

WAUGH'S NEWS

You'll probably miss the big store on the corner of Heron and I Streets, formerly known as Livingston's, but we are pleased to inform you that the stock from this store will be

On Sale at the Dry Goods Emporium

on H Street, back of the Chehalis County Bank.

It will be thoroughly sorted up with new staple and reasonable merchandise and conducted along the most economical lines possible.

You will always find dependable goods in this store as long as we run it and prices will be as low as anywhere in the country. We will not aim to make it an establishment to cater to those who want the "latest" regardless of price, but you'll be surprised to find how much really good merchandise your dollars will buy if spent at this store. All the woodwork in the building has been thoroughly cleaned and new fixtures installed so you'll hardly know the place and will certainly not feel ashamed to be seen going in there after you have been there once.

The "low prices" however, that made the old "Dry Goods Emporium" famous will not be changed, except to be lowered on some articles where our larger buying capacity enables us to quote them at less.

This will be the first and last announcement we will make concerning this store and hope after you have investigated you'll help advertise it as a store that really

"HELPS REDUCE THE COST OF LIVING"

J. S. WAUGH AT THE COURT HOUSE

The Weekly Record of Legal Doings at County Seat

MINUTES OF SUPERIOR COURT AND NEW CASES FILED. LIST OF REAL ESTATE TRANSFERS AND MISCELLANEOUS INSTRUMENTS FILED WITH COUNTY AUDITOR.

IN THE SUPERIOR COURT

The following is the record of business transacted in the superior court last week:

I re estate of Cynthia S. Black, deceased. J. H. Fuller, F. E. Jones and E. Ryan appointed appraisers.

Cora E. Misner vs A. W. Swanson. Dismissed at plaintiff's costs.

Sorris Safe & Lock Co. vs J. W. Farber. Judgment for plaintiff for \$128.60 and costs.

I re estate of Fred Leisman, deceased. October 17 fixed to hear final account.

I re estate of W. H. Tucke, deceased. Lucile D. Tucke appointed administratrix.

I re estate of Louis Capelle, deceased. Household goods, launch Sea Bird, fishing tackle, etc., turned over to widow for support.

C. H. Huotari vs Hanna Rantainen. Affirmed.

P. A. Powell vs John Alaga. Sale confirmed.

Grays Harbor Commercial Company vs W. F. Challacombe. Judgment for plaintiff.

Sarah D. Maker vs S. C. Maker. Divorce granted.

A. L. Callow vs Sara T. Callow. Same.

Oliver A. Spillman vs Edward Spillman. Same.

I re estate of A. R. Dabney. Final account approved and decree of distribution signed.

NEW CASES.

Ernest Hermann et ux vs Sadie Freeman et al; quieting title. W. H. Abel and Frank Groundwater for plaintiff.

E. E. Suderland vs Mrs. M. Prest; debt. F. W. Loomis for plaintiff.

Same vs Union Assurance Society Limited of London; garnishment. F. W. Loomis for plaintiff.

State vs H. E. Nye; rape. O. M. Nelson for plaintiff.

E. Cavanaugh vs A. V. Higley; damages. A. E. Cross for plaintiff. C. F. Hodgdon for defendant.

Geo. E. Huke, Trustee vs B. F. Tugle et al; debt. Morgan & Brewer for plaintiff.

George E. Huke, Trustee vs Peter Tugle et al; garnishment. Morgan & Brewer for plaintiff.

W. L. Bathurst et ux vs F. E. Keith et al; damages. A. M. Abel for plaintiff.

E. E. Case, Receiver, vs S. I. Wray, Frank Groundwater and W. H. Abel for defendant.

Levie McDonald vs. Lytle Logging & Mercantile Co., et al. W. H. Abel for defendant.

LADIES! DARKEN YOUR GRAY HAIR

Lock Years Younger! Use Grandmother's Recipe of Sage Tea and Sulphur and Nobody Will Know.

The use of Sage and Sulphur for restoring faded, gray hair to its natural color dates back to the time of the ancients. She used it to keep her hair beautifully dark, glossy and abundant. Whenever her hair fell out or took on that dull, faded or streaked appearance, this simple mixture was applied with wonderful effect.

But brewing at home is messy and out of date. Nowadays, by asking at any drug store for a 50-cent bottle of "Wyeth's Sage and Sulphur Compound" you will get this famous old recipe which can be depended upon to restore natural color and beauty to the hair and is splendid for dandruff, dry, feverish, itchy scalp and falling hair.

A well-known downtown druggist says it darkens the hair so naturally and evenly that nobody can tell it has been applied. You simply dampen a sponge or soft brush with it and draw this through your hair, taking one strand at a time. By morning the gray hair disappears, and after another application or two it becomes beautifully dark, glossy, and abundant.

FIGHTING DEATH IN ARCTIC FLOES

Thrilling Story of Adventure by Kariuk Survivors.

BARTLETT LAST TO QUIT SHIP

Photograph Reeling Off a Lively March as Vessel Sank—Soup Made of Hot Water and Ducks' Bones Only Sustenance When Food Gave Out—Dead Buried on Bleak Wrangel Island.

W. L. McKinnay and J. R. Hadley, two of the survivors of the wrecked steamer Kariuk of the Stefansson expedition, have told of their experiences while the Kariuk was hard and fast in the grip of the polar ice pack from early last October up to Jan. 10, when the ship was crushed and sunk. The story is sent from Nome, Alaska, by Lieutenant Ralph Dempwolf of the United States revenue cutter Bear.

Up to the time of the sudden disaster all those on board were well and in good condition. During the drift to the north and northwest the scientists aboard looked forward to a drift across the pole.

One peculiar discovery was made when the ship drifted across the locality supposed to be Keenan Land, found on the polar charts north of Point Barrow. Apparently this land does not exist.

On Christmas day, 1913, all hands got out on the ice pack around the ship and played football and other sports for prizes given by Captain Bartlett. The games were followed by a Christmas dinner.

McKinnay took daily meteorological data and is the only scientist to survive who has been able to keep his notes. James Murray, the naturalist of the expedition, who is missing, also took many meteorological observations. His data and notes are lost.

During the drift Captain Bartlett, no doubt thinking of possible disaster, had skin clothing made for all the ship's company by Kallikak and his wife, Eskimos from Point Barrow. He also had the sledges and gear put in order, and as a daily routine the ship's crew chopped the ice around the Kariuk into small pieces to make a cushion against the pressure of the ice pack.

On Jan. 10 the Kariuk was crushed by the ice along the water line. All on board at once set to work getting supplies and stores off the ship, and a temporary camp was established on the ice near Wrangel Island.

Bartlett Last to Leave Ship. Captain Bartlett was the last to leave the ship, and as he took her final plunge the photograph in the gallery, which he had set going, could be heard playing a stirring march.

Dr. Mackay, Murray, Henri Beauchet and the seaman, Morris, were the first to leave the temporary camp. They insisted that an attempt to reach land should be made at once. Dr. Mackay, who was in charge of this party, insisted on pulling the sledges by hand, making the mistake of trying to use antarctic methods in the arctic.

In the antarctic, after passing the barrier, one is on a firm foundation, but in the arctic the entire ice pack is continually moving and is affected by the winds and currents, necessitating a greater amount of traveling. Using dogs to haul the sledges saves the strength of the men for marching.

The Mackay party had not been gone many days when they lost half their provisions. Beauchet had both of his hands frozen. When they were last seen they were making slow progress toward Wrangel Island.

The other missing party, which was in charge of First Mate Anderson, was the second to leave shipwrecked camp.

The gale made the enormous pressure ridge on the north side of Wrangel Island, which was afterward conquered despite almost overwhelming difficulties by Bartlett's party, the last to leave camp. Although the gale had died down when they reached the ridge, the great mass of ice, fifty feet high and three miles wide, was still grinding together under the momentum the ice had gathered in the gale, and they had to wait two days before attempting the passage.

After Bartlett left to attempt the crossing of Bering strait to get help McKinnay, Hadley, Bredin and Kurlik, the Eskimo, with his wife and two children, established a camp near Wrangel point, on the east coast of Wrangel Island. They named the bay near by McKinnay bay.

Lived in Dogouts Under Snow. Munro, Malloch, Mamen, Williamson, Chafe, Templemen, Williams and Maurer camped at Rodgers harbor, on the south coast of the island. They lived in dogouts under the snow until May and then moved into the tents.

On Wrangel Island, near the tent of the geologist, Bjarn Mamen, assistant to the geologist, and George S. Malloch, geologist and topographer, were buried. It is not known just what they died of, but it was not scurvy.

The provisions gave out the first week in June. From then on three polar bears, several young white foxes, seals, walrus, seals and ducks without salt were their fare.

For three months and some days not even meat was to be had. On these days breakfast consisted of hot water and dinner of soup made of hot water and cracked ducks' bones, which Kurlik's wife had the foresight to save from the first meal.

It is too late to throw water on the waters when the house is burned down—Danish Proverb.

The King Bird. About 85 per cent of the food of the kingbird consists of insects, mostly of a harmful nature. It has been accused of eating honey bees to an injurious extent, but there is little ground for the accusation, as an examination of 634 stomachs showed only sixty-one bees in twenty-two stomachs, fifty of these being useless drones.

HOW CANNON ARE USED IN BATTLE

Making Guns of a Battery Ready For Action.

DIRECTING FIRE ON ENEMY.

This is Done by Means of an Instrument Set at a Given Deflection Calculated by Battery Commander Stationed on High Ground and Sometimes in Trestop.

How cannon are used in an actual battle is a most interesting subject dealt with in the Scientific American.

In actual battle the guns of a battery are lined up, and one loaded caisson is placed next to each gun. The entire battery is behind cover and generally cannot see the targets. The fire is directed by each gunner aiming on a designated aiming point, with an instrument set at a given deflection, so that the gun will actually point at the target. This deflection is calculated by a triangulation method by the battery commander, who is some distance away from the battery either on elevated ground, on a ladder or in a tree.

The German system of obtaining the deflection is to measure the angles by means of instruments, thereby attempting to make the first shots effective, while the tendency of the French system is to estimate the first deflection, fire quickly and by observing the shot make necessary corrections for succeeding shots. The ranges are obtained by base range finders, which are accurate within 200 yards for 5,000 or 6,000 yard ranges.

What Howitzers Are For.

The object of howitzers is mainly to fire a heavier projectile with a lower velocity at a much higher elevation and longer range. Assume, for instance, the enemy's infantry entrenched behind embankments. With a high velocity the trajectory of the projectile for a given range is very flat, so that the troops would be able to sit behind the cover and have all projectiles either strike the embankment or pass over their heads. For this emergency a battery of howitzers is called into action. By reducing the charge the projectile may be started at a higher elevation, which causes the projectile to fall to the ground in a much more nearly vertical path and enables it to be dropped back of the embankment.

Bartlett Last to Leave Ship.

The object of field artillery is to support the infantry in its advances or its retreats. It aims to hit the part of the enemy which is most dangerous to the friendly infantry and which would hinder its success. Since the enemy's artillery would do the same thing, it is evident that a modern battle will generally begin with an artillery duel and that whichever side is able to silence the other's artillery will have a tremendous advantage.

As the infantry advances the field artillery must be in readiness to fire over the advancing lines and attack parts of the enemy's troops or must be able to move with lightning rapidity to any other position where its fire is needed or is more effective. A battery of field artillery is a tactical unit composed of from four to eight guns and ammunition wagons loaded with shell and shrapnel.

Infantry Tactics.

While it is probable the success of a battle will depend to a large extent on the support of the field artillery, it is certain, says the writer, that the principal and most important arm is the infantry, which in practically every case must decide the final issue. The cavalry may be the first to be drawn into a battle, and the artillery may destroy the enemy's artillery, but a battle is never won until the infantry has driven back the enemy's lines.

The usual mode of advancing for the infantry is to deploy them in a line with a long interval between each soldier. This naturally is for the purpose of offering a smaller target for the enemy. It makes it more difficult, however, for the leaders to keep a good control over the men, and for that reason one of the objects of field artillery is to make the enemy's troops deploy early.

The infantry soldier is armed in all the countries with a rifle and bayonet. The rifle is the weapon upon which reliance is placed, the bayonet being used only as a last means, when in a hand to hand encounter with the enemy.

"KALE GONE, WIRE 30 BEANS"

Professor's American Slang Causes Germans to Hold Friend a Prisoner. A story of how a telegram for financial assistance couched in American slang landed a Brooklyn (N. Y.) Manual Training high school instructor in a German prison under suspicion of being a conspirator against the government was told upon the arrival at New York of the Italian liner Ancona from Naples.

Dr. Alexander Becker, an American, was the victim, and his fellow teacher at Manual, Professor Edouard San Giovanni, was the one who sent the wire that caused the trouble.

This was the message: "Kale all gone; wire 30 beans." Professor San Giovanni was left without funds when the bank where he had his money closed as soon as war broke out.

TRUE PRAYER.

Many a man prays with his whole being, feels himself thrilled with the divine currents and going out in inspiration after the eternal, and yet finds words forsake him when he attempts to put his devotion into speech. And yet is not this true prayer? For how can you translate aspiration into speech?—W. D. Little.

Wolf's Store Will Be Closed All Day Wednesday, September 30, Account of Jewish Holiday

Charming Styles in School Clothes

For the Girl. School clothing is always an important question that must be carefully considered at this time of the year. We have spent a lot of time in our efforts to help you to decide the question and we believe that you will agree with us that we have succeeded well.

We are Showing Many Delightful Styles in School Dresses.

The girls will be interested in the becomingness of these dainty dresses—the mothers in the wear that each dress will give.

Dresses at 75c, 85c, \$1.00, \$1.25, \$1.50, \$1.75, \$2.00 and up.

Coats at \$2.50, \$3.50, \$4.50, \$5.00, \$5.50 and up.

Then there are Hats, Underwear, Hose, Gloves, Hair Ribbons and other fancy fixings.
