

# SPOT BALLS WHEN THEY FREEZE

EDWARD McLAUGHLIN GIVES AN OPINION AND SUGGESTIONS TO IMPROVE 18.2 BILLIARDS—NOT TIME TO DROP GAME.

Edward McLaughlin, who recently won a billiard game from House and was the referee in the Hoppe-Schafer championship match in New York city, has been interviewed upon the subject of "winter billiards." Among other things he said:

"The time has not yet come for dropping the 18.2 play. It is a beautiful game, susceptible of much better development than it has yet attained, and a game of billiards should not be relegated to the past until it has been more nearly exhausted than this one has. No body has yet become so proficient in it as to bore a crowd by excessively long runs. I do not doubt that somebody may run a game out one of these days, but let us wait at least until somebody does so before throwing out a play that has so many still undeveloped possibilities. The mere fact that one man in a match game and another in a practice game have made averages of 100 is not a sufficient reason.

Nothing Like Straight Rail. "Straight billiards was superseded by the balk-line game because the experts had reached a point where by rail nursing, in which one shot was very much like another, they could play until they and their

spectators were tired. Why, men could make 3,000 or 4,000 points at that game before it was dropped. Of course that would bore an audience. But nothing of that kind has happened in the 18.2 game. The longest run ever made at it was not in the least tiresome to watch. Improve the Game. "I should much rather see the 18.2 game improved than dropped; and to this end I would suggest that the balls be spotted every time they freeze. This would make the game a little more open, because players would be much more careful than not to freeze the balls than they are now, when they can save their positions by banking or making masse shots from the unfrozen object ball. Moreover, it would add greatly to the spectator's interest to see the player work the balls again from spot position. Indeed, that is the thing of greatest interest in any game of billiards. That is where the greatest mental effort comes in. After the balls are together it becomes more a matter of mere execution.

Freeze on Close Nursing. "The freezing of balls usually comes about by the player trying to nurse them too closely. He can afford to take the chance of freezing them if he can get out of the scrape by an easy bank or draw or escape from the unfrozen ball, but if it were mandatory that the balls be spotted every time they freeze, as it used to be in the old rail play, he would not take that chance, but would play a little more openly, thus making the game a little harder for him and considerably more interesting for the spectator."

# MATCH BOWLING GAMES

There were big doings in the local bowling world last night, match games being the order of the evening and the large crowd that attended the contests proved that bowling is far from being a dead sport in Seattle.

The big match of the evening between N. R. Warren and Sam Shuman proved a notable upset, as Warren, who was expected to win, rolled far below his real form and was beaten by 183 pins. The match was for a purse and was rolled five games on the Bismarck and five games on the Monarch alleys, total pins to count.

Shuman assumed a lead of 78 pins on the Bismarck drives and added 107 pins to his total by his work on the Monarch alleys. The winner rolled very steady ten-pins. There will probably be a return match in the near future. The other match of the evening was between Paul Moran, "the honest playboy," and Charley Welton and "Silent Joe" Lyons on the other. The former aggregation of Monarchs stood put over the latter by 53 pins. The match was rolled three games on each set of alleys, total pins to count. Welton and his partner got away in the lead by 24 pins on the Bismarck alleys, but were beaten 77 pins on the Monarch drives. The match was very interesting throughout, and several of the players at times made difficult split spares.

# AUTO NOTES

Detroit, a city famed at the same time for the excellence of its automobiles and the villainous conditions of its highways, is to have good roads at last. Thanks to the untiring efforts of Horatio S. Earle, state highway commissioner, the Michigan good roads bill passed by a splendid majority. By the terms of this bill the state pays \$1,000 per mile toward the construction of macadamized roads that are built according to specifications laid down.

Here is the definition of a puncture given by John G. Ham, an Eastern motorist: "A puncture is a trifle, and a trifle is a scrap, and a scrap is a fight, and a fight is a battle, and a battle is war, and war is hell. Therefore, a puncture is hell."

The present New Jersey automobile law will be attacked in the next legislature by motorists who want to get rid of the objectionable clause whereby a constable may arrest without a warrant and sometimes on the flimsiest pretext.

Elliott F. Shepard, who competed in the Vanderbilt cup race in a Hotchkiss car, is using his racing machine in a hunting trip in the Adirondack mountains.

In preparation for the seventh annual automobile show in Madison Square Garden, Jan. 12-19, 1927, the Association of Licensed Automobile Manufacturers will spend \$25,000, while it is estimated that upward of \$50,000 will be expended by the exhibitors. Many of the decorations are to be imported from France.

The movement to build a special course for road racing and for testing purposes is assured of adequate financial support if the example of the White Sewing Machine company, the makers of the White steamer, is followed by other manufacturers, as it is safe to predict, will be the case. A subscription of \$5,000 "to start the ball rolling" has been tendered by Windsor T. White, vice president of the White company.

The new automobile ambulance of the Philadelphia hospital will carry four patients, two nurses, a doctor and operator. The surgical equipment is of such a complete

# SPORT DOPE

Announcement has been made by the management of the Illinois Athletic club that its third annual Marathon race will be held September 28, 1927, and will be known as the American Marathon race.

# THE MARKETS

A steamer load of goods landed here last night from San Francisco and are nearly disposed of by the retailers buying them as fast as placed on the market. Lettuce seems to be very much in evidence and the commission men are finding purchasers at 35c to 36c. With the arrival of a schooner with half a ton of lettuce, the price from 30c to 35c and 36c to 37c. Delicacies in meats report hogs still scarce. The egg market seems to have stopped for a breathing spell; not having changed from 47c and 48c for over a week. The prices on poultry, hay, feed stuffs and dairy products have not changed.

**Vegetables.** Potatoes, 100 lbs. sack, \$1.50; cabbage, per lb. 10c; cauliflower, per lb. 10c; green beans, per lb. 10c; lima beans, per lb. 10c; peas, per lb. 10c; corn, per lb. 10c; sweet corn, per lb. 10c; tomatoes, per lb. 10c; eggplants, per lb. 10c; okra, per lb. 10c; mushrooms, per lb. 10c; onions, per lb. 10c; radishes, per lb. 10c; rutabagas, per lb. 10c; turnips, per lb. 10c; watermelons, per lb. 10c; cantaloupes, per lb. 10c; peaches, per lb. 10c; apples, per lb. 10c; pears, per lb. 10c; plums, per lb. 10c; cherries, per lb. 10c; strawberries, per lb. 10c; raspberries, per lb. 10c; blueberries, per lb. 10c; blackberries, per lb. 10c; currants, per lb. 10c; grapes, per lb. 10c; figs, per lb. 10c; dates, per lb. 10c; pineapples, per lb. 10c; melons, per lb. 10c; cucumbers, per lb. 10c; eggplants, per lb. 10c; okra, per lb. 10c; mushrooms, per lb. 10c; onions, per lb. 10c; radishes, per lb. 10c; rutabagas, per lb. 10c; turnips, per lb. 10c; watermelons, per lb. 10c; cantaloupes, per lb. 10c; peaches, per lb. 10c;
