Cost of Doing Business Increasing

Cost figures show that, during the last twenty-five years, the expense of running a retail store has about doubled.

Manufacturing costs have climbed steadily.

Costs of producing farm crops have risen and are rising.

Prices of labor and material have gone up.

Cost standards of even a few years ago no longer apply to any business.

The most stable businesses are constantly undergoing re-adjustments to offset rising costs.

Up-to-date cost figures which are constantly before the bosses enable them to keep their businesses on a sound basis in the face of rising costs and reduced net profits on individual transactions.

This is true of the small business as well as the large one.

The cost of operating a bank has increased along with increases in other lines. Meeting the situation has brought us into close contact with cost problems in general and convinced us that they need constant attention, because costs are never stationary.

Watch for other advertisements we will publish from time to time. They will contain some general suggestions as to how to meet rising costs. Also feel free to consult us at any time. We can probably give desired information or tell where to get it.

It is a part of our business to be of service in business as well as financial matters.
