

# GOV. HAWLEY TO GIVE AN ADDRESS

### Will Speak on Divorce Laws at Governors' Conference at Richmond.

Governor James H. Hawley has wired his acceptance of the invitation to speak before the Governors' Conference on the subject, "Uniformity of Marriage and Divorce Laws," on the morning of Dec. 6. He received a letter today from M. C. Riley, acting secretary of the conference, acknowledging his telegram of acceptance. The letter is as follows:

Madison, Wis., Nov. 8, 1912.  
Governor James H. Hawley,  
Boise, Idaho.  
Dear Governor Hawley: I am in receipt of your telegram of November 6, and assure you that the program committee appreciates very much your consent to honor the conference with an address on the subject "Uniformity of Marriage and Divorce Laws." This subject will be discussed on the morning of Friday, December 6.

Every indication points to a great meeting of the governors this year. Governor Mann, our worthy host, has planned some elaborate and interesting social features; such, for instance, as a Lynnhaven bay oyster roast at Cape Henry, and a meeting with the National Guard association at Norfolk.

I will forward to you within the next week or 10 days a copy of the program for the Richmond meeting. The committee looks forward to a most interesting and instructive number of discussions.

I shall deem it an honor to be of service to you.  
Yours very respectfully,  
M. C. RILEY,  
Acting Secretary.

# NEW THOUGHT TEACHER GIVES LESSONS HERE

The first of the series of lessons which Flora Paris Howard, the New Thought teacher and lecturer of Los Angeles, will give in Boise, will be presented at the Columbian club house this evening at 8 o'clock. Mrs. Howard is on her return from a trip of 15 months and in response to the popular demand for such lectures in Boise will remain in this city for a few weeks. Last evening she spoke to an eager audience at the Columbian club house on "The Possibilities of Man."

The lessons will be public and free to all, as Mrs. Howard gives her message without stint, asking only a free will offering. The subject of the course is denominated "Applied Christianity" and the teacher explains that it is her desire to give a practical working basis for a life of success and health. In her lessons she will endeavor to explain the law and what it will do in the lives of those who live it.

The lecture last evening was followed with interest by the audience. The following are a few of the salient paragraphs from her talk:

"If you have a five dollar gold piece in your pocket and don't know it, what good will it do you? If you have a five dollar gold piece in your pocket and know it but don't use it, what good will it do you? You must know your power and use it. Think what it means to have a power back of you in every word you speak, that makes you a success."

"Our inheritance is holding fast to the power of God, good. It is a practical living truth, and it is all there is in life. The law is that you cannot separate yourself from God."

"The name New Thought is a misnomer. It is no more new than the sun, but is now clothed in a practical way so we can use it. It always was only now we are applying it."

The second public lesson will be given Friday evening at the Columbian club house. Sunday afternoon at 4:30 at the same place, Mrs. Howard will give a lesson on "Prosperity."

# DORMAN'S FRUIT EXHIBIT AT FAIR

### Method of Awarding Premiums on Exhibits by the Judges Explained.

(Staff Correspondence)  
Caldwell, Nov. 13.—There are many people who were visitors at the Canyon county fair at Caldwell and the Inter-Mountain fair at Boise, who do not understand the method of how the judges of horticultural products arrive at their decisions in the making of awards, especially the larger exhibitions. C. C. Vincent of the Idaho state university and Oris McCullough, formerly of North Yakima, were the horticultural judges at the Inter-Mountain fair, and they followed the fair association's score card to the letter.

H. W. Dorman's splendid individual exhibit of fruit at the Inter-Mountain fair, especially apples, which won many premiums, including the first individual sweepstakes prize, will be used as an illustration of how the judges score on fruit. It will be observed in the first item of scoring—that the number of varieties—that the association's score card gives a possible 20 points, but Mr. Dorman's exhibit was given 11 points. This is due to the fact that Mr. Dorman had displayed only 33 varieties, and did not exhibit any prunes, peaches, plums or grapes, which score from 2 to 15 points each. Aside from this, Mr. Dorman's exhibit, as will be seen by the following tables, was practically perfect throughout, he having lost only two points on the products he had displayed.

Points in Judging Fruit.  
The first column of figures represents the association score card, and the second column shows the points the judges awarded to Dorman's fruit:

No. of varieties.....	20	11
Texture and flavor.....	15	15
Size commercially.....	15	15

Value of variety.....	15	14
Uniformity.....	10	10
Tendency to type.....	10	10
Color.....	25	25
Condition, free from blemish.....	10	10
Pack.....	10	10
(a) Bulge.....	4	4
(b) Alignment.....	4	4
(c) Height at end.....	4	4
(d) Firmness.....	4	4
(e) Attractiveness.....	4	4
Varieties—Apples.....	20	19
Prunes (none).....	15	15
Pears (two plates).....	5	5
Plums (none).....	5	5
Grapes (none).....	2	2
Artistic arrangement.....	10	10
Total.....	200	180

# WOMAN WILL BE

(Continued from First Page.)

bride. It was just after supper on the evening of August 17, 1906, that Mr. Hackett asked his daughter of got some food for a young tramp who had asked for supper and a night's lodging. Mattie was wiping the dishes.

The father and the tramp started out to the barn to feed the cattle, leaving the daughter to get the tramp's meal. The other members of the Hackett family were spending the evening at a neighboring farmhouse down the road.

Outcry Was Heard.  
The supposition is that soon after the father and the tramp left for the barn the young woman was called from her home by some person and accompanied that person to a point about 100 yards from the door. On the return from the barn Mr. Hackett and the tramp heard an outcry and hastening to the spot found the young woman strangling. They carried her to the house and summoned aid.

It was several moments before a cord was discovered drawn tightly about Miss Hackett's neck and it was found she was dead. Farmers beat the bushes and cornfields about the Hackett home for several days in an effort to find the persons who were supposed to have committed the crime. The young tramp never accused of having any share in planning or carrying out the murder, although he was held in the local jail for several days as a witness.

Mrs. Raymond Suspected.  
Suspicion soon fell upon Mrs. Raymond, an acquaintance of the murdered girl, who was believed to have been jealous of her. Mrs. Raymond and her husband gave an account of their movements on the evening of the crime which established an alibi that the state could not find evidence to destroy. The grand jury at that time failed to return an indictment.

At various times the attorneys for the state attempted to review the evidence and gather new evidence sufficient to warrant the indictment of somebody, but nothing definite was done until the grand jury met last April and returned an indictment against Mrs. Raymond, charging her with the murder. The arrest of Mrs. Raymond after seven years of veiled insinuation and suspicion made a sensation throughout this section of Maine. Since her arrest the woman has been confined in jail here.

Mrs. Raymond and her family appear to welcome the prospect of a trial and express themselves as certain of acquittal. Bert Raymond, husband of the accused woman, will be a leading witness for the defense. It is supposed that the state will endeavor to prove that Raymond's friendship for the murdered girl aroused Mrs. Raymond's jealousy and served as a motive for the alleged murder.

# LAUNCHING DEVISE FOR AEROPLANES ON BATTLESHIPS TRIED

Washington, Nov. 13.—What naval aviation experts say will make yesterday a red letter day in the history of aviation was the successful test here yesterday of a catapult device for launching aeroplanes from battleships.

The scheme, the invention of Captain Washington L. Chambers, in charge of the new aviation work, involves shooting the aeroplane along a steel plank by means of compressed air. On the plank, which is level and 30 feet long, the aeroplane sits on top of a car, which drops from under when the end of the plank is reached.

Lieutenant T. G. Ellison, navy aviator, had attained a speed of 10 miles an hour when his hydro-aeroplane had gone the 30 feet along the plank. He started his engine just a fraction of a second before the compressed air was turned on. The machine had started to rise before it left the plank. It was in a dead calm when the test was made.

Almost two years ago, Eugene Ely, from a sloping deck on the cruiser Birmingham, made the first launching of an aeroplane from a war vessel. Compared with today's test the method of two years ago was crude.

It is proposed to construct launching devices similar to that successfully tried today on top of the turrets of the battleships and one probably at each end of the vessels, so that an aeroplane can be started off in any direction. Today's test was witnessed by a number of army and navy aviators.

In the Same Box.  
(From Judge)

Stern parent—"Look here, Mr. Bibby! You have been calling on my daughter regularly for six months. I think it is about time that I inquired as to your intentions."

Young Bibby—"That's exactly what I think! Either Mabel isn't able to muster up the courage to ask me or she has forgotten that it is nearly the end of leap year."

# SPRITS FOR RHEUMATISM.

The use of spirits in the treatment of rheumatism has proved an innovation among the medical profession. When mixed with certain other ingredients and taken properly it is said to be an almost infallible cure for rheumatism and backache. Here is the formula: "From your druggist get one ounce of Toris compound (in original sealed package) and one ounce of syrup of Sarsaparilla compound. Take these two ingredients home and put them into a half pint of good whiskey. Shake the bottle and take a tablespoonful before each meal and at bed-time." Results come immediately. "If your druggist does not have Toris compound in stock he will get it in a few hours from his wholesale house. Don't be influenced to take some patent medicine instead of this. Insist on having the genuine Toris compound in the original one ounce sealed yellow package."

SORE FEET, Corns, Callouses, Bunions, Frost Bites, Aching and Sweaty Feet. A spoonful of Calcide in the foot-bath gives instant relief. Get a 25c box at any drug store.—Adv.

# CABINET GOSSIP

(Continued from First Page.)

immediately west of the Mississippi, including Missouri, Iowa, Kansas and Nebraska.

With this distribution there would be left two cabinet offices that might be filled for reasons of peculiar fitness or expediency.

Senator O'Gorman's name figures in the talk of cabinet possibilities and speculation would assign him to the department of justice. The availability of William J. Bryan is also much discussed for the department of state and one Democratic senator has coupled Mr. Bryan's name with the ambassadorship at London.

While the prevailing opinion among Democrats now in Washington is that Mr. Bryan may be offered a cabinet position, opinion is divided as to his acceptance. Mr. Bryan has declined to discuss

# QUICK ACTION PRESCRIPTION FOR COLDS IN A DAY

The best and quickest prescription known to medical science for colds and coughs is as follows: "From your druggist get two ounces of glycerine and half an ounce of Globe Pine Compound (Concentrated Pine). Take these two ingredients home and put them into a half pint of good whiskey. Shake it well. Take one or two teaspoonfuls after each meal and at bed-time. Smaller doses to children according to age." Be sure to get only the genuine Globe Pine Compound (Concentrated Pine). Each half ounce bottle comes in a tin screw-top sealed case. Any druggist will get it on hand or will quickly get it from his wholesale house. There are many cheaper preparations of large quantity but it don't pay to experiment. This treatment is certain cure. This has been published here for six winters and thousands say it has no equal.

SORE FEET, Corns, Callouses, Bunions, Frost Bites, Aching and Sweaty Feet. A spoonful of Calcide in the foot-bath gives instant relief. Get a 25c box at any drug store.—Adv.
