

# CITY TO ABATE DUST NUISANCE

## Tank Cars to Be Run Over Electric Lines to Sprinkle Streets During Dry Season--Service to Be Extended Gradually.

About May 1 the city of Seattle will make a start at its first effort at street sprinkling. For the present season only streets having street railway lines will be sprinkled by the city, but it is planned to extend the system from season to season until a considerable portion of the city has been covered.

hill have been covered in this way. But there has never been the idea that by that means the largest number of people can be served at the least expense to the city.

### To Install Standpipes.

Before they can be put in service it will be necessary for the city to install two or three turn-out tracks and stand-pipes where they can get out of the way of street car traffic while they are being filled. While the exact locations of these have not yet been selected, one of them will probably be near the southerly end of Lake Union, one out towards Ballard and probably one in the southern portion of the city.

### Result of Long Effort.

"I have been trying to get the city to take up the work of street sprinkling ever since I have been in the council," said Murphy yesterday, "and I finally prevailed upon the council last year to purchase the two tank-car sprinklers. These will be put into service as soon as the dry season comes. They will be operated over all of the electric lines of the city and will do a great deal towards reducing the worst feature of the dust nuisance.

# ICE---JUST ICE---THE SECRET OF JULIA MARLOWE'S COMPLEXION

BY DOROTHY DALE.

The secret of the beautiful complexion? You'll smile when you hear it, but don't let that deceive you from giving it a trial. How I learned it does not matter. But it is the state secret of a queen of many lands.

You know Miss Julia Marlowe's complexion—soft and flushed as a baby's? All womankind has begged for the magic recipe.

Tales of secret emissaries to farthest Arabia for a soothing balm have been told. Rumors of a wonderful tincture at a fabulous sum from color-wise Persia brought exclusively for the Shakespearean queen, have been set afloat.

But—prepare for a shock! It's ice, ladies, nothing but the pond or ammonia frozen commodity for keeping butter and milk that gives that satin glow.

Doubtless all of you have wondered how Miss Marlowe obtained such striking color effects without a spot light. Well, it was with ice, that's all, nothing but ice. This is how Miss Marlowe proceeds to make her complexion a wonderful peachblow effect:

First rub in a little cold cream and massage the face thoroughly. Rub off with a coarse towel. Then rub the neck and face with a fine Swedish pumice stone. In rubbing be careful to rub down at the corners of the eyes and outward from the mouth toward the ears.

After moulting thoroughly begin to dip the stone into ice water till it is very cold.

MISS JULIA MARLOWE.

Then change to a piece of ice as big as the palm of the hand. This brings a glow and after drying with a soft towel, applying more face cream and some powder, one can go out into the bitterest cold or strong wind without danger of roughening the delicate texture of the skin.

# SHORE LANDS ARE OPEN FOR ENTRY

The plats of the Lake Washington shore lands recently platted by the state land commission, in accordance with the A-Y-P-E bills passed by the last legislature, were filed this morning with the county auditor and city engineer. These lands are now open for entry and purchase in accordance with the terms of the state law.

The aggregate appraised value of these lands is \$560,708.80, bringing the total, including the Lake Union shore lands, up to \$1,180,911.86. Under the law these lands may now be purchased by the preference right upland owners either outright upon the payment of the full appraised value of the lands, or on contract on the payment of one-third the purchase price, the remaining portion to be paid in two equal annual installments at 6 per cent interest.

# ANTI-RACE TRACK BILL MAY FAIL

ALBANY, N. Y., March 21.—With the fight over the anti-race track bill nearing the last round in the state legislature, a significant change became apparent today in the opinions of the legislative experts as to the chances of passage of the famous Agnew bill. The opponents of the measure are now willing to bet even money that the bill will be killed in the senate.

The basis for these rumors is the report that a large amount of money for illegitimate use in the race track interests and the bookmakers. (Some persons, who claim to be "in the know" place the amount of this alleged corruption fund at \$200,000.)

# SPECIAL NOTICE

I wish to announce to the public and my former patrons that I have returned to the optical profession, having added to the usual knowledge in that line, that of neuropathy, or the relation of the nerves to the parts affected—in this case, the eyes. Thus equipped, I am able to fit the eyes with much greater accuracy than the ordinary optician, and many nervous ailments, including headaches, coming from eye defects, yield readily to this neuropathic treatment. I can refer to many of my former patrons in Seattle, who are well satisfied with the glasses prescribed by me.
