

## COWARDICE OF MEXICANS SHOWN

### Officers Will Be Shot Declares General Sanjines

### CAMPED WHILE THE BATTLE WAS RAGING

### The Federal General Is Furious Over Action—A General Revolution Feared if Americans Are Given Permission to Cross Border.

Douglas, Ariz., Sept. 17.—The Mexican federal officer responsible for holding back reinforcements for El Tigre while the rebels, under Salazar were attacking the town, will be shot for cowardice, according to General Sanjines, commanding the forces in Sonora. The general made this statement when informed that troops sent from Nacozari to the relief of El Tigre had arrived within 10 miles of the town nine hours before the town was captured. The intended reinforcements arrived while fighting was in progress, swung off in different direction, and went into camp within sound of the firing.

Consulting Engineer Malcolmson has been authorized to offer a reward of \$500 for the recovery of 21 bars of bullion taken from El Tigre by Salazar yesterday. It is believed an attempt will be made to smuggle it across the line.

If the Mexican government should permit American troops to cross the line to protect Americans in Mexico, a revolution much more serious than the present one would be the result, in the opinion of Sanjines. Such an act would be bitterly resented by the great mass of the Mexican people, said the general, and there would be no safety in Mexico for those who are permitted to move or for Americans. Sanjines spent several hours in Douglas today.

## WILD OUTBURST IN PARLIAMENT BY HUNGARIANS

Budapest, Hungary, Sept. 17.—The opening session of the Hungarian parliament was marked by a wild outburst of factional feeling. Count Tisza, president of the lower house, was received with many cries of derision and abuse, mingled with whistling and hissing. Calls for attention only called forth more cries. Not a word of the royal decree opening the session was heard. An opposition member tauntingly asked the deputy of the government party if he had a revolver with him. This raised the feeling to fever heat. Members came to blows when Count Julius Andrássy and other leaders intervened and separated the violent members. The tumult continued.

Stormy scenes were also witnessed in the Hungarian parliament during the closing sittings in June last, which culminated in an attempt to assassinate Count Tisza. The president was shot at three times by an opposition deputy, Julius Kovacs, who then fired two bullets into his own body, wounding himself seriously. The count escaped unharmed. Count Tisza was elected speaker May 23 last. He is an opponent of universal suffrage and on this issue his election was contested with bitterness.

## BORAH GIVEN ASSURANCES OF SUPPORT BY HOMESTEADERS AT NOTUS AND PARMA MEETINGS

### Big Crowds Give Senator Ovation—Politics Forgotten and All Join in Paying Tribute—Halls Are Crowded With Eager Listeners in Canyon County Towns

(Staff Correspondence.)

Notus, Sept. 17.—Senator Borah's second meeting in his campaign for re-election to the senate was held Monday afternoon at the thriving village of Notus, where a crowd numbering 400 filled to overflowing the town hall and gave Borah a tremendous ovation. At the close of the splendid meeting the entire crowd stood up en masse and cheered Borah to the echo. Not only did they cheer but upon a motion made, a unanimous vote was given to support Borah by voting for the legislative ticket that will vote for Borah.

Considering it being an afternoon meeting, it was a great one.

Many of the settlers under the Black Canyon Irrigation project came from miles away to hear and cheer Borah, who came not to make a political speech here, but who came for the purpose of talking to these settlers about the prospects of having this project financed by the government. Borah is very hopeful that this may be done, and stated the present indications are that congress at the next session will pass a bill appropriating \$50,000,000 for the purpose of completing the reclamation projects, and of developing new ones.

Secretary Fisher Friendly.

The Notus meeting held in the town hall was opened at 2:15 o'clock. H. C. Baldrige of Parma, chairman of the meeting, introduced Senator Borah, saying in part that this was in the interest of the development of the Black Canyon irrigation project. Mr. Baldrige read letters from the interior department concerning this project.

One letter from B. E. Stoutmeyer, attorney for the reclamation service in Washington, was very favorable toward having the settlers under this project maintain their district organization. Attorney Stoutmeyer considers the district form of organization the very best possible to get

money from the government to develop the project.

The Black Canyon irrigation district is ready to contract with the government for the money necessary to complete the project. The supreme court of Idaho has declared this irrigation district a valid organization. The district now is in a position to contract with the government for all or part of the works.

98,000 Acres in Project.

The Black Canyon project comprises 98,000 acres of irrigable lands under the present survey, the estimated cost of which is \$72,50 per acre. It is planned to take water out of the Payette river near Horseshoe Bend, and reinforce the water supply with storage water from Payette lakes.

The land under this magnificent project is all settled up with actual settlers living on the land, 39 per cent of whom have already proven up under the old five-year law.

Borah Helps the Settlers.

Senator Borah said in part: "I understand this meeting is called for the purpose of arriving at some way of holding and improving your homes. We are united in one thing at this meeting: How to get water on this project. That is the kind of politics I like best. I like to help those who are engaged in building homes under adverse circumstances. "I have no feeling against wealth or riches. I confess that it is the duty of the legislator to look first after those who have not wealth, and in behalf of those who are trying to carve a home out of the desert.

"You have a vast stretch of country here, rich and fertile. It is settled up and already occupied by a splendid class of settlers.

"I cannot understand why the government should not find this a situation the government can and should
