

IDAHO WILL PROFIT FROM SESSIONS OF T. B. CONFERENCE

Broader Understanding of New Public Welfare Work Will Follow, and More Support to Its Financial Campaign.

IDEAL SANATORIUM SITE

Dr. O. W. McMichael Outlines Principles for Guidance in Selecting Proper Location for State Hospital.

The direct benefits to be derived from the Northwest Tuberculosis conference, which concluded its three days session in Boise Wednesday are summed up by local workers who attended as follows: First and most direct, assistance in establishing and equipping Idaho's new tuberculosis sanatorium; second, impetus and increased support for the December campaign and sale of Red Cross seals; third, better understanding by the public generally of the close relation between welfare work and public health.

ASPIRIN FOR COLDS

Name "Bayer" Is on Genuine Aspirin—Say Bayer.

Insist on "Bayer Tablets of Aspirin" in a "Bayer package," containing proper directions for Colds, Pain, Headache, Neuralgia, Lumbago, and Rheumatism. Name "Bayer" means genuine Aspirin prescribed by physicians for nineteen years. Handy in box of 12 tablets cost few cents. Aspirin is trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid.

afternoon, essential factors in the construction, equipment and management of the ideal tuberculosis sanatorium were discussed by experienced specialists, including Dr. Orville W. McMichael of Chicago, Dr. Frederick Slyfield of Seattle, Mr. T. B. Kidner of New York, and Miss Mary Campbell of Portland. Mrs. Catherine R. Athey, head of the Idaho hospital commission, was chairman of the session. Doctor McMichael, the principal speaker, laid down criteria for the selection of a sanatorium site which have been approved by the best modern authorities. Briefly these are summed up as follows: (a) Proximity to city limits, with sufficient transportation facilities, lighting, sewerage and telephone. A location far from population center and transportation is condemned. (b) Surroundings free from such features as cemeteries, objectionable industrial establishments, etc. (c) Room for buildings, recreation

grounds, and if possible a farm and dairy. The latter are not recommended for use to provide an income with patient labor, but for the benefits patients may derive from occupation.

DESIRABLE LOCATIONS. Nothing is said, the doctor pointed out, regarding a certain climate, altitude, or pine woods as essential for a sanatorium site. The change of modern opinion on this subject is significant. Common sense of course indicates certain locations as undesirable, such as low-lying, damp situations; but in general it may be said that no climate is entirely good or entirely bad. The quoted William Osler's opinion on this subject: "The requirements of a suitable climate are a pure atmosphere, an equable temperature not subject to rapid variations, and a maximum amount of sunshine. Given these three factors it makes little difference where the patient goes, so long as he lives an outdoor life."

Doctor Slyfield, who is director of the Seattle pulmonary hospital, described a schedule of graduated exercise for patients; Miss Mary Campbell, superintendent of the Portland open air sanatorium, told of the problems of the nurse in sanatorium management; and Mr. Kidner, vocational education expert of the national association, told of methods of vocational instruction for patients. Mr. Kidner was followed by Miss Florence Blevins of New York, a reconstruction aide of the national association, who discussed further the problem of keeping patients' minds and hands occupied.

RESOLUTIONS ADOPTED. Before the conference adjourned resolutions were prepared by a committee composed of J. V. Smith of Seattle, Miss Mary Campbell of Portland, and Miss Kate Williams of Salt Lake and adopted by the delegates. These resolutions expressed thanks to Governor Davis, the Idaho university, medical and nurses' associations, the Owyhee hotel, Boise commercial club, newspapers and citizens, and the national authorities who had addressed the conference. A pledge of co-operation with the Red Cross and the state boards of health was also incorporated.

BITRO-PHOSPHATE IS GOOD FOR THIN NERVOUS PEOPLE

A PHYSICIAN'S ADVICE.

Frederick S. Kelle, M. D., Editor of New York Physicians "Who's Who," says that weak, nervous people who want increased weight, strength and nerve-force, should take a 3-grain tablet of Bitro-Phosphate just before or during each meal. This particular phosphate is the discovery of a famous French scientist, and reports of remarkable results from its use have recently appeared in many medical journals.

If you do not feel well; if you tire easily; do not sleep well, or are too thin; go to the drug store and get enough Bitro-Phosphate for a two weeks' supply—it costs only fifty cents a week. Eat less, chew your food thoroughly, and if the end of a few weeks you do not feel stronger and better than you have for months; if your nerves are not steadier; if you do not sleep better and have more vim, endurance and vitality, your money will be returned, and the Bitro-Phosphate will cost you nothing, adv.

WAR INJURIES ARE TOPIC AT MEETING OF IDAHO DOCTORS

Convention of Medical Association Listens to Talks on Technical Subjects and on New Laws of Idaho.

The twenty-seventh annual meeting of the Idaho State Medical association will end late today, after a day of officers and conclusion of association business. The sessions are being held in the Commercial club rooms and attended by members from all corners of the state. Wednesday afternoon the convention was visited and addressed by none of the tuberculosis specialists from the East and the coast cities.

The new medical laws of Idaho were outlined and explained at the convention this afternoon by Paul Davis, director of the bureau of license created by the 1919 legislature. The renewal fee and the proposed fee bill received special discussion. **EFFECTS OF TREATMENT.** Effects and treatment of war injuries were the special topic of the technical addresses at the morning session today. Dr. Max T. Smith of Wallace spoke on injuries of the knee joint, and Dr. F. M. Sprague added some valuable data gleaned from his experience as a surgeon with the American expeditionary forces. Doctor Sprague said that in most cases of wounds involving the knee joint, recoveries were accomplished in as short a time as in any ordinary septic process.

Undue lesions from shell concussion were discussed by Dr. E. E. Maxey of Boise, who illustrated with charts some of the contributions to optical science resulting from the experience of surgeons in the last two years. Doctor Maxey had about a score of the peculiar cases of eye injury resulting from concussion or contusion under his observation in the base hospital at Camp Sherman. **INTERESTING PAPERS.** Notes on injuries to the skull and brain were read by Drs. J. L. Stewart and R. C. Buerki of Boise, followed by a discussion by Dr. W. T. Williamson of Portland.

Papers on the program for the concluding session this afternoon, in addition to Mr. Davis' explanation of the new medical laws, were: Treatment of Carcinoma of the Breast, by Dr. L. P. McCalla of Boise; Accidents of the eye, by Dr. N. W. Jones of Portland; Frolch's Syndrome, by Dr. M. H. Tallman of Boise; and Co-operation in Rural Practice, by Dr. G. W. States of Preston.

PHYSICIANS FORM NEW PARTNERSHIP

Drs. Tallman, Heine and Higgs Lease Half of Fourth Floor of Idaho Building for Offices and Laboratories.

Three prominent physicians of Boise, Drs. M. H. Tallman, A. L. Heine and A. A. Higgs, have formed a partnership and will soon occupy a suit of offices covering one-half the fourth floor of the Idaho building. The partnership arrangements has just been completed and the physicians have placed orders for additional equipment and propose to have the finest equipped offices found anywhere in the northwest. The firm name is to be Tallman, Heine & Higgs and the new offices will be opened by the middle of the month if the new equipment arrives by that time. All three physicians are specialists. Dr. Tallman having been chosen as a specialist of diseases of the heart in the largest army camp in the United States to make the final examination of men for overseas service. Dr. Heine is an eye, ear and nose specialist and Dr. Higgs is a bone surgeon of wide experience and also saw service in the army.

Cash Bazar

THE LOWER PRICE DEPARTMENT STORE

This is a good place to buy UNDERWEAR AND HOSIERY. We sell nothing but first quality, dependable Underwear and Hosiery and they're priced at rock bottom.

The Brunswick

ALL PHONOGRAPHS IN ONE

FOR THE SEVEN AGES OF MAN

"FIRST THE INFANT"

ILL the all-receptive child mind with harmony! Begin its musical education early and correctly. With a Brunswick in the nursery, the means of producing music at its best is always at hand.

The Brunswick Method of Reproduction

Today The Brunswick is creating a newer and higher conception of phonograph music—due to its advanced method of reproduction, by means of two scientific and exclusive features, the Ultona and the Tone Amplifier.

The Ultona

The Ultona plays all records of every make. Just a turn of the hand presents the required diaphragm, needle and weight.

The Tone Amplifier

The Tone Amplifier, an oval tone chamber constructed entirely of wood, insures against harsh metallic sounds. The Brunswick, besides being an educational uplift for the child in music and allied arts, is an instrument of grace and beauty.

We shall be pleased to demonstrate its many fine qualities to you. Come in today or at your first convenience.
