From a letter recently received from T. F. Russell we learn that he and his wife have located at Sherwood, North Dakota, a new town, two months old, three miles from the Canadian line. It has two newspapers, four banks, a bonded warehouse and nine grain elevators. It will be grain center for a large section of country. Mr. Russell says he has sold over fifty thousand dollars worth of town lots and is doing well, which his friends in Leavenworth will be glad to hear.

The farmer has wheat, oats, hay, fruit, vegetables and many other products to sell. The merchant also has innumerable articles to sell. Neither of these is expected to give his stuff away. A newspaper has but two articles to sell, advertising space and subscriptions. You will readily see why we cannot advertise your business or help you to earn money free of charge. Our business is to sell advertising as yours is to sell goods and offer your services to the public for a certain sum. You see the point, don't you.

Work on the building will begin next week. It is the intention of the Foy Brothers to add later on an evaporating plant and a pickle and vinegar factory. This will prove one of the very best investments the town has made. A canning factory will take care of all the surplus fruit and vegetables and prove a boon to the farmers of the entire Wenatchee valley.

One day last week the two children of William Krauch, of Center, Wisconsin saw their mother cut a chicken's head off with an ax, and, wanting to cut something's head off, like their mother, they laid hold of their little baby sister, as there was nothing else at hand. The little fellows laid the baby's head on a block and the elder boy lifted an ax and struck at the baby's neck. The blow went wide, and as he raised the ax to strike again he was stopped by a farmer who happened to drive by and saw what the children were doing.

A preconcerted effect is evidently being made to influence public sentiment in favor of the restoration of the army canteen. Interviews with prominent army officers are appearing in leading papers, and in every instance the officer deprecates the absence of the canteen, claiming that it tends to promote morality and good conduct among soldiers. This is a question that requires a practical knowledge of its effects before passing judgment upon its merits. It is taken for granted that the minimum amount of drunkenness and immorality among the soldiers is the object which both sides are aiming at. The question is, does the canteen aid in attaining this result by keeping the soldiers out of saloons and dives in the cities? The army officers quoted claim

departments of government. "I doubt if I have the opportunity, prior to assuming office, to make that personal investigation of the public institutions that I desire to make before announcing the majority of the executive appointments and certainly the early part of my term will be taken up largely with duties arising out of legislation. Nevertheless, I propose at the earliest possible moment to take up the matter of appointments. As I am informed, there are a number of offices in which the incumbents have yet some time to serve. There will be an inclination to permit those office holders to serve out their terms, with the exception of those who do not deserve consideration. "I desire it understood that all applications for public position must bear the indorsement of the county central committee and the state central committee of the applicant's county. I propose that the machinery of the republican party shall be utilized so that when a man receives an appointment he receives it not from the governor, but from the party itself. Fitness, however, will be the first consideration in the making of all appointments.
