Poultry  
Dairy**

### Announcement of Change of Name

Please take notice that the name of the Idaho Coal & Commission Co. has been changed to IDAHO COAL & SEED CO.

We take this opportunity to call attention to our increased facilities for handling this line of business

Our specialties:

**COAL, SEEDS, GRAIN**

We also carry a full line of—

**STOCK FOODS,  
POULTRY FOODS AND SUPPLIES  
FERTILIZERS.**

Prompt Deliveries.

Telephone 31

**IDAHO COAL and SEED CO.**

A. L. LEE, Mgr.

Cor. 8th and Grove Sts. "One Block South of the Overland Corner."

### NOT EXPENSIVE

Treatment at Hot Lake, including medical attention, board and baths, costs no more than you would pay to live at any first class hotel. Rooms can be had from 75 cents to \$2.50 per day. Meals in the cafeteria are served from 20 cents up and in the grill at the usual grill prices. Baths range from 50 cents to \$1.00.

### WE DO CURE RHEUMATISM.

Hot Lake Mineral Baths and mud given under scientific direction have cured thousands. Write for illustrated booklet descriptive of Hot Lake Sanatorium and the methods employed. Hot Lake Sanatorium is accessible, as it is located directly on the main line of the O. R. & N. Railway, and special excursion rates are to be had at all times. Ask agents.

**Hot Lake Sanatorium**

### Gem State Gemlets

#### Roundup Now Permanent.

(Register, Idaho Falls)  
There is every reason to believe that the "War Bonnet" Round Up will become a permanent organization and that Idaho Falls and other cities of the state and Salt Lake will be given an opportunity to see the big event. L. L. Eymon, Curt Cunningham, Tom Emmerson and other Jackson Hole men are interested and it is proposed to organize a company and secure a number of good bucking horses, good cow horses, secure the services of a number of good ropers and riders and other attractions and put on a bigger and better "Round Up" next season than was shown here this year. Local men will go in with the Jackson Hole men in the organization of the company. After the big show here the men and horses, steers and other features will be taken to Pocatello, Salt Lake and on to Boise to show at the state fair there next year. It is proposed to make the "Round Up" here a bigger feature than either the Cheyenne or the Pendleton affair as the proximity of Idaho Falls to Jackson Hole country and the other cow country makes this possible.

#### O'Neil Cases Delayed.

(Press-Times, Wallace)  
Owing to the fact that the trial of B. F. O'Neil, former president of the defunct State Bank of Commerce, will not be begun in the district court in Coeur d'Alene city until November 7, the hearing of the other accused officers of the institution will not be begun in the local courts until the middle and perhaps the end of November. Similarly the trial of W. O. Pierce, former receiver of the bank, may be delayed till near the end of the present term of court.

These statements are in accordance with those of Prosecutor James A. Wayne, who is desirous of bringing the head of the institution before a jury before he attempts the trial of the other alleged offenders. The possible exception is the Pierce trial which may be heard here next month.

The date for the hearing of the former president of the bank was set by Judge John M. Flynn. It will be before him that the cases in that county will be heard. The apparent delay in the trial is over the protest of the prosecution as presented to the court by N. W. Wernette, appearing for County Attorney James A. Wayne. Mr. Wernette asked that the date be not later than October 14.

Mr. O'Neil will be represented at the hearing by Robertson and Miller of Spokane, McFarland and McFarland of Coeur d'Alene, and Walter H. Hanson of this city. Attorney Wayne, who has acted alone throughout the inquiry and the extradition of the banker, will probably appear alone for the prosecution.

#### Peach Loss Very Heavy.

(Tribune, Lewiston)  
A delegation of Lewiston citizens who visited the seven-acre fruit farm of P. W. Mullerley in Lewiston orchards yesterday saw in waste piles beneath the trees 15 tons of fruit. Several other orchard tracts were visited where similar conditions were observed, while the drive through the avenues and streets for miles showed that in all the older sections of the district the waste was just as great. This was the scene presented there at the practical close of the picking season on peaches, despite the fact that many carloads had been shipped. Many of these peaches would meet the highest standard pack for box shipment in the best markets in the country, while any of the product would be highly suitable for drying. Recently there has been made a careful and conservative check on the loss of peaches this season in the Clarkston and Lewiston orchard districts. This inspection showed the surprising loss of 3200 tons. This loss has resulted from 60,000 trees in the Clarkston district and 100,000 in Lewiston orchards, although there is much less percentage in bearing in the latter district. With the same basis of calculation used, and estimating the output of older trees and the area coming into new bearing, the loss next year will reach 7500 tons. Dried fruit of the type available in the Clarkston and Lewiston orchards would be conventionally marketable at 7 1/2 cents per pound. Allowing 90 per cent evaporation, the loss threatened next year could be converted into a value of \$112,500 should a dryer be available. This material sum will be steadily increased

#### each year as new trees come into bearing.

#### Water Power Permits.

(Tribune, Lewiston)  
The United States government has formulated rules and regulations governing the acquisition of power sites under the act of February 15, 1901. The local land office is in receipt of the regulations approved August 24, 1912, the same comprising a pamphlet form of some 29 pages. The details of the plan are described with technical accuracy. The general plan worked out is to first issue a preliminary permit upon sufficient showing which insures priority to the claimant provided the initial payment is made within 60 days after demand therefor, and further provided that the application for final permit is filed within the time required in the preliminary permit. No final permit is issued for more than a period of 50 years, but the new rules and regulations provide for an extension on an equitable basis. Rental charges will ordinarily be calculated for rates for horsepower for one year, beginning with 10 cents per horsepower for the first full year of the survey-construction period, and similarly for the operation period. For each succeeding year up to 10 years the rate for rental increases 10 cents per horsepower. When 10 years' rental is reached a charge of \$1 per horsepower is made, this also applying to each succeeding year. Further information and details will be given by parties interested upon application to the register and receiver of the Lewiston land office for this district, which is at present grappled with a limited number of the regulations for distribution.

#### Big New Nampa Creamery.

(Leader-Herald, Nampa)  
"Nampa's Very Best," the leading brand of butter of the Farmers' Co-operative Creamery company of this city, will soon be on the market, according to J. S. Stinson, one of the leading stockholders and directors of the new concern. The entire equipment of machinery, which was purchased from the Creamery Package company of Chicago, has been installed and by Monday of the coming week the institution will commence operations. On account of a lack of workmen the sewer connections have been delayed, but these will be completed by the end of this week. Reinhold Hansen, an experienced creamery man from Iowa who has been here the past two months superintending the construction of the building and the installation of the machinery, will have complete charge of the business. He announces that cream will be received Mondays and Tuesdays and Thursdays and Fridays of each week. To commence with only one hauler will be put on, but it is expected that business will demand an additional one in a few weeks. Farmers who wish to bring in their product are requested to deliver on the aforementioned days.

Only sweet cream will be received at the creamery, and each contributor's will be kept separate, in order to avoid loss by mixing in case a bad lot should be received. Only a first quality of butter will be manufactured to begin with. This will be put up in pound prints and sold in crates of 20 and 40 pounds. It is planned to put it on the local market first and gradually enlarge the scope of trade as the output increases.

A full stock of milk cans has been received at the company's place. These will be ret-ified to patrons at the wholesale price.

#### Big North Idaho Ranch Sold.

(Tribune, Lewiston)  
A deal has been closed whereby J. R. Kincaid of the R. C. Beach company acquires the Dick Owsley ranch of 2400 acres located about five miles below Pomeroy in the Patana valley, the consideration being about \$50,000. The Huseby fruit ranch of 30 acres planted to cherries and peaches, was turned in as part payment on the ranch, the value of the fruit tract being placed at about \$15,000.

This tract is located in Clarkston and was acquired by Mr. Kincaid less than a year ago.

The Owsley place is one of the first settlements in the Pomeroy section and is considered one of the finest properties in eastern Washington. The deed to the ranch also carries a priority

(Continued on Page Five)

### TRIPLETS MAY BE BROUGHT TO FAIR

It is not at all impossible to exhibit at the next fair in this city bouncing and healthy triplets if the suggestions followed out in a communication received by Governor Hawley are taken advantage of. The triplets are those of Mrs. John Wixon of Bear Lake county who wrote to the governor and mailed him a photo of them shortly after their birth. They are claimed to be the only triplets in the state.

The letter received with reference to them by the governor is from James E. Hart of Nampa. He says in part: "You will no doubt remember the occasion of your correspondence with a Mrs. John Wixon of Sharon, Bear Lake county, relative to her being the mother of triplets. While in Bear Lake county recently I met Mrs. Wixon and upon inquiry concerning the aforesaid triplets she informed me they were growing nicely, were in fine health and that she was so proud of them that she would be glad to have them on exhibition at the coming state fair in Boise. It would be an uncommon feature of a state fair and further emphasize the fact that the Gem state is wonderfully productive and fruitful."

### Gates of Inter-mountain Fair Opened

(Continued from First Page.)

matching muscle against muscle in the thrilling speed contests furnishes one of the most inspiring sights at the exposition. At the Inter-Mountain fair many carloads of the fastest horses in the northwest have been entered in the various races. For several weeks horsemen have been arriving with their strings of turf stars and by the time the gates open tomorrow one of the greatest galaxies of speedy running, trotting and pacing horses on the circuit will be ready for the starter's signal.

An especially interesting race program with valuable purses has been provided and each day of the fair will witness a number of events between the best horses in the west. A specialty has been made of the running races by the Inter-Mountain fair management this season and as a consequence many of the best runners have been entered. Harness races, too, have been provided and racing enthusiasts will be given the best there is.

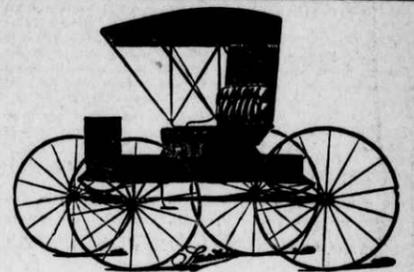

The Arrow Rock selling stake, Rain-makers' handicap, Inter-Mountain derby, Deer Flat stake and the Irrigators' handicap are the principal running stake races programmed. In addition to these three or more running races in which over-night entries will have been made will be run each day.

In addition to the regular horse races and the motorcycle speed contests, the fair management has provided a number of other races that should prove highly interesting. The band of Bannock and Shoshone Indians from Fort Hall will be seen in a number of spirited races between themselves and cowboys, while the braves will endeavor to prove the superiority of their mounts over those of other Indians. The squaws, too, will show what good riders they are. In addition to the races the Indians will give a number of their tribal dances and games.

A race between dog teams and one between Shetland ponies ridden by their youthful owners will also be among the extras. Band concerts and a large number of thrilling free acts will be given daily in front of the grandstand.

A baby show in which a large number of entries are expected will be held on Wednesday afternoon. This contest will be under the direction of Mrs. Clara Gish Ewing and entries should be made either to her or through the secretary's office at the fair grounds. A large number of cash prizes have been offered in the baby show and in addition to these, arrangements have been made with several banks in the city so that each baby entered irrespective of whether it wins a prize or not, will receive \$1 as a start for a savings account.

Tuesday of fair week will be merchants' day at the fair and arrangements have been made whereby every business house, mercantile institution, bank or store in Boise will close its doors from 1 o'clock until 6 on that afternoon.

The Boise Carriage & Implement Co., dealers in all kinds of farm implements, invites the public to inspect their stock of buggies, wagons and implements during Fair week. Owing to being overstocked we will sell buggies during Fair week at a price that will appeal to every conservative person. Call at Fourteenth and Main Sts., Boise, Idaho, and satisfy yourselves.
