

REPEAL OF THE HERD DISTRICT LAW FAVORED

Long List of Resolutions Adopted at the Meeting of the Idaho Cattle and Horse Growers' Association.

INDORSEMENT GIVEN THE LEWISTON SHOW

Legislative Aid Asked That it May Be Made a Permanent Institution—No Objection to Reasonable Advance in Grazing Rates.

Seven resolutions were passed at the morning session of the Idaho Cattle and Horse Growers' convention today.

Another resolution indorses the Lewiston Livestock show and asks that the legislature grant adequate state aid for the exhibition that it may become a permanent institution in Idaho.

The resolution dealing with the bull law asks the repeal of the present law and in lieu thereof, the enactment of a law requiring every user of the range to place a registered bull of beef breed on the range for every 25 cows or a fraction thereof.

The fourth resolution is to the effect that the executive board of the association get in touch with brand inspectors at the leading markets and give the members of the association the benefit of their services.

RATES ON GRAZING. The fifth resolution introduced and finally passed caused considerable discussion. It dealt with the advanced rates in grazing and changes in the rules governing the grazing of livestock within reserves.

The objections voiced were against the protective limit of grazing permits issued to cattle and sheep, which are characterized as unjust, and the resolutions ask that the same be adjusted on a proper basis of five sheep to one head of cattle.

INSPECTION OF BRANDS. The association recommended that the legislature amend the present law with reference to the inspection of brands before shipment, by providing for the appointment by the board of commissioners of each county of an inspector, who shall be an experienced stockman and who shall be empowered to appoint or designate deputies with like experience.

It was recommended that the compensation of such inspector be such as to require each shipper to pay \$2 for the first car inspector and \$1 for each additional car of the same shipment and that the maximum charge shall not exceed \$10.

UNIFORM BOUNTY LAW ASKED. Resolution No. 7 recommended a uniform bounty law for the western states that will embrace the following recommendations: Coyotes and pups, cats and wolf pups, \$2.50 per head; wolves, \$15 per head; mountain lions and cougars, \$25 per head; bears, in states that favor such bounties, \$25 per head. The resolution asks that claims for bounties on coyotes, wolves, cats and pups be required to present the entire hide, including the bone in both front legs from the knee-joint down, which will be severed and pre-

HEALTHFUL WAY TO RESTORE GRAY HAIR

Bring Back Natural Color Without Dyes—Satisfaction Guaranteed or Money Refunded.

You can have glossy, rich and luxuriant hair of a soft, even shade instead of gray or lifeless, faded hair or hair streaked with gray. It's very easy and simple, very healthful, safe and in perfect good taste—which dyes are not. Simply apply Q-Ban Hair Color Restorer as you would a shampoo. It is ready to use, harmless liquid, sold under the makers' full guarantee of "your money back if not satisfied." Use of Q-Ban will bring back a natural, soft, even, pleasing color, full of beauty, and lustrous and fluffy as a girl's hair. No one can tell you have applied Q-Ban because it doesn't work a look unnatural as a dye does. You will be delighted with your air of youth and vitality, and your hair will have real health. Only 50c a bottle at Chas. L. Joy & Co., or any good drug store, or write Hessig-Ellis Drug Co., Memphis, Tenn., mentioning the drug-gist's name. Illustrated, interesting book, "Hair Culture," sent free. Try Q-Ban Hair Tonic, Q-Ban Liquid Shampoo, Q-Ban Toilet Soap—also Q-Ban Depilatory (odorless) for removing superfluous hair.—Adv.

WOOL MAY GO UP CLOSE TO 50-CENT MARK

Former Governor Frank R. Gooding of Gooding is in the city for a short visit. Mr. Gooding says the outlook for the livestock industry was splendid. With regard to wool, he said, in Montana the growers were getting 40 cents for the 1917 crop, and in this state they were holding, as he understood, for 40 to 45 cents a pound.

ATTENDANCE LARGE

More than 300 cattle and horse growers of Idaho are now in attendance at the annual convention of the Idaho Cattle and Horse Growers' association. The convention has been a split one. Business has been transacted with dispatch. At the session yesterday afternoon addresses were made by L. F. Kneipp, chief forester, and Homer E. Fenn, chief of grazing.

The men outlined the policy of the forest service and explained the proposed advanced grazing fee. Many questions were asked them which they answered in a most satisfactory manner. The association members were much pleased with the frankness of the men in giving them information and were pleased with the addresses.

WILD REPORTS OF A RIOT AT BARRACKS HAVE NO FOUNDATION

The top sergeant of Company G administered a little corporal punishment to a private at the Boise barracks today and immediately there were wild reports in circulation that a riot had taken place. The riot consisted of the imprisonment of the disturbers in the guardhouse. The private was knocked down, it was said, for refusal to obey orders and his general conduct towards a superior.

It is now a question when the regiment will be mustered out. It has been planned to muster out the officers and men in two divisions, the southern companies next Tuesday and the northern next Thursday, owing to the shortage of rolling stock. However, with a case of measles breaking out almost every day, some pneumonia and other sickness, the officers are in some doubt about the advisability of releasing the men on the dates announced. Major Martin has wired the war department stating the situation and asking for instructions. He had not received an answer up to a late hour today.

PIONEER ENGINEER DEAD AS RESULT OF FALL FROM HIS CAB

Word was received here today of the death at Glens Ferry this morning of J. W. Hays, one of the pioneer engineers of the Oregon Short Line and well known throughout the system among railroad men. Mr. Hays fell from his engine a few days ago and suffered the injury which caused his death.

Mr. Hays owned a fine fruit ranch at New Plymouth and was well known in that section. He is survived by three children, also a brother-in-law, Charles W. Smith, who is connected with the freight department of the Oregon Short Line.

WOULD MAKE RIVER THE BOUNDARY LINE

Senator Pinecock of Madison county will introduce in the senate a bill seeking to annex to Madison county a strip of Fremont county territory, seven by five miles, containing the towns of Teton and Newdale. It is desired to make the Teton river the boundary line between the counties. The territory desired by Madison county is across the river from that county along the south boundary of old Fremont county. The bill will carry an enabling act.

SENATE RATIFIES THE AGREEMENT ON EXCHANGE OF LAND

Washington, Jan. 18.—A resolution ratifying the agreement between the government and the states of South Dakota, Idaho and Montana for the selection of public lands for those withdrawn for forest reserves on approval by the secretary of the interior was adopted by the senate today.

DEATHS

TOLMIE—John Tolmie, aged 92 years, died this afternoon at 1:15 o'clock at the home of his daughter, Mrs. W. H. Hutchins, of 1003 North Eighth street. Senility was the cause of his death, which came after an illness of six weeks. Mr. Tolmie is survived by three children, William and Mrs. Hutchings of Boise and John W. Tolmie of California. Mr. Tolmie died in Boise some four years ago. The body is at the Fry & Summers chapel, and no funeral arrangements have yet been made.

Carl Brown, a lumber dealer of McCall, is in the city on business for a few days.

The Chicago board of education has under consideration a proposal to establish a course in the high schools in military work for girls, teaching them to act as Red Cross nurses and first aid workers.

The Little News of Boise

M. W. OF A. INSTALLATION. Boise camp No. 6717 will install officers tonight. Refreshments will be served by the managers. This year this affair will be for members only. There will also be work on several candidates, and the selection of a camp physician for this year. The meeting will be opened promptly at 8 o'clock in the Grunbaum hall, 113 North Eighth street. Visiting neighbors are cordially invited.

BABY BOY ARRIVES. Mr. and Mrs. Fred J. Collins of Murphy are the parents of a baby boy, born yesterday at the maternity home on Harrison boulevard.

CHRISTIAN SCIENCE LECTURE. A free lecture on Christian Science is to be given at the Pinney theater Sunday afternoon at 3 o'clock by Dr. Walton Hubbard, C. S. B., a member of the board of trustees of the Mother church of Boston. Dr. Hubbard is a former physician of Spokane and is making a lecture tour of Idaho. After his lecture here he will speak at Emmett Sunday night, at Weiser on Monday night, Buhl Tuesday night and at Lewiston on Thursday night.

TRYING TO LOCATE BROTHER. In a pathetic letter in which she writes that her aged and invalid mother is grieving her life away because of a lost son, Mrs. Leslie Trosper, of 730 Mass street, Lawrence, Kan., has written Judge Dunlap asking him to try and locate her brother, Orval L. Blackney. During the summer of 1916, the letter states, he was living at Pocatello, but they believe he was married in Boise. Later they heard he had joined the army, but have since had no word from him.

BOISE COUPLE MARRIED. Theodore Myers and Lillian Mae Gilmore were married yesterday afternoon at 4:30 o'clock at the Lutheran parsonage by Rev. C. E. Olson. About Feb. 1 they will go to housekeeping, making their home in Boise.

TO ENTERTAIN CATTLE MEN. The members of the Idaho Cattle and Horse Growers' association will enjoy a night of fun at the Commercial club tonight. An unique program has been arranged. Nick Collins will stage a wrestling bout and sparring match for the event and there will be music and other numbers on the program.

REGIMENTAL BAND CONCERT. The regimental band of the Second Idaho will give a concert Sunday afternoon at 2:30 o'clock in the capitol building. This will be the last concert by the band in Boise and an exceptionally fine program has been prepared.

IMPROVEMENTS AT STRAND. An attractive toyer has been created at the Strand theater by the installation of a partition just back of the row of boxes at the rear of the auditorium proper. These improvements were made over night, the work being started last night after the last show and completed this morning. The boxes are given individual entrances in the partition and doors are contained for aisles, the center having double doors. Another improvement made is in the seating arrangements. Patrons will enter the auditorium proper through the side aisles, move along the seat rows to the center and the middle aisle will be used for exit only. This will not only relieve congestion but will also add to the comfort of the patrons.

MARRIED IN BOISE. The manufacture of hats is one of the most interesting of manufacturing processes and few wearers of this important part of the male wardrobe would recognize in the great bales of rabbit, hare, muskrat, otter and other skins that come to the Danbury fur factories the material from which their (fur) felt hats are made. The best are imported and arrive in great bales containing from 2000 to 4000 skins. Many processes are gone through in the fur factory before the fur is ready for the hat manufacturer, who after putting it through blowers, which clean the fur from foreign substances and hair, start the actual making of a hat by weighing out just enough fur to make a given size and weight of soft or stiff headgear. The fur is fed into an enclosed machine in which is a revolving copper cone, perforated and wet, beneath which is a rapidly revolving suction fan which creates a downward air current. The result is that the light weight fur is swirled about until it appears like a miniature snow storm and gradually and evenly settles on the cone. When all the fur for one hat is thus fed into the former and is deposited on the cone, the machine is opened, the operator wraps a cloth about the cone with its evenly deposited covering of fur, removes the cone and slips off the first form of the hat. It appears to be a conical, wet and delicate object; but is quickly immersed in warm water, which increases the holding quality of the fur so that the "bodies" can be safely handled through the successive process of shrinking to exact sizes, dyeing for desired colors and drying, all of which is necessary before the rough bodies begin their travels through the hands of various skilled workmen who shape and block and trip, with the aid of almost human mechanical aids, the bodies into finished hats.

Ida M. Porter of Seattle, was married last night at 8:20 o'clock by Judge Floyd C. White. The ceremony was performed at a local hotel.

SOLDIER BOY WEDS. Clarence O. Oviatt of Miles City, Mont., and Miss Mildred S. Walther of Boise were married at 8 o'clock last night by Rev. Willis Martin at the parsonage of the First Methodist church. Mr. Oviatt is a member of the machine gun company of the Second Idaho. They will make their home in Boise.

FOUND NOT GUILTY. The jury which listened to the testimony in the gambling case in which Lawrence Miles was defendant, returned a verdict of not guilty at 4:30 o'clock last evening. The case was tried in the justice court of Judge White.

FOR INSURANCE MEN. A public hearing will be given in the senate chamber at 8 o'clock Friday evening on senate bill No. 4, in which the insurance men are interested.

DAMAGE CASE STILL ON. The \$200 damage case in which Emmett Huff is plaintiff and the Boise Traction company defendant, was still on in district court today. The plaintiff closed this afternoon and the defense made its opening statement and has begun submitting testimony.

DRAINAGE DISTRICT CTSE. The hearing of the application for the creation of Drainage district No. 1, of Canyon county, which has been on for several days before Judge C. P. McCarthy, will probably be completed this evening.

SUIT FOR DIVORCE. Gertrude Irene Myers versus Frank C. Myers was the title of a case filed this afternoon in district court. The papers were withdrawn. The action is assumed to be for a divorce.

WANT COMMISSION TO HAVE CHARGE OF STREAMS IN STATE. Resolutions asking for the passage of a bill providing for the appointment of a commission of three to have absolute charge of all water in the streams of Idaho, was introduced and was discussed this afternoon at the joint meeting of the Idaho Society of Engineers and the Operating Engineers' association. The resolution contains a number of provisions and does not interfere in any way with adjudicated rights.

A similar resolution was passed at the annual meeting of the Idaho State Bankers' association and it is being liberally discussed by the engineers. J. P. Congdon addressed the meeting this morning upon the topic, "Possibilities of Irrigation Development by Co-operation Between the United States and the State." C. Clyde Baldwin spoke on the topic, "Benefits and Needs of Stream Measurements." A discussion of his paper was had this afternoon.

The engineers will banquet tonight at 8:30 o'clock at Brand's grill, which is the only social event of the meeting. The meeting will continue its session until Saturday afternoon and many important problems of engineering will be discussed.

MAKING HATS. The manufacture of hats is one of the most interesting of manufacturing processes and few wearers of this important part of the male wardrobe would recognize in the great bales of rabbit, hare, muskrat, otter and other skins that come to the Danbury fur factories the material from which their (fur) felt hats are made. The best are imported and arrive in great bales containing from 2000 to 4000 skins. Many processes are gone through in the fur factory before the fur is ready for the hat manufacturer, who after putting it through blowers, which clean the fur from foreign substances and hair, start the actual making of a hat by weighing out just enough fur to make a given size and weight of soft or stiff headgear. The fur is fed into an enclosed machine in which is a revolving copper cone, perforated and wet, beneath which is a rapidly revolving suction fan which creates a downward air current. The result is that the light weight fur is swirled about until it appears like a miniature snow storm and gradually and evenly settles on the cone. When all the fur for one hat is thus fed into the former and is deposited on the cone, the machine is opened, the operator wraps a cloth about the cone with its evenly deposited covering of fur, removes the cone and slips off the first form of the hat. It appears to be a conical, wet and delicate object; but is quickly immersed in warm water, which increases the holding quality of the fur so that the "bodies" can be safely handled through the successive process of shrinking to exact sizes, dyeing for desired colors and drying, all of which is necessary before the rough bodies begin their travels through the hands of various skilled workmen who shape and block and trip, with the aid of almost human mechanical aids, the bodies into finished hats.

N. Y. BANKER WHOSE RECENT MARRIAGE STIRRED COMMENT SNAPPED IN CAPITAL

Mr. and Mrs. Charles H. Sabin in Washington. The Lawson leak probe was responsible for the postponement of the bridal tour of Charles H. Sabin, president of the Guaranty Trust Company of New York, whose recent marriage to "Polly" Morton stirred much comment. Mr. Sabin was compelled to cancel passage on an ocean liner because the house rules committee refused to allow his testimony to be given before Thomas W. Lawson had finished.

processes and few wearers of this important part of the male wardrobe would recognize in the great bales of rabbit, hare, muskrat, otter and other skins that come to the Danbury fur factories the material from which their (fur) felt hats are made. The best are imported and arrive in great bales containing from 2000 to 4000 skins. Many processes are gone through in the fur factory before the fur is ready for the hat manufacturer, who after putting it through blowers, which clean the fur from foreign substances and hair, start the actual making of a hat by weighing out just enough fur to make a given size and weight of soft or stiff headgear. The fur is fed into an enclosed machine in which is a revolving copper cone, perforated and wet, beneath which is a rapidly revolving suction fan which creates a downward air current. The result is that the light weight fur is swirled about until it appears like a miniature snow storm and gradually and evenly settles on the cone. When all the fur for one hat is thus fed into the former and is deposited on the cone, the machine is opened, the operator wraps a cloth about the cone with its evenly deposited covering of fur, removes the cone and slips off the first form of the hat. It appears to be a conical, wet and delicate object; but is quickly immersed in warm water, which increases the holding quality of the fur so that the "bodies" can be safely handled through the successive process of shrinking to exact sizes, dyeing for desired colors and drying, all of which is necessary before the rough bodies begin their travels through the hands of various skilled workmen who shape and block and trip, with the aid of almost human mechanical aids, the bodies into finished hats.

Wouldn't You Like to Get Rid of That Catarrh?

Well, here is your opportunity. I am going to give away during the next ten days two thousand packages of Gauss' Combined Treatment to those who need it, and if you want relief, send the coupon at the foot of this notice, and the free package will be forwarded to you at once by parcel post. I want to prove to you that Gauss' Combined Treatment will relieve your catarrh. The method is effective, because it strikes at the root of the trouble and gives permanent relief by removing the cause. This is the only correct way to treat catarrh and if you want quick and lasting results, send at once for the free package. Fill out the coupon below and package will be sent to you by return mail.

IS FIRST MINISTER FROM SERBIA TO U. S.

Ljomi Mihailovitch, who has just arrived in Washington, is Serbia's first envoy extraordinary and minister plenipotentiary to the United States. He was formerly charge at Rome and later minister of Montenegro resident in Paris. The new minister is forty-five years old and was educated in Serbian universities and in Paris.

ANNOUNCEMENTS

Central W. C. U. will hold an afternoon of prayer and praise at the rooms in the Empire building Friday afternoon at 2:30 p. m.

The Ladies' Aid of the Immanuel Methodist church will hold a cooked food sale all day Saturday at the Mode Department store.

The Washington Parent-Teachers' association will meet with Mrs. E. C. Pfeiffer, 2011 North Sixteenth street, Friday afternoon at 2:30 o'clock. Legislative measures, in which the people are interested, will be considered. Mrs. Edgar Payne, legislative representative of the association, and Miss Lulu Vance, county superintendent, will address the meeting. Musical numbers and readings will be given. All parents are requested to attend.

A silver tea will be given by the Longfellow Parent-Teachers' association at its regular meeting at the home of the secretary, Mrs. Ida Brooks, 410 Pueblo street, Friday afternoon at 2:30 o'clock. An invitation is extended to the teachers, members and all interested in P. T. A. work.

IT DIDIT, WHAT DIDIT?—Adv. tf Mr. and Mrs. O. P. Coshov of Roseburg, Ore., are in the city visiting with Dr. and Mrs. A. A. Jessup. They are on the return trip home from a month's visit in the east. Mr. Coshov is a leading attorney of western Oregon and a prominent Democrat of that state.

Heated taxis and automobiles, day and night. O. S. Cole, phone 75.—Adv.

The patron saint of all those who work in munition factories is St. Barbara. A casual allusion in her legend to thunder and lightning has made her the "patroness of explosives." By a natural extension she became the patroness of all the people who handle explosives, including munitions makers and miners. This association of St. Barbara with explosives explains the puzzling title of "La Sainte Barbe," borne of time immemorial by the powder magazine on French battleships.

NOT A PARTICLE OF DANDRUFF OR A FALLING HAIR

Save Your Hair! Double Its Beauty in Just a Few Moments.

25-Cent "Danderine" Makes Hair Thick, Glossy, Wavy and Beautiful.

Within ten minutes after an application of Danderine you can not find a single trace of dandruff or falling hair and your scalp will not itch, but what will please you most will be after a few weeks' use, when you see new hair, fine and downy at first—yes—but really new hair—growing all over the scalp. Danderine is to the hair what fresh showers of rain and sunshine are to vegetation. It goes right to the roots, invigorates and strengthens them. Its exhilarating, stimulating and life-producing properties cause the hair to grow long, strong and beautiful. A little Danderine immediately doubles the beauty of your hair. No difference how dull, faded, brittle and scraggy, just moisten a cloth with Danderine and carefully draw it through your hair, taking one small strand at a time. The effect is amazing—your hair will be light, fluffy and wavy, and have an appearance of abundance; an incomparable luster, softness and luxuriance. Get a 25-cent bottle of Knowlton's Danderine from any drug store or toilet counter, and prove that your hair is as pretty and as soft as any—that it has been neglected or injured by careless treatment—that's all—you surely can have beautiful hair and lots of it if you will just try a little Danderine.—Adv.
