PUFFINESS UNDER THE EYES

Q. What is the cause of one or both eyelids to swell and present a puffy appearance in the morning, and generally at other times to be full of fine wrinkles, when the lady is not old enough to have such wrinkles? Is it always the kidneys that cause it? Would eczema of the scalp affect the skin of the upper eyelids and cause the puffiness and sometimes a redness?

A. The "puffiness" under the eyes is often an early symptom of kidney trouble, and I would suggest that the patient go at once to a qualified physician and have a thorough examination made, including an analysis of the urine. It is possible

that the trouble is purely local, but that could only be determined as a result of a medical examination.

ASTHMA BRONCHITIS

Q. A friend of ours has an 8-year-old boy who is suffering with "asthma bronchitis." They have moved to Los Angeles, Cal., and after three months the boy shows no improvement. A doctor has advised them to go to San Antonio, Texas, and I would appreciate very much your advice on which is the best climate for a child in his condition to live in.

A. Whether Los Angeles or San Antonio is best suited to this particular child is a question to be decided by the doctor who has studied the case. Your friend is doing the best thing for her little boy in seeking a suitable climate for him, but it will be necessary for her to remain in that climate long enough to break up the tendency to recurrence, and this may require several years.

Wallace MacMurtry will direct both plays, which are by Lord Dunsany, who is called one of the greatest modern dramatists. "The Tents of the Arabs" and "The Glittering Gate" will be produced with suitable coloring and atmosphere, the plots to follow the simple plans of the modern poetic stage. The intention is to give expression to the ideals which lie at the foundation of the work of Washington Dunsany, players of New York. Lord Dunsany has struck a new note in the theatre. With the lightest touch he reveals truths of deepest significance and with fascinating art. "The Glittering Gate" presents the old problem of the Greek drama, the struggle of man against the gods. It is a play regarded as almost perfect in construction, and may well be considered as the ideal one-act play. The cast is as follows:

Bill Wallace MacMurtry
Jim Harry Inaker
Perkins Lord Dunsany's poetical drama is "The Tents of the Arabs," unquestionably one of the best plays of modern times. The following cast is drawn from the Century club, who successfully presented the play last month:

Neil Nash, camel driver Harry Inaker
King Wallace MacMurtry
Kauwaka, a gypsy girl Mrs. Louis Mack
chamberlain Mrs. E. R. Ingram
Zabra, a nobleman Mrs. W. P. Will

WHEN ILL HEALTH OR HARD TIMES HIT YOU, DON'T LIE DOWN

It is the man who can "come-back" that is the man worth while

"Comeback! I'll Help You!"

It is said that about ninety per cent of men fail between the ages of 35 and 50 and very few ever "COME BACK."

A good reason for many of these failures is plain. As man approaches middle age THE IRON IN HIS BLOOD IS APT TO THIN OUT and he then lacks the necessary iron in his body to give him the force, strength and vitality; the "IRON-WILL" and "iron determination" to carry him on to success. In his own mind HE ALWAYS THINKS HE IS GOING TO "COME BACK," but he is like a crippled deer that rises up on its four legs after being shot, only to fall back again.

EVERY DOCTOR knows the tremendous power of an IRON WILL to pull a patient through a critical illness. With an iron will, it often seems that nothing can kill you. Without it, a patient sometimes speedily collapses and dies from an apparently trivial cause.

Lack of iron in your blood not only undermines your health and robs you of your bodily and mental vigor but it weakens your WILL POWER. Without iron ALL THIR "FIGHT," COURAGE and "GO AHEAD" in you is taken out and you begin to think it is "all over"—there's nothing more for you in life.

Without iron your blood also loses its power to change food into living cells and tissue and nothing you eat does you any good—you do not get the full strength out of it. In fact sometimes the more you eat the more you starve, as your digestive organs are unable to handle much food when your blood lacks iron and you often think you have stomach trouble, when it isn't that at all. Simply eat less and take iron. There are 20,000,000,000 red blood corpuscles in your blood and each one must have iron.

DON'T TRY TO "FOOL" YOURSELF INTO THINKING YOU ARE A MAN OF "IRON" when you have good reason to suspect that you are not, anyway let your doctor decide. Get him to make a "blood count" of your red blood corpuscles and SEE WHETHER YOU ARE A 100 PER CENT A 75 PER CENT OR A 50 PER CENT IRON MAN. Or if you do not want to go to this trouble eat
