Mrs. H. K. Johnson went to Skykomish last Friday to visit a few days.
Grandma Schaffer, who had been visiting at the Elmer Ogden home, returned to Wenatchee last Friday afternoon.
Clifford Newdall came home from Seattle the first of the week for a short stay with the home folks, Mr. and Mrs. Bert Hagler.

Phil O'Larey dropped off No. 1 Sunday for a visit with old friends and relatives here—coming from Othello where he has been employed in a store.

CHIPS AND SPLINTERS.

Spring is here, so is cleaning day. A scrub is the beginning of the end. Something that is sweet yet healthy—honey.

In eggs there is health, energy and economy.

Sunlight destroys germs, let it stream in.

A low sink causes many a backache. Make it higher.

Washington stands well in the production of honey.

The food value of eggs is not affected by their cheapness.

Canned eggs go well in the winter. Preserve them when cheap.

Fireless cooker—heat stones put in food and leave until meal time.

Honey is a natural sweet and not a substitute or a manufactured product.

Butter is about 52 points above the 1913 price, beef cattle 22 points below.

A mower that cost \$53 in 1913, \$105 last year, now can be bought for \$90.

Simplicity, comfort and becomingness make for the well dressed woman.

The war is over but gardening should never be a forgotten home occupation.

The purebred sire campaign is bringing good results by eliminating the scrub sire.

Every farmer should give some of his time and energy in promoting the interest of farming.

Dishwashing may seem tiresome but often it is the way dishes are handled which tires the washer.

A good purebred sire from heavy milk and butterfat production will increase the coming herd average.

Keep the home garden free from weeds during the early part of the season and it will take less work later.

The by-product of a general farm is manure. Sometimes the by-product in manufacturing is worth more than the product. This might apply to manure.

There's good authority for the statement that George Washington owned America's first mule. The mule was a present to Washington from the King of Spain and was named Royal Gift.

—State College Bulletin.

VISION OF FUTURE TO BE BUILT ON LINCOLN HIGHWAY.

Plans have been received by the Bureau of Public Roads, United States Department of Agriculture, for the "Ideal Section" of road to be constructed on the Lincoln Highway in Lake County, Ind., during the coming summer. The designers of this road intend to produce in it their vision of what the main highways of the country must be in the future. The plans submitted by the State Highway Department of Indiana show that the section will be nearly 1 1/2 miles in length and will be placed in the middle of a 100-foot right of way. The roadway is to be 40 feet wide and provision is made for the use of concrete, bituminous concrete, or brick sections with 5-foot gravel shoulders on each side. Each type of

surface is to be of a thickness calculated to withstand heavy traffic. Night traffic will be made safe by electric lights 35 feet above the roadway at suitable intervals on one side of the road. All electric wires will be underground.

For pedestrians a 5-foot gravel sidewalk will be placed in one of the 25-foot strips of parking which are to be on each side of the road, and the parking will receive effective landscape treatment. It is not thought that present traffic justifies the width of roadway to be built, but rather it is intended as an object lesson for the future, and the traffic studies to be made on it will be valuable in settling many questions as to the relation of traffic density to road width, the best methods of traffic regulation, and other problems that are becoming more important each year. Federal aid will be granted on this highway at the rate of \$20,000 a mile.

LAMB WEIGHS 79 POUNDS IN 78 DAYS.

Dr. Bob Prior of Yakima reports that he has a 78 day old lamb which weighs 79 pounds and that the average weight of his lambs at that age is 65.8 pounds. These five lambs were dropped December 18 and 19 and were sired by Hampshire rams and out of Lincoln-Rambouillet crossbred ewes. The Hampshire ram as a sire of market lamb on such a cross is recommended by the extension service of the State College.

Mrs. R. W. Van Tassel, teacher in the Leavenworth schools, went to Wenatchee Saturday for the week-end on the ranch near that city.

COST OF PAVING COMPILED ON TYPES OF MATERIAL.

Average costs per square yard of various types of paving for century roads have been compiled by the Bureau of Public Roads, United States Department of Agriculture. The figures cover 68,000,000 square yards of paving constructed with Federal aid in all parts of the United States during the period 1916-1921. The costs per square yard are as follows: Sand-clay, 18 cents; gravel, 46 cents; plain and surface-treated macadam, 95 cents; bituminous macadam, \$2.10; bituminous concrete, \$2.50; plain cement concrete, \$2.57; reinforced-cement concrete, \$2.74; and brick, \$4.10.

These figures cover only the cost of the paving; they do not include the cost of grading, and officials point out that it must not be assumed that roads of the several types can be constructed in any locality at these figures. For example, the cost of bituminous concrete varied from \$1.70 in the New England States to \$3.13 in the group of states including Kentucky, Tennessee, Mississippi, and Alabama. In one group of States the cost of brick dropped to \$2.40. Costs of constructing these types in the various groups of states have been compiled and can be obtained from the bureau.

From a Bride:

"As a young housewife of only two and one-half years' experience I am glad to find that even we amateurs can cook successfully if we use Royal Baking Powder."

Taste is a matter of tobacco quality

We state it as our honest belief that the tobaccos used in Chesterfield are of finer quality (and hence of better taste) than in any other cigarette at the price.
