In the absence of Dr. McCoy, the company physician, who was in Wenatchee, Dr. Shore was called in and dressed the injured man. He is in the hospital and at last accounts was doing as well as could be expected.

**A Change in the Public School**

The school directors of this precinct had contracted for the services of C. E. Greene as principal, and he opened and taught the school for two weeks. Last week he notified the directors that he was compelled to resign and asked the board to secure another man. The reasons Mr. Greene gave were not altogether satisfactory, but the board thought best to get a new man rather than keep one who was trying to get away, and consequently employed Paul H. Buck who was recently engaged in teaching in the public schools of Skykomish and was well recommended.

**Uncle John Fears Trouble**

Our old friend John Holden has an advertisement in the Echo, and knowing the effect of advertising, he is fearful of the result. He is afraid he will be so overwhelmed with work that he can not attend to it properly. He wants it distinctly understood that he does not want much more than he already has, and we have agreed if he gets more business than he can attend to, as a result of advertising, to divert the stream of customers into some other channel. The Echo can be equally as powerful in keeping customers away from him as in bringing them to him. Having once got the stream started his way, if there is no other way, as a last resort we might suggest that he has contracted the bubonic plague, or some thing of the sort. Never mind, Uncle John, if they come too thick we will manage in some way to relieve you.

Two engineers who formerly lived here and are well known, but who now reside in Hillyard, are reported as the victims of a hold-up man in that town last week. Otto Donaldson and L. E. Adams it is said were both held up by the bold bad man. The boys say they must have lost their wad as they have been trying to borrow money since. The bad man not only took their money, says the report, but bruised them up a lot.

On last Friday morning a track walker by the name of Alkyre was overtaken by the east bound passenger train in a cut near Chiwaukum. He tried to get out of the way by crawling up the embankment and fell backwards, his head striking a step, producing a scalp wound which, however was not serious, but he got his left hand on the rail and had the first, second and third fingers cut off. Dr. Hoxsey was called from this place and dressed the wounds. Alkyre is reported as getting on all right.

Quite a number of the railroad men have availed themselves the past week of an opportunity to study and investigate the air brake system in use on the railroad. A Great Northern instruction car has been side tracked here for four or five days the past week in charge of an expert who each day gave a practical explanation of the system. The car was fitted up to show the workings and use of every part connected with air brakes. No doubt the instruction will do the railroad men much good.

On September 2nd we received a letter from our correspondent at Chiwaukum, too late for the first issue in the month, and we intended to use it for the issue of the 9th, but in some way the letter was misplaced and not found until it was altogether too late to be used. We trust our Chiwaukum correspondent will overlook the omission and continue to furnish us with the news from that point, promising to take better care of her copy in the future.

Singing, recitations, story telling and dancing made the time pass pleasantly. At the hour of midnight a splendid supper was served such as the hostess is famous for. A picture of the guests and beautifully decorated table loaded with the choicest viands of the season was taken by Mrs. Bottsford, the guests being grouped about the host and hostess.
