

COLE'S ORIGINAL HOT BLAST=THE CLEAN STOVE

Cut No. 1
Shows how Dustless Ash Cover is used—the modern method. (Patented)

Cole's Original Hot Blast is the cleanest stove ever placed on the market. Our method of removing ashes shown by cut No. 1, is perfectly clean and overcomes the many objections to the ash pan used in other stoves. The elbow draft casting with its upward slant allows the empty coalhod to be set under the draft so that no ashes or coals can be spilled on the floor. Our patented dustless ash cover shown by illustration is furnished free with Nos. 122, 152, 182 and 196 stoves. It keeps down every particle of dust in removing ashes, a feature that will be appreciated by every tidy housekeeper.

The ash pans used in other stoves are too small to hold a full 24 hours' accumulation of ashes. They are usually over-filled when removed, and the ashes in the bottom of the stove are dragged out on to the carpet, as shown by cut No. 2. You are all fam-

DUST PROOF

iliar with the ash pan method, and have, no doubt, gone through the process many times of spreading a newspaper or cloth under your stove every time the over-filled pan is removed.

The ash pan is not only dirty, but is a great evil in stove construction. It adds a door and joints which can be made only temporarily air-tight by the use of stove putty. These joints open after a few weeks' use, rendering ash pan stoves worthless as fire keepers. It makes them fuel-eaters rather than fuel-savers. The ash pan and the shield for guiding ashes into the pan, also prevent base heat.

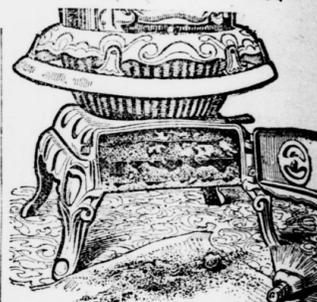

Our method is the only clean way. The whisk broom, turkey wing and dust cloth are dispensed with. There are no joints to leak air, base heat is not retarded and Cole's Hot Blast is the cleanest stove, the best floor heater and the only stove in the world which can be guaranteed to remain always air-tight.

SMOKE PROOF

The feed door on this stove is guaranteed smoke proof and does away with the escape of smoke, soot and gas into the house. Side feed doors used on other stoves discharge a cloud of gas and soot-laden smoke into the house and scatter soot and ashes over the carpet when opened.

Another point: In feeding coal into a side feed door it has to be thrown into the stove, which usually results in scattering much of it over the floor. With our cleanly smoke proof feed door the coal is poured into the stove even to the dust in the bottom of the hod without a particle being spilled on the floor.

This clean and economical stove burns the gases which often escape into the rooms with other stoves. The annoyance and dirt from kindling new fires is dispensed with, as the rooms are heated up for two or three hours each morning with the fuel put in the night before and the **Fire is Never Out.** COLE'S ORIGINAL HOT BLAST is the cleanest stove made and will more than save its cost in fuel each winter.

Cut No. 2
Shows the dirty ash pan method.

Home Again.

The bear killers have returned! John E. Richards and Wm. Martin have returned to Kennewick from their gory exploits amid the snowy wilds of the Blue Mountains in eastern Oregon. Both report a successful trip but neither have been caught soliciting orders for venison or bear skins.

Luke Walsh did not join the party as at first intended. This was regrettable as Luke has an A1 reputation as a bear fighter. When a boy in northern Wisconsin he used to trap and kill enough bears to keep the settlement in meat, besides supplying himself with circus money from the sale of the pelts. Parties who have never seen Luke and a full-grown grizzly engaged in mortal combat have missed a fine sight.

The health of the party while absent remained excellent. John claims that Bill did the cooking and Bill says that John did it. The appetites displayed by both hunters upon their return did not substantiate the claims of either party.

The bear fighters left with the intention of getting as far from the madding crowd as possible. They pushed on into what they considered the untrodden wilderness and pitched camp, only to be rudely awakened from their dream by an old foot-hill rancher who ordered them out of his hog pasture.

While the deerslayers were unloading their outfit after returning home, a bystander noticed the following lines inscribed upon the lid of a cracker box:

I'll hie me back to the widwood glen,
I'll take a shot at that buck again;
I'll load my rifle with silver coins
And plug the "critter" between the horns.
The pesky brute must be bewitched;
I aimed for center, but I'll be switched
If he didn't curl his tail and run—
Yes, he got away, the son of a gun!

Reclamation Fund Not Exhausted.

The latest information from Secretary Hitchcock of the interior department on irrigation projects is contained in the following telegram received last evening by Congressman Jones at North Yakima: "The statement published in Spokane and Portland newspapers to the effect that the reclamation fund had been exhausted by projects already approved is wholly unauthorized and without foundation. The restricted fund of Washington has not been and will not be used elsewhere. The proposed projects of Washington are still under consideration."

Engineers of the reclamation service are preparing to continue their work. They say that should the Tietah project be approved it will be next summer before construction can be commenced.

KIONA

Mrs. John Finlay is visiting in Tacoma.

A mock trial is set for Thanksgiving week.

The Gee club is doing some good work "Bluebell" will be given Friday evening.
