John Peters of Sunnyslope, came up last week for a truck load of lumber.

MILLER A CANDIDATE.

Vic E. Miller, deputy sheriff, is a candidate for the nomination for sheriff, asking support as a republican. He is the first county candidate to seek support in this section of the county.

Mr. Miller has been a resident of the county for eighteen years, coming to Wenatchee in 1902 with his

family. His wife has since died, but he kept the children together until they reached maturity. They now all have homes of their own or are holding responsible positions and are self-supporting.

For a number of years Mr. Miller was employed as caretaker of the county court house and acted as deputy and jailer much of the time. He resigned as caretaker last spring and has been field deputy sheriff since May 1. His experience as deputy will enable him to properly conduct the office if nominated and elected.

CARD OF THANKS.

We wish to thank the neighbors and friends who so kindly assisted us during the illness and death of our baby daughter.

Mr. and Mrs. D. J. Nicholson.

TO HOLD SUPREME COURT ELECTION.

Co-incident with the party primaries Sept. 14 and the general election in November, a non-partisan election for three Justices of the supreme court will be held throughout the state. However, candidates who receive a majority of the votes cast for the supreme court in the primary election are elected without further contest and it is possible that the supreme court election will be determined in the primary.

Justice J. B. Bridges, Chief Justice O. R. Holcomb and Justice Warren W. Tolman, whose terms are expiring, are candidates for the three positions on the bench to be filled.

ALASKAN FACTS.

The Alaskan National Forests not only contain approximately 100,000,000 cords of pulpwood timber but also the second chief essential of a paper-manufacturing industry—enormous water power possibilities.

It should be understood that timber is sold from the National Forests of Alaska only for immediate and continuous operation, and that the general policy or form of contract does not permit the acquirement of timber on a speculative basis.

Fifteen water power projects in Alaska were developing a total of 37,350 horse power in 1917, for the region of southeastern Alaska. These plants furnish power for mining and various other industries. The largest plant in southeastern Alaska develops 5700 horsepower.

The largest towns in southern Alaska are Juneau and Ketchikan. Ketchikan, which lies at the extreme southern end of Alaska, is only 670 miles from Seattle, and approximately only one-third of the distance from Seattle to Dawson on the Yukon River.

The Forest Service is allowed by law to sell stumpage only from the National Forests. The purchaser of timber has no cut-over problem, since the Government retains title to the land. Any legitimate use of the land incident to the development of the project is allowed at a nominal consideration, or for some uses, free of charge.

SEATTLE MARKETS.

Western avenue dealers assert that the general tendency of prices is downward in most lines of products, including live stock. There was a marked downward undertone for perishable fruits which unsettled futures. Weakness was a feature of the opening day in the live stock market, hogs falling 50 cents and packers reluctantly paying Saturday's prices for cattle. Jobbers of spuds

say there will be an ample crop and there is no reason for haste in closing future contracts. Bids for pears have fallen from \$90 to \$65 per ton at the orchards. There was only a 25 per cent of normal crop of Loganberries, sales being made at \$4 per crate.

At a joint meeting of creamery men and retail dealers on Monday co-operation to prevent illegal "watering" of butter was promised. Egg and butter shipments to the East have virtually ceased, with a consequent sluggishness in those commodities. But jobbers do not expect a decline as storage will begin in the near future. New Zealand butter is being offered for September delivery at 51 cents less duty.

The July report of Inspector Rhodes shows that 64,080 packages of the total of 244,565 packages of fruits and vegetables were shipped to Seattle from state points, the remainder coming here from California and other producing centers. The state products were apples, mixed fruit, potatoes, onions and mixed vegetables.

FOR COUNTY ATTORNEY.

Sam R. Sumner has announced his candidacy for prosecuting attorney in the coming primaries. Mr. Sumner is an old resident of the county and is not a stranger to the voters, having in the early days been a school teacher and served in the legislature and also as county attorney. His reputation as an able attorney, probity and reliability as a citizen and legislator is vouched for by those who know him and, if he is nominated and elected there is no question as to the careful, conscientious and reliable conduct of such business as comes to his office.—(Paid Adv.)
