

# ABERDEEN HERALD

ABERDEEN, CHEHALIS COUNTY, WASHINGTON, THURSDAY, JULY 18, 1895.

NO. 41

## OFFICIAL REGISTER

**ABERDEEN CITY GOVERNMENT.**  
Mayor..... James A. Hood  
Treasurer..... W. H. Mack  
Clerk..... W. O. McKinlay  
Attorney..... C. R. Bell  
Health Officer..... John Steen  
Police Justice..... S. J. White  
Council—B. J. Garman, J. S. Gunn,  
N. G. Kaufman, L. J. Kolls, F. H. Tanner,  
C. S. Weatherwax, Alex. Young.  
U. S. Deputy Collector of Customs for  
the port of Grays Harbor, Peter Autzen,  
of Aberdeen.

**CHEHALIS COUNTY OFFICIALS.**  
Judge..... C. E. Sackett  
Clerk..... J. E. Lyons  
Treasurer..... J. G. Lewis  
Sheriff..... J. A. Graham  
Assessor..... J. B. Bridges  
Coroner..... Seth Warren  
Supt. of Schools..... J. A. Hutcheson  
County Engineer..... O. P. Burrows  
Commissioners—Wm. Anstie, J. O. Coy,  
J. D. Kirkaldie.

## COUNTY, STATE AND GENERAL.

### COUNTY HAPPENINGS.

**FROM WESTPORT.**  
Tuesday hot, Wednesday hotter, 93 in the shade, which everybody was seeking. The Episcopal tent is set up on the park grounds, and services are now being held every day.

There was only one scrap in town Sunday,—over some difficulty in the hall game. Both the participants whipped, of course. If you want to clean a star fish put it on an ant hill, you know.

The beach was struck with a cyclone of people Sunday. Every coast town was represented; the old wreck was partly carried away by helter skelters; and the lamed and peanut vendors did a good business.

Everything possible is being done for a grand season at the beach, even the old wreck, Nora Harkins, contributing; her decks being trodden by more sightseers than any other spot on the beach, for the reason that the old ship had on board one of the best equipped restaurants and lunch counters on the beach.

Mr. Noah Tripp, an old resident here, was found dead in bed Friday morning. He had been ailing for some time, but was not thought to be seriously ill. He was in his 73rd year. Mr. Tripp was familiarly known as "Uncle Tripp," and was esteemed by all who knew him; he lived alone in a house a little way back in the woods, to which he had gone from town Thursday evening, not feeling well, and it supposed that he laid down to rest after pulling off his shoes, as he was found in that condition next morning. The coroner was called who pronounced the cause to be apoplexy. Rev. Thompson was appointed administrator.

**FROM HOQUIAM.**  
Hoquiam was depopulated Sunday. A. H. Kuehn is home from the South. F. B. Huff is building an addition to his residence.

Henry Eberting has returned from his trip to the Humptulps.

Mrs. Hollis Davis and children are home from South Bend.

Hudson Benner is on the streets again, a mere shadow of his former self.

If the Hoquiam boys are defeated in a game of ball they are a success in the pugilistic line.

Miss Minnie France is spending the week at Vashon, where she has gone as delegate for the I. O. G. T.

Miss Laura Smith came home, Friday, from Oregon where she has been attending school during the past year.

(Place, Westport—Time, Sunday p. m., July 14.—Characters, middle-aged man from Hoquiam with his bicycle; dude promenading with two pretty girls; Hoquiam man leaning over his wheel and watching races.)

Dude to Hoquiamite—"Hello! old man. Can't you ride that wheel? If you can't, let me have it. I can."

Hoquiamite—"Hold on, sonny, stand still; let me look at you a minute; it does my old eyes good to see a green spot on this sandy beach." (Dude departed amidst roars of laughter.)

From Washington Economist:  
C. V. Minkler returned Wednesday from his Oregon trip. While there he traded one of his Chehalis valley farms to a Mr. Elder for a ranch in Lake county, Oregon.

J. N. Locke, of the Quinalt lake colony was in town several days the past week. He presented a petition to the commissioners asking for the appropriation of \$500 to improve the road in his district. By that way the roads and trails are long in that part of the country and the Quinalt settler has to go over a trail for 20 or 25 miles afoot, as a rule, before he gets to the road.

From Hoquiam Washingtonian:  
It is reported that Sea Light struck ground at the mouth of the Queets, but was not injured.

The Hoquiam and Montesano teams will cross bats for the money raised for the Fourth of July game in a short time, perhaps the last Sunday in July.

Rev. Revelle and wife returned Friday from the Quinalt reservation where Mr. Revelle performed the marriage ceremony on three couples of Indians. They report that the school house had been nicely decorated and that the Indians took great pride in being married like "Boston men."

From Montesano Vidette:  
The number of instruments filed for record in the auditor's office is on the increase.

Mrs. Wood, mother of A. D. Wood of Aberdeen, has been the guest of Miss Ennis several days the past week.

W. R. Darral, of Brookville, Pa., who has been in the county for several weeks, leaves about \$11,000 in cash among some of our citizens, having made purchases of timber lands here for parties in the east.

The many friends of Z. T. Coy in this community will be pleased as surprised to learn of his marriage which took place July 13, at the home of the bride's sister, in Whittier, Cal. The bride was Miss Maggie Weeks, a most estimable and accomplished lady, who is well known in Montesano, having been a successful teacher in our public schools.

## EVERY ONE IN THIS VICINITY KNOWS MR. COY, AND WILL HEARTILY UNITE WITH US IN EXTENDING CONGRATULATIONS.

We understand that the supporting timbers of the Satsop wagon bridge are badly rotted and will have to be replaced. The commissioners went to the Satsop to examine the bridge, and also to inspect that portion of the Jas. Gleason road which they have been petitioned to vacate. They found the bridge in immediate need of repair.

## NEWS OF THE STATE.

The price of grain sacks has been reduced to 4.9 cents each by the directors of the state penitentiary.

The government experts are now at work on the famous school section, at Tacoma, endeavoring to find out if there really is gold there, as McBride claims.

Trains on the Northern Pacific have been delayed this week owing to the burning out of a timbered tunnel in the Cascade, but which has now been repaired.

The supreme court has sustained the decision of the lower court in the case of Seattle's ex-city treasurer, and Krugg will have to serve his seven years in the penitentiary.

The first trainload of hogs for the Pacific Meat company's new packing house arrived Sunday, and consisted of 1,000 hogs of the remarkably good average weight of 350 pounds. The consignment was from Uniontown. The plant commenced operations last week and will be slaughtering and curing upon an extensive scale within a short time.

Crop reports received from all over Eastern Washington are of the most encouraging kind and indications are that if the weather continues as favorable during the present month as it has been the fore part of the season the crop this fall will be the largest ever harvested in the state. Grain men who have traversed the wheat fields throughout the Palouse, the Big Bend and Walla Walla districts say that the stand of wheat was never more even nor presented a more fine or healthy appearance than it is to be seen this summer and if all signs do not fail the granaries in the fall will be overflowing with the golden grain. The farmers have all taken on a hopeful feeling and in anticipation of a good price for wheat they look forward to a season of prosperity when they can pay up all old debts and have something left over to live on. Fall wheat has all headed out and is past the danger point where the elements can affect it. Spring grain is now mostly up to the height of the second joint and will commence to head out along the latter part of this month. The only thing the farmers have to fear is that hot, dry winds might prevail, but this is not likely as the weather thus far has never been more favorable and from all indications sufficient moisture will prevail to insure the safety of the growing crops.—Spokane Chronicle.

**IN GENERAL.**  
Mrs. N. K. Fairbanks, wife of the millionaire soap manufacturer, is dead.

At the elections in England this week Henry M. Stanley, the explorer, and John Burns, the labor leader, were elected to seats in the house of commons.

The relations between Peru and Bolivia are strained, and war between them is imminent.

The Democrats of Georgia have lost interest in their coming free-soil convention. Only a corporal's guard attending the primaries.

A decree of foreclosure has been ordered in favor of the American Loan and Trust Co., and against the Oregon Short Line and Utah Northern Railway companies.

The Rio Grande river is on a rampage, and is doing great damage by overflowing the valley. El Paso and other towns are inundated.

Stephen Stambuloff, ex-dictator of Bulgaria, and still a foe to Russia, was attacked Monday evening on the streets of Sofia, and may die.

Little Rock Camp Meeting.  
The camp meeting at Little Rock, which convenes Aug 7, lasting ten days, will be a pleasant and profitable plan to spend a few days.

Wooden cottages 10x12 feet, put up in good shape, will cost \$15 outright or will be rented for ten days for \$3.00 each.

If seven or more orders are sent in, canvass tents 10x12 will be provided at \$3.00 each for the ten days. These tents sell for \$7.00 each. If rented, poles, etc., will be furnished.

Material for wooden cottage 10x12 feet will cost about \$10, so you can save \$5.00 by building it yourself. Satisfactory arrangements will be made for permanent ground lease. It will be cheaper in the end to put up a cottage. Send all orders for and inquiries about cottages to Rev. A. S. Gregg, Tacoma. Orders must be sent not later than August 1.

A special rate will be made by the Northern Pacific Railway Co.

Pasturage for horses will be furnished free and feed will be sold at the grounds.

Provisions of all kinds will be on sale; fresh milk, butter and eggs delivered daily.

For information address the Secretary, Rev. A. S. Gregg, Tacoma, Wash.

Hood's Pills have won high praise for their prompt and efficient yet easy action.

## COUNTY REAL ESTATE TRANSFER.

The following are the real estate transfers for Chehalis county, Wash., for the week ending July 13, 1895, furnished by D. W. Fleet, manager of the Grays Harbor Abstract Co.:

Nina L. Calder to Nellie Davis, blk 67, Chehalis City..... \$ 80  
Bonj Zeebwyth to J S Hays, 30-foot strip on north end lot 13, blk 1, Hays add, Montesano..... 1  
Same to same, und $\frac{1}{2}$  lots 13, 14, blk 1, Hays add; lot 4, blk 2, McBride's 2nd add Montesano; lots 7 and 8, blk 14, Peterson..... 250  
W Moore to John M Burt, 10 $\frac{1}{4}$  ac in sw $\frac{1}{4}$  sec 30-18-6..... 1000  
John M Burt to Josie M Burt, same property..... 1000

Same to Lucile Cochran, lots 5 and 6, blk 16, W & B's add Aberdeen  
U S to Peter Oleson, sw $\frac{1}{4}$  of n $\frac{1}{2}$  w $\frac{1}{2}$  of sec $\frac{1}{4}$  and s $\frac{1}{2}$  of sw $\frac{1}{4}$ , sec 9-18-8..... Pat  
Same to Chas Furlow, s $\frac{1}{2}$  of n $\frac{1}{2}$ , sec 33; s $\frac{1}{2}$  of n $\frac{1}{2}$  and n $\frac{1}{2}$  of sec $\frac{1}{4}$ , sec 32-21-9..... Receipt  
Same to Joseph W Rainey, n $\frac{1}{2}$  of sw $\frac{1}{4}$ , s $\frac{1}{2}$  of n $\frac{1}{2}$ , w $\frac{1}{2}$  of n $\frac{1}{2}$  and n $\frac{1}{2}$  of sec $\frac{1}{4}$ , sec 32-21-9..... 200  
Samuel Benn to L B Willey, lot 11, blk 2, Central add Aberdeen..... 20

## BAFFLING BURGLARS

SAFES AND LOCKS WHICH ARE PROOF AGAINST TAMPERERS.

Each Bank of England Lock Costs \$375, and Has 392,880 Different Combinations. Elaborate Mechanism to Protect Treasure Vaults.

There is no denying the fact that the burglar of today, who aims at high game, displays amazing ingenuity in the manufacture of scientific tools and apparatus and also in the practical working of the same.

But he is completely out of the running when pitted against our safemakers and locksmiths, even though he periodically buys their wares for experimental purposes.

While the present writer was being "personally conducted" over the premises of the greatest firm of locksmiths in the world he acquired much interesting information concerning these wonderful pieces of mechanism which protect the vast riches of palaces, banks and strongrooms, and which render it absolutely impossible for thieves to break in.

Perhaps the most interesting department was that one in which an exhibition of the highest form of the burglar's craft was being given. Skilled workmen were sent before locked safes and were using the almost irresistible fusing apparatus on the door in order to reach the locks or were forcing gunpowder through the keyholes by means of a tiny pair of bellows.

Others were squirting corrosive chemicals into the locks and noting the effect, while sturdy artisans were using the drill and the wedge with a scientific force and skill that showed they could be dangerous enemies to society if they were criminally inclined.

The fusing apparatus consists of a cylinder of compressed oxygen gas, which supplies a short section of pipe terminating in an iron cap. The latter is pressed firmly against the door after a light has been applied, and a stream of flame issues from the end of the pipe in its bottom. So fierce is this flame that it melts the metal in the safe door and cuts a jagged hole through it in a remarkably short space of time.

"We turn out about 288,000 locks every year," remarked the manager of the works, "and they range in weight from a quarter of an ounce—including keys—to 225 pounds, the respective values of these extremes being 12 cents and \$1,500."

"Foremost among these locks which protect enormous wealth come those on the treasury doors of the Bank of England. The making of each of these marvels of mechanism occupies three men for six weeks and costs \$375.

"These little fluted pieces of steel in the head of the key—technically called 'steps'—are nine in number and are capable of 392,880 different combinations.

"If a banker whose safe was fitted with this lock chanced to lose his key, or if he had reason to suppose that a wax impression of it had been made, all that would be necessary in order to baffie burglars would be to un-lock the safe with the duplicate key, unscrew the head and change the position of the steps and then relock the safe or strongroom.

"The mechanism of the lock would instantly adapt itself to the changed combination and could never be unlocked by the former key.

"This, however, is not an unmix-ed blessing. One afternoon a certain city merchant was amusing himself by unscrewing the steps of both his keys when it suddenly occurred to him that he had forgotten the combination.

"As the keys in question were capable of thousands of combinations, there was nothing for it but to set to work on a system of numbered tables and tick off each combination as it were tried.

"But that may take months," objected the merchant ruefully. Well, as the only other alternative was to build a furnace round the door of the safe it was decided to try the combination first.

"We sent two men and an apprentice with the printed tables—great sheets of paper several yards long—and after nine days' labor, during which about 18,000 different combinations were arranged and tried, the right one was hit upon by accident, and the door opened. Needless to say, there was a pretty big bill against the customer who gave us all this trouble.

"The treasury doors at the Bank of England measure 7 feet 3 and weigh about 2 $\frac{1}{2}$  tons. Besides being fitted with the above mentioned changeable locks they have violence locks 5 feet long, each of which weighs 200 pounds, and gunpowder proof locks, having blowholes on every side, even through the massive bolt. These blow holes allow the gunpowder pumped in to escape and reduce the force of a possible explosion to a mere harmless puff.

"It is worthy of note that there are more than 10,000 locks fitted in the Bank of England. Then comes the Savoy hotel with 1,800, controlled by one master key. The manager of each of the six floors at the Savoy, however, has a master key which controls the lock of every room under his supervision.

"Her majesty's safe at Windsor castle in which the gold plate is kept weighs eight tons and is protected by a violence lock 18 inches long, a changeable lock 8 inches long, a changeable lock 8 inches long, all of which can be mechanically covered by an undrillable steel plate, which renders it impossible to insert even a hair-pin into any of the keyholes."—London Answers.

**Guarding Royalty.**  
Fresh precautions have been adopted in England, as in other European countries, for guarding royalty. Scotland yard detectives now accompany the Prince of Wales and the Duke of York whenever they appear in public places.

Get your milk at the Pioneer Dairy, if you want good milk and good measure.

## BOY RULERS.

The Present Seems to Be an Age of Youth With European Royalty.

This may indeed be called the age of youth with an 8-year-old monarch on the throne of Spain, a 13-year-old queen of Holland, a 19-year-old khedive in Egypt and an 18-year-old king at Badm. With regard to the latter I learn from a friend who has recently been in Serbia the following account of how King "Sacha" spends his day. Although rarely in bed before midnight, he is up early in the morning and, arrayed in the undress uniform of a general, receives his court marshal, his aides-camp in waiting and his secretaries, who present to him their daily reports and take his instructions.

After glancing over the newspapers he receives his ministers at 10 o'clock and then dons his uniform and dons himself for luncheon, which is served in the small dining room of the palace, and the young king usually sits opposite his father, who does all the talking. Then conversation is generally prolonged in the smoking room after luncheon, until 2 or 3 o'clock, Milan smoking innumerable cigarettes, a habit in which he is imitated by his promising son, a drive to his suburban palace of Topchida following. It was here that his grandfather, King Milosev, was so cowardly paroled by Karageorgevich.

At 6 o'clock the daily council of ministers takes place, at which the king presides, and at 8 o'clock dinner is served, after which the king generally accompanies his father to the theater or to some great official ball. From this it will be gathered that he has little opportunity for reading, exercise or instruction of any kind, and the existence that he leads can only be described as the reverse of wholesome for so young a man.

Perhaps the most unwholesome feature of it all is his association with his father, who, when his son visited him at Paris a year ago, disgusted even the most cynical and hardest of the French boulevardiers by making the lad acquainted with the principal members of the demimonde.—New York Recorder.

## IMPURITIES IN FOOD.

They Are Not as Common as Many Persons May Suppose.

Singularly exaggerated ideas concerning the adulteration of food are very generally held, according to Dr. H. V. Willey, chemist of the United States department of agriculture. Sand, for instance, is not sold with sugar—at least in the United States.

The granulated and lump sugars in the market are almost absolutely pure, powdered sugar sometimes, though rarely, contains a little flour or starch, and low grade sugars are impure chiefly through the molasses and water they are made to absorb in manufacture.

Not as good a report can be given of sirups. There is very little pure maple sirup, most of what is sold as such being a mixture of glucose or cane sirups, with a small proportion of the product of the maple, while in an imitation of the quality protected by a patent the maple flavor is given by an extract of hickory bark. Liquid honey is largely adulterated with glucose. Of comb honey, however, only that in bottles and jars is pure, the old impression that comb honey on the frame is adulterated having been proved to be erroneous.

Ground coffee is so largely adulterated with chicory, peas, beans, etc., that it is rarely found pure, and even the unground berry is imitated. Tea is rarely mixed with foreign leaves, but frequently of its value is increased by the addition of salts of iron and copper—materials quite prejudicial to health. Cocoa and chocolate are largely adulterated with starch and sugar, and products claimed to be greatly improved as to digestibility may have little of the virtues of the original cocoa bean left in them.

A danger in canned goods is the use of adulterated tin, which may contain as high as 12 per cent of lead, the organic salts formed by the corrosion of the lead being always poisonous. The common practice of coloring canned peas with copper is very objectionable. The use of preservatives, such as salicylic acid, is not without risk, while an occasional source of danger is the development of nitrogenous bodies called ptomaines in preserved meats. The above are illustrations of the principal food adulterations, which, though bad enough, are insignificant in comparison with the startling reports that have been published. Much the greater part of foods we eat is pure and wholesome.

## Gallantry Remarkable.

"I think that Mr. Bellefield is the very politest man I know," said Miss Hiland to her particular friend.

"What has he done now?" asked Miss Dukane.

"You know he will never keep his seat in a street car if there is a lady standing."

"I know that."

"Well, I got in a crowded car the other day, and Mr. Bellefield was there. He did not have a seat to offer me, but he said, as graciously as you please, 'Won't you take my strap, Miss Hiland?'" —Pittsburg Chronicle-Tele-graph.

## A Costly Opinion.

Judge Ira Peckly believed in the justice of his client's cause. He would not enlist in it otherwise. At one time a sharper tried to retain him and was smothering over his crooked conduct as well as he knew how, when the judge astonished him by exclaiming, "I think you have acted like an infernal scoundrel, sir!"

"Is there any charge for that opinion?"

"Yes, sir; \$5!"—San Francisco Ar-mourer.

Do you want a carpet? I have a line of carpets that will please you, and at very low prices. Call and see them and my stock of household goods.

W. B. MACK,  
City Treasurer.

Reader, did you ever take SIMMONS' LIVER REGULATOR, the "KING OF LIVER MEDICINES"? Everybody needs take a liver remedy. It is a sluggish or diseased liver that impairs digestion and causes constipation, when the waste that should be carried off remains in the body and poisons the whole system. That dull, heavy feeling is due to a torpid liver. Biliousness, Headache, Malaria and Indigestion are all liver diseases. Keep the liver active by an occasional dose of Simmons' Liver Regulator and you'll get rid of these troubles, and give tone to the whole system. For a laxative Simmons' Liver Regulator is BETTER THAN PILLS. It does not gripe, nor weaken, but greatly refreshes and strengthens.

Every package has the Ite'd Z stamp on the wrapper. J. H. Zella & Co., Philadelphia.

B. E. JOHNSTON, President. J. M. WEATHERWAX, Vice President. H. A. HAYES, Cashier.

## First National Bank OF ABERDEEN, WASH.

Capital, - - \$50,000

Does a general banking business. Foreign and domestic exchange bought and sold.

DIRECTORS: J. M. Weatherwax, B. F. Johnston, Jas. Patterson, Alex. Young, C. E. Perkins.

## B. F. PETERS, Boot and Shoe Maker

All kinds Boots and Shoes Made to Order. Repairing Neatly Done.

LOWEST PRICES.  
Heron Street, Opposite Kaufman's.

## FOR RENT.

The Merchants Hotel. The best and most centrally located hotel in the city. It has 22 elegant rooms, and is doing a nice business. The right party can get a good proposition. Call or address, RICHARD T. DAINSEY, Aberdeen, Washington.

## PATENTS

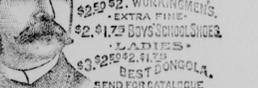

CAVEATS, TRADE MARKS, COPYRIGHTS.

CAN I OBTAIN A PATENT? For a prompt, accurate answer, write to W. L. DOUGLAS & CO., who have had nearly thirty years' experience in the patent business. Communications strictly confidential. A handbook of information concerning Patents and how to obtain them sent free. Also a catalogue of mechanical and electrical patents free.

Patents taken through Mann & Co. receive special notice in the Scientific American, and thus are brought widely before the public without cost to the inventor. Samples sent free. Issued weekly, elegantly illustrated in comparison with the circulation of any scientific work in the world. \$2 a year. Single copies sent free. Building Edition, monthly, \$2.00 a year. Single copies, 25 cents. Every number contains beautiful plates, in colors, and photographs of new houses, with plans, enabling builders to show the latest designs and secure contracts. Address: MANN & CO., New York, 361 Broadway.

## W. L. DOUGLAS \$3 SHOE
