

From the St. Louis Intelligencer.

Burlington Convention—Mass Meeting.

Pursuant to previous announcement, a meeting of citizens was held at the Rotunda on Saturday evening, for the purpose of giving expression to the necessity of improving the Rapids of the Upper Mississippi, and appointing a delegation to attend the contemplated Burlington Convention, to assemble on the 23d inst. Hon. L. M. Kennett was called to the Chair, and Mr. S. Humphrey appointed Secretary.

On motion, made and adopted to that effect, the chair appointed Messrs. C. D. Drake, J. R. Crockett, N. Ranney, Geo. R. Taylor, and J. M. Krum, a committee to prepare resolutions expressive of the sense of the meeting.

During the absence of the committee, Col. Curtis, City Engineer, was called upon, and gave an elaborate and interesting statement of the feasibility of the improvement, and the different projects contemplated for its accomplishment.

The committee then returned to the meeting, and through its Chairman, submitted the following resolutions for adoption:

The citizens of St. Louis, assembled in public meeting, with the view of appointing Delegates to the Convention to be held in the city of Burlington, Iowa, on the 23d inst., for the purpose of devising ways and means to secure the immediate action of the General Government for the improvement of the Rapids of the Upper Mississippi river, deem it proper to accompany the appointment of their delegates with a statement of their views and principles in relation to the proposed improvement, and it is, therefore,

1. *Resolved*, That the Mississippi river, considered either as a means of intercommunication between the different parts of the vast valley through which it flows, or as an outlet to the sea for the people and productions of that valley, or in its relation to the commerce of our country, foreign and domestic, or as a source and means of National prosperity, wealth and greatness, should be regarded as a NATIONAL HIGHWAY, and that its national character ought to be preserved.

2. That any obstruction that seriously impedes its free and successful navigation is a matter of National interest, and its removal should be the work of the General Government, not merely for the advantage of those who reside along its banks, nor for any transient, local, or sectional good, but for the benefit of the entire people of the country, who in every section are more or less interested in the condition of this great stream.

3. *Resolved*, That by its past appropriations for the removal of obstructions from this river, the General Government has fully recognized its National character, and by specific appropriations for the improvement of the channel at the Rapids, has given to that work its approval; and that every consideration of public good, in the largest sense, requires that appropriations should be renewed, and continued with a liberal hand, until not only the rocks at the Rapids, but every other impediment of magnitude, from the Falls of St. Anthony to the Balize, shall be removed.

4. *Resolved*, That in our judgment, no improvement of the Rapids will be accomplished, the objects designed, unless it is such a nature as will afford constant navigation, free from toll upon the commerce of this great thoroughfare.

5. That 75 or more delegates to the proposed Convention, be appointed by the Chair after the adjournment of this meeting, who are requested to represent in that body, as far as may be necessary and proper, the views expressed in the foregoing resolutions.

6. *Resolved*, That we regard with warm interest the Hannibal and St. Joseph Railroad, believing that it will exert a powerful influence for good upon a large region of our State which needs but an outlet for its productions, to become equal in agricultural greatness to any other region in the West; and we rejoice with our friends in the north at the favorable auspices under which they commence, and we hope will complete their great undertaking.

7. *Resolved*, That seventy-five delegates be appointed by the Chair, after the adjournment of this meeting, to represent St. Louis at the ceremony of breaking the ground for the railroad at Hannibal, on the 3d day of November next.

8. *Resolved*, That the Chair be requested to announce in the public prints the names of the delegates appointed under the preceding resolution.

After some debate in relation to the number of delegates provided for, the resolution was unanimously adopted.

Col. Stewart, President of the Hannibal and St. Joseph railroad, being present, was invited to address the meeting. He did so in a forcible argument, and after speaking of the great advantage to our commerce in securing the work contemplated by the assembling of the coming Convention, he branched out into an argument showing the necessity of pushing forward to completion, with zeal and energy, the Pacific and Hannibal and St. Joseph railroads—he would not stop with these, but extended branches throughout every section of the State. His remarks were well received by the meeting.

On motion, ordered that the proceedings of the meeting be published in the several city papers.

After remarks from J. B. Crockett, and others, urging the necessity of a large delegation attending from St. Louis, the meeting adjourned. [It will be observed by the last resolution, that the committees provided for will hereafter be announced.]

WALKING FISH.

In very dry seasons, the fish inhabiting small ponds, or pools of water, are reduced to the greatest extremity for want of their natural element. In some cases they manage to preserve life by plunging their heads to a considerable depth in the mud at the bottom of their ponds, and there remaining till a copious shower of rain relieves their wants. This expedient, though not always successful, nevertheless succeeds to keep certain races from becoming extinct. Other species, however, have been furnished by their Creator with the instinct and power, when so circumstanced of deserting their native ponds, and of traveling over the land in search of new homes. This has long been known of eels; but Dr. Hancock gives an account of a species of fish, called by the Indians the flat-head Hassar, which, when the pools wherein they reside are deprived of water, march in droves by night in quest of other ponds, from which that necessary element has not been evaporated. These fish grow to about a foot in length. A strong, bony arm, edged upon the lower extremity like a saw, projects from the breast of the animal near the pectoral fin, of which it forms the first ray. This arm the animals use as a kind of foot, pushing themselves forward, by means of their tail, which is very elastic. In this manner they can travel over the land as fast as a man can leisurely walk. Their bodies are sheathed in very strong plates, which

is conjectured, aid them in their progress like those under the bodies of serpents, which partially perform the office of feet. The Indians affirm that they are furnished with an interior supply of water sufficient for their journey, an assertion which seems to be confirmed by the fact that their bodies, when taken from the water, even if wiped dry with a cloth, instantly become moist again. Mr. Campbell, a friend of Dr. Hancock, and a resident of Essequibo, once met with a flock of these animals, so numerous that his Indian attendants were enabled to fill several baskets with them.

A GOOD BANK NOTE REPORTER should be in the hands of every man who ever handles money. Such an one is "Clark's Bank Note Reporter," the October number of which is on our table. It is published at one dollar per annum in advance, by W. D. Skillman, St. Louis, Mo. E. W. Clark & Bro's, Editors. We take from it the following list of new counterfeiters:

Merchants' Bank, Boston—500's, vignette, a large spread eagle alighted on a rock, between two ships, with a large die on each side, containing the denomination "500"—tip-top engraving, but the bill is unlike the genuine.

Well executed counterfeit \$20 bills on the State Bank of Indiana, are in circulation on the Wabash.

Sullivan County Bank, N. Y.—5's, an excellent counterfeit, paper and engraving superb. Observe the shading under the title, which is not so well done as the rest of the note.

Counterfeit \$3 notes on the Western Bank in Springfield, have made their appearance. They are, however, unlike the genuine, and poorly executed. The vignette is, Liberty seated on a bale of goods at the right hand side of the bill, and the Massachusetts coat of arms is at the left. The one described is filled up as follows: Payable to H. Cobb, dated June 1, 1851, letter A, No. 4,190, engraved by Rawdon, Wright, Hatch & Co., signed G. P. Bissell, Cash, C. Rice, Pres't.

Trenton Banking Company, Trenton, N. J.—3's spurious. Vignette, two men cutting grain. On the right hand margin, head of Washington; and on left end, Jupiter. Engraved by Rawdon, Wright & Hatch. The genuine 3's have for a vignette a view of the bridge across the Delaware, at Trenton. On right and left end, figures of three boys. Between the names of the officers is a canal-boat. Engraved by Draper, Underwood, Bald & Spencer.

CAUTION.—The community is still flooded with counterfeit Fives of the Thames Bank, Norwich, Ct. It has been ascertained that they are from the genuine plate engraved for the Lebanon Miami Banking Company, Lebanon, Ohio, whose bills had a large circulation about ten years since.

TENNESSEE LEGISLATURE.

NASHVILLE, Oct. 6.

The Legislature convened to-day. The House met at 10 o'clock. Jordan Stokes, Esq., Whig, of Wilson county, was elected Speaker of the first ballot over Edwin Polk, Democrat, of Hardeman county, by a vote of 37 to 32.

In the Senate, Mr. Anderson, of Wilson, was called to the Chair. The election of Speaker resulted in the choice of R. Hill, Whig, of Gibson. The cars are now running 20 miles beyond Murfreesborough, making 50 miles of railroad completed. They will reach Shelbyville in three weeks.

NEW YORK, Oct. 6.

MORE PRISONERS SENT TO SPAIN—CAPTAIN ELLIS LIBERATED.—Advices from Havana up to the first inst., states that 40 more American prisoners had left Havana for Cadiz. Capt. Ellis, of Washington, has been liberated.

The Meeting on Saturday Night.

The meeting called at the Rotunda on Saturday evening for the appointment of delegates to the Burlington Convention and to the Hannibal celebration, was very well attended, though by no means so numerous as the occasion demanded. But an excellent spirit prevailed, and we have reason to believe that we shall send both to Burlington and Hannibal, such delegations as will prove that St. Louis duly appreciates the importance of these enterprises. It will be observed from the proceedings of the meeting that the Mayor is authorized to appoint the delegates. We trust that he will appoint no one without a distinct pledge that the person appointed will go. The duties to be performed—especially at Burlington—are of a practical nature and we should not only have a numerous delegation, but it should be made up of intelligent, business men. Those who are appointed should esteem it an honor to take part in the deliberations of such a body; and none should promise to go without they expect in good faith to redeem the pledge.

The speech of Col. Stewart, the President of the Hannibal and St. Joseph Railroad, on Saturday evening was characterized by his strong, practical good sense, and presented in a most imposing light, the duties which devolve upon this city, in connection with these enterprises.

We learn from Col. Stewart that it is his intention to be present at the Burlington Convention and to be prominent at the Hannibal celebration, which will afford an additional inducement to others to attend. The energy and success with which he has conducted the affairs of the company over which he presides, affords the best evidence of his zeal and capacity in connection with such enterprises.—St. Louis Int.

On Thursday last, a gentleman from Daviess county, near Pattonburg, passed through this place on the pursuit of a Mr. Murphy, from his neighborhood, whom he represented as having murdered his wife the day before. Shortly after he passed, Mr. Murphy came in town and stopped at the grocery. From the description given of him, he was immediately recognized and taken into custody. He confessed his guilt but no person coming after him, and his peculiar conduct impressed upon our citizens the belief that it was all a hoax, and on yesterday afternoon he was let go at liberty. He still continued in town drinking, till late in the evening, and then left.

We have this morning reliable information that he has killed his wife. It is said that he stamped her to death. Further particulars we have not learned. We hope that our citizens, by way of atonement for their negligence, will take active steps to have the murderer brought to justice.—Trenton Pioneer.

A \$1444 lump of gold was picked up in last July by Dr. Taylor, on the top of the mountain near Coloma in California, says an exchange.

THE GREAT LOCK PICKER.—The London Builder gives this description of the mode in which Mr. Hobbs does his work: "He applies a lever to press the bolt in a backward direction, and then proceeds by means of instruments previously manufactured, to lift the tumblers of the locks one by one and retain them in their right places. When the last tumbler is lifted the bolt flies back. Mr. Hobbs was given thirty days for his attack on the Bramah, and to make his instruments, he was permitted to take impressions of the key and the tops of the wards. Day after day he was shut up alone with the lock none being allowed to enter the room while he was at work; and so, with the aid of 'thieves' wax,' a hinged mirror in the keyhole, a strong light of all sorts of oil instruments; and his own great cleverness, he succeeded in the task."

EXCESSIVE POLITESS.—A good story is told of a very polite sheriff who came near being out done by a person it was in the line of his duty to hang. "Sir," said the gentleman, as the sheriff was carefully adjusting the rope, "really your attention deserves my thanks. In fact I do not know of one I should rather have hung me."

"Really," said the sheriff, "you are pleased to be complimentary. I do not know of another individual I should like so much to hang."

CHARLESTOWN, Prince Edward's Island. Corners have gone to the village of Cavendish to inquire into the death of twelve persons whose bodies were washed ashore at that place. The body of a man with a bare head to his back came ashore, but was not recognized. There is good reason to believe that over 100 bodies had been floated to the beach, since the late storm. Since the storm, from 3 to 400 sail succeeded in getting safely into harbor. Vessels arriving give dismal accounts of the storm, which it is said has never been equaled.

On the morning of the 14th inst., by Rev. J. L. Bennett, Mr. CHARLES T. WELLMAN, to Miss ELIZABETH BOWEN, all of this city.

On the morning of the 4th inst., after a long and painful illness, Mrs. LUCY M., wife of Dr. B. H. WATKINSON, and daughter of J. B. Marmaduke, Esq., of Shelbyville.

In this city, on the 13th inst., at the residence of Jonathan Pierce, Esq., Mrs. SARAH DOWNS, aged 78 years.
