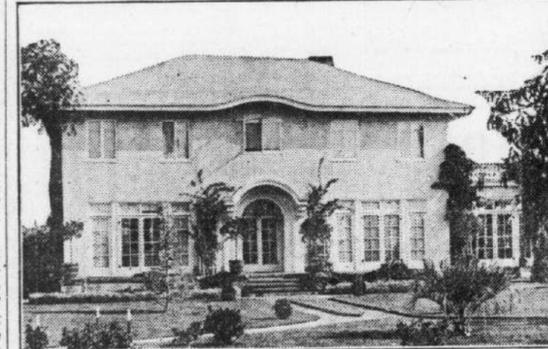

When the word "home" is mentioned today it immediately arouses the intense interest of most people. For upmost in the minds of hundreds of thousands is the question of where they are going to live. Building has been at a standstill since before the war. Rents have been soaring until they have reached a point where many cannot pay. Naturally they turn to the thought which they had ignored years before, viz., that of buying or building a home. Once established in a house of their own, their worries over landlords, increased rents, etc., cease. And in view of the shortage existing today more people than ever before are giving the idea of building a "home of your own" very serious consideration. A man who owns his home is not liable to become a Bolshevik, on the contrary he is more than liable to become a very serious-minded citizen taking an active interest in civic affairs and jealously guarding the interests of his community. No one ever went to war over a boarding house, but men all through the centuries have died defending their homes.

room, 15 feet 6 inches by 28 feet, designed to be the recreation center and play room of the family and friends. At one side is an open brick fireplace and on both ends are doors with supplementary casement windows. This room extends the full depth of the house. It is reached from the reception hall which also opens into the dining room on the opposite side. This room is not quite as large as the living room, but ample for the needs of a real family. It opens into the sun parlor through French doors. Directly to the rear of this room is the kitchen. Conveniently close by is a small breakfast nook where informal meals can be served without much trouble. There is also a small lavatory at the end of the reception hall. Upstairs the sleeping rooms are located, four in all. One bedroom opens out onto a balcony over the sun parlor. These bedrooms are all of about the same size, 15 feet 6 inches by 12 feet, and have windows on two sides. Very often in the construction of a home the ventilation facilities of the sleeping rooms are overlooked or not taken care of. This, however, is not the case in this dwelling. Each bedroom has splendid lighting and ventilation facilities. A supply of fresh air circulates through the rooms at night.

Second Floor Plan.

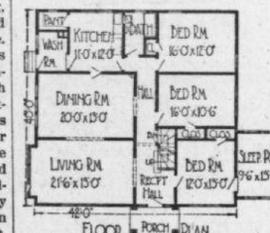

According to present reports from all parts of the country a real building boom is under way. Many disputes over wages and building material prices have been amicably settled and work which has been held up for several years is getting under way. In this town as well as in many others the housing problem has been the leading one for most people. That is why there will be a glad sigh of relief when work actually starts again. The time to get the design of the house you

That is the beauty of home ownership, that is the feature that makes it essential to the continued welfare and progress of any nation.

One of the most attractive materials that can be used in home construction, one that lends itself to a very wide range of treatment is stucco, either magnesite or portland cement. This material can be applied equally successfully over frame, hollow tile, brick or concrete tile. The beautiful home shown in the accompanying illustration is built of hollow tile with stucco exterior and presents a very pleasing and appealing picture, one that will demand the attention of every sincere homeseeker.

This house is built on square lines with a hip roof, a type of architecture

FLOOR PLAN

that has many advantages the most prominent one being its economy in cost. There are no special alcoves or bay windows that require special work, and consequently the cost does not mount up into large figures.

One of the striking features of this house is the sun parlor at one side. It is accessible from the outside through artistic French doors which are also found in the living rooms. On the first floor are three large and comfortable rooms, the living room, dining room, and kitchen. The living room is a great spacious

want is now, and as a suggestion, the beautiful, immaculate white stucco home shown here is hard to beat. It embodies comfort, charm and convenience, three essentials in a happy home.

Good Use for Airplanes.

Thirty-three per cent of the 196 forest fires sighted and reported last year by airplanes operated from Sacramento, Cal., by the United States forest service, were located within a quarter of a mile of the exact place, as was later determined by actual surveys on the ground. Ten per cent of the total number of fires was discovered by the air patrol before the rangers were aware of them. Forty-two per cent was reported by radio, while planes were in the air. Besides acting as reporters, the planes were used to direct fire fighting operations and to patrol fire lines which were built but needed watching. If the planes reported a line to be clear, the fire fighters were kept at work elsewhere, but if the observer reported that the fire had broken away, a force of men could be rushed to the spot at once.

Child Critics Wreck Show.

The modern child had its innings the other day in a theater at Halle, Germany.

A company had been brought from Munich to give a matinee performance of a fairy play and the theater was packed with children. They, however, considered the piece silly and the scenery and dresses inadequate. Making a tremendous uproar, they demanded their money back.

By the time the police arrived and cleared the theater, the children had broken up most of the seats.

Thankful.

When a man has one foot in the grave, he's mighty thankful that he was born a biped.—Boston Transcript.

LOST APPETITE—FOR SUGAR

Little Happening Aunt Mary Witnessed Responsible for Disappearance of "Sweet Tooth."

Aunt Mary is an immaculate housekeeper. She is constantly going about after her servants to see that everything is clean and in order.

Since prohibition and the high cost of sugar she has been more than annoyed to find the sugar spoon constantly covered with a thick coat of sugar. She had admonished the members of her family to be more careful in the use of the spoon, and not to dip it into their tea, but to no avail—the spoon continued to carry its coat, and aunt in her despair had come to dissolving this coat in her own tea.

This continued until one day, to aunt's nauseating disgust, she happened into the pantry just as a spoonful of sugar had disappeared into the servant's mouth and the spoon was being thrust back into the bowl.—Indianapolis News.

MAORI PROVED POOR "SPORT"

Fit Companion for Men Who Would Bribe Baseball Players to "Throw" Games.

Ex-Governor Goodrich of Indiana said at a dinner, apropos of the baseball bribery scandal:

"The thing was so raw that it reminds me of the Maori millionaire. 'The Maoris, you know, are great gamblers and intensely fond of horse racing. Well, this millionaire set up a stable and did well. One day, though, just after a horse of his had won a race, he rushed up to the judges' stand yelling: 'I protest! I protest!' 'But your horse won,' said the judge. 'I know,' said the Maori millionaire. 'That's why I protest. I didn't want him to win.'"

Question Which is Worse.

Most of the trouble in the world is caused by two kinds of people—the clever and the stupid.

WRIGLEYS

"AFTER EVERY MEAL"

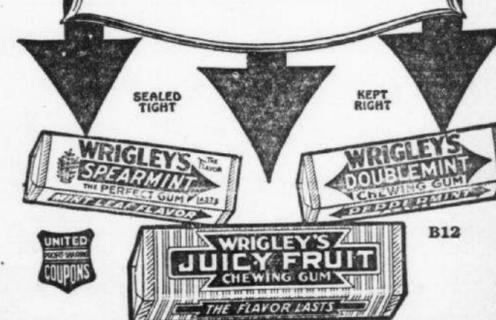

Mint leaf, peppermint or luscious juicy fruit, either flavor is a treat for your sweet tooth.

And all are equally good for you. Teeth, appetite and digestion all benefit.

Your nerves will say "thank you," your vim will respond.

WRIGLEY'S is liked for what it does as well as for its BIG value at the small cost of 5c.

The Flavor Lasts

GRAMMAR AS IT IS WRIT
Evidently the Third Man Had "Slipped Up" on the Spelling of Some what Familiar Word.

First Sergeant Grizzell of the Spokane recruiting station vouches for the following incident, which occurred when three of the applicants of that station were making an application to the director of the United States Marine Corps Institute, Quantico, Va. Two of the applicants had spelled the word grammar as "grammer," and were busily making corrections when the third applicant came along. He asked: "What are you changing the word grammar for?" "Why, we spelled it wrong," answered one of the applicants. "Give me that rubber," said the third man. "Darned if I ain't spelled it with two m's myself."—Recruiter's Bulletin.

That's All Right.
By-laws proposed by the Seine departmental council, France, for street cars and omnibuses operating in the district, will compel men to give up their seats to elderly women or mothers with children.—Brooklyn Eagle.

Immune.
James—May I kiss you?
