

CONSTRUCTION OF Y. M. C. A. BUILDING WILL START SHORTLY

Contract for Basement Let to J. Gustavson Who Will Begin Work on it During Present Week. WILL BE ONE OF THE BEST Committee Meets and Discusses Plans—Edifice Will Be of Brick With Stone Trimmings—Gothic Type Followed.

Actual construction on the new Y. M. C. A. for Boise, entailing an expenditure of approximately \$190,000, will start soon. Saturday afternoon the contract on the basement was awarded to J. Gustavson, who will begin work this week and by the time the basement is completed the contract on the superstructure will have been awarded to...

The building committee of the association, composed of C. C. Anderson, chairman, J. E. Bergman, J. E. Dietrich, Leo J. Falk, Dr. J. M. Taylor and Edgar A. Crooke, Saturday noon at the Boise Commercial club rooms, lined together and were in session several hours discussing the plans, the basement contract and other features in connection with the new association building.

The new Y. M. C. A. will be one of the finest association homes in the northwest and is being erected to meet the coming growth which Boise is destined to have. The building is to be of the perpendicular collegiate Gothic type, simple in design, yet reflecting the educational atmosphere of the institution. It will be brick with stone trimmings and Boise stone is to be used in the construction.

The building proper without furnishings, will cost about \$150,000. It will probably be the best designed association building in the entire northwest as much time and consideration has been given by the architects with a view of making it one of the best natural lighted buildings in the country. With the exception of but a small part of the lobby light will be furnished throughout the building from three sides.

EXCELLENT ARRANGEMENT. The social rooms and lobbies will be on the main floor, the second floor being for club rooms and educational purposes, while the two upper floors will be used exclusively for men's apartments and will accommodate about 64 men. The rear portion of the building will be three stories high. The basement and first story will be used as the swimming room. This room and the swimming tank have special features. The tank will be of regulation size, 20 by 40. It will be equipped with a filter tank which will constantly filter the water while the pool is in use. Another feature is that the tank will have natural light from three sides, which is regarded as especially valuable to make a healthy bathing place. The swimming room proper will be 72 by 24, and will have all modern conveniences. A spectators' balcony will be at one end where water sports and contests can be watched.

Special attention was given to the gymnasium and the plans call for as fine a gymnasium as can be found in any association building in the country. The gym proper will be 46 by 87 feet with windows on three sides, giving perfect lighting and ventilation.

TWO-LEGGED WHALE CAUGHT ON THE COAST

Victoria, B. C., Oct. 11.—A whale having two hind legs four feet two inches in length was landed some time ago at the Kyuquot whaling station and is one of the zoological curios of the century. Manager James H. Conroy of the Kyuquot Whaling Corporation, stated yesterday that in his twenty years of whaling experience, during which time he has been in close touch with the industry, he had never heard of a whale having legs on the exterior. The mammal in question was a female humpback.

Mr. Rueck said that whales have atrophied legs within their bodies, these being boomerang-shaped and 20 inches in length. These now useless portions of anatomy were evidently once used to propel the mammals on land after the manner of a carpenter. They have shrunk into the body with disuse. The atrophied legs usually found are not fastened on the whale, being merely imbedded in the flesh. The legs found on the whale at Kyuquot had bones in them covered with half an inch of blubber. The bones are being forwarded to Prof. Anderson of the Natural History museum, New York.

FOUR KILLED WHEN TRAIN STRIKES AUTO

Cedar Rapids, Iowa, Oct. 11.—Four persons were killed and one fatally injured at Marion, five miles northwest of here early tonight when a Chicago, Milwaukee & St. Paul passenger train hit an automobile in which they were riding and hurled it 75 feet through the air. The locomotive freeman, it was reported, jumped from his cab just before the crash and was also injured.

Cured His RUPTURE

I was badly ruptured while lifting a trunk several years ago. Doctors said my only hope of cure was an operation. I refused. I got no relief and completely cured me. Years have passed and the rupture has never returned, although I am doing hard work as a carpenter. There was no operation, no loss of time, no trouble. I have nothing to sell, but will give all information about how you may find a complete cure without operation, if you write to me. Eugene M. Pullen, Carpenter, 71-1/2 Cleveland Avenue, Massapequa, N. Y. Send me this notice and show it to any other who are ruptured—you may save a life, or at least stop the agony of rupture and the worry of an operation.—Adv.

ARCHITECT'S DRAWING OF THE HANDSOME Y. M. C. A. BUILDING THAT WILL BE ERECTED IN CAPITAL CITY

It will be of perpendicular collegiate Gothic type and will be built at the corner of Eleventh and Idaho streets.

NATIONAL EDUCATOR OFFERS TRIBUTE TO COLLEGE OF IDAHO

Dr. Louis E. Holden in Talk to University Club Praises President Boone and Urges Increase of Endowment.

A history of what colleges have done toward education and citizenship in America, coupled with a plea to citizens of Idaho to give liberal support to their Christian colleges, was given to their fortnightly meeting in the Commercial club rooms Saturday night. The speaker was Dr. Louis E. Holden of New York City, chairman of the general education board of the Presbyterian church.

Doctor Holden is visiting Idaho to assist the College of Idaho in building its endowment fund up to the \$200,000 mark. He paid high tribute to the veteran president of the Caldwell institution, and thanked the people of Boise for their appreciation of Doctor Boone's work.

COLLEGE MAN'S TYPE. "Boise is to be congratulated," said he, "in that nearly every member of the learned professions in the city has subscribed toward the College of Idaho endowment fund. There is now a fine opportunity for the rest to join."

Allen E. Eaton, chairman of the club's program committee, presided at the meeting and introduced the speaker. Doctor Holden was a member of the faculty of Beloit college, Beloit, Wis. Later he was president of the university of Wooster in Ohio, and in the 16 years of his incumbency he was instrumental in increasing that school's endowment from \$195,000 to more than \$2,500,000.

COLLEGES AS TAX SAVERS. In the course of his informal talk last night on the topic, "The Problem of the American College," Doctor Holden said in part:

"It is only good judgment on the part of citizens of Idaho to support and maintain every Christian college in the state. From a financial standpoint, aside from the great value they have as builders of character. The high type of instructors, of men who give their life work self-sacrificingly to this state, means more than can be told in the uplifting of the lives of its men and women. But in addition to that the privately endowed colleges are the greatest tax-saving educational institutions there are. If in Ohio all the students were in the state university, the man worth a million dollars would pay \$2,000 more every year in taxes for education than he does now. It would be very unwise for the Christian colleges to surrender their tasks to the state, as some urge. A large majority of the men and women in higher education are in the privately endowed colleges."

IDAHO SCHOOL'S NEEDS. Returning to the subject of the College of Idaho, Doctor Holden congratulated the college and university men of Boise that President William J. Boone is just the kind of man they would have elected to head the school if they had chosen him. "His 20 years at the college is sufficient warrant," he declared, "for every college man in the state to back him with every bit of enthusiasm he has and every cent in his purse."

SHORT COURSE OPENS AT UNIVERSITY MONDAY

(Capital News Special Service) Moscow, Oct. 11.—Despite the fact that the university of Idaho this year has had a larger proportion to increase in its undergraduate population than any other institution in the northwest, arrangements have been made to care adequately for students who enroll for the short courses in dairying, agriculture and household art which opens Monday. According to an announcement made today, University authorities have recently rented a large building for use as a men's dormitory for the particular benefit of short course students.

ALL CHURCHES WILL MEET IN THE HAGUE

Detroit, Mich., Oct. 11.—All Christian denominations, Roman Catholics, excepted, are pledged to participate in a great conference at the Hague to discuss means to unify Christian churches. It was announced in the house of deputies of the Episcopal convention today.

BOISE RANKS WELL IN WAGES PAID FOR ITS STREET WORK

Street Foreman Sharp Returns From Conference of City Officials Held in Chicago—Discusses Street Cleaning.

In the matter of a fair wage paid to its street employees Boise ranks well with other cities in the United States, neither being too high nor too low, but striking a fair medium. This was the discovery made by Jack Sharp, Boise's street foreman, who is back from Chicago where he was present at a street cleaning conference attended by officials from many cities in this country held in that city Oct. 2, 3 and 4. It was the fourth conference of its kind. Next year it is planned to perfect a national organization.

The purpose of the conference was to discuss the best methods of sweeping, flushing and cleaning city streets. "It was agreed that the best method to clean a street is to sweep and then flush it," said Mr. Sharp. "It was surprising to a party who on hearing that he was from Boise remarked: 'That's the town that has that wonderful tourist park. I heard about it from travelers while I was at Yellowstone national park this summer. Next time I go west on a trip I certainly will stop and see it.'"

One of the city officials in attendance at the conference was E. A. Zelsdorf, city engineer, Akron, a former assistant state engineer in Idaho under the late Frank King.

PRETTY BOLIVIAN MAID IS POPULAR IN U. S. CAPITAL

Senorita Elena Calderon.

Senorita Elena Calderon is the pretty daughter of the minister of Bolivia. She is perhaps the first member of the diplomatic corps in Washington to have made an airplane trip. Miss Calderon is fond of outdoor sports of every kind and she excels in many of them. She is one of the most popular of the younger set in capital society.

PHOTO AGENTS IN BAD

Reported for Annoying Woman, Solicitors Found to Be Minus License.

If the crew of agents for picture enlarging reported to have been working in Boise the last several days did not scour the town, they may as well call it a week and move on, for they neglected to obtain a city license to pursue their vocation, thus inviting the displeasure of the law. Mrs. Julia H. Cooper, of 743 Jefferson street, complained to the police Saturday that two men who represented themselves as agents for the Chicago Photography company had annoyed her and made away with a photograph of her son against her wishes. She admitted that she may have been beguiled into signing a contract of some kind, because the men talked until she was confused and bewildered, but she told them repeatedly that they could not have the picture.

Captain Henry Griffith on investigation learned that the agents had secured no license from the city clerk's office and gave instructions to patrolmen to bring in any of them found canvassing for an order. No. 1190 expressly stipulates that such agents shall procure a license before plying their trade. The men are said to have been in the city several days, but their activity had not been reported to the police before yesterday.

TOO LATE TO CLASSIFY

WANTED—Woman for day work. All women to go to home and do plain sewing. Phone 980 W.

HALF WAGON SCALES IN CITY FOUND SHY BY OFFICIAL TEST

Variation From 5 to 27 1/2 Lbs. Found by Experts—Four Condemned Permanently, 11 for Repairs.

Half of the 34 wagon scales in Boise were found inaccurate by official test last week. Eleven of the scales were condemned for major repairs to make them correct, four were permanently condemned and two were given minor adjustments. Variations of from five to 27 1/2 pounds short on the 1000 were found by the experts. The tests were made with a 6000-pound standard testing weight by Ernest J. Crouch, deputy sealer of weights and measures in the state agricultural department, and two experts of the Oregon Short Line Railroad company.

SCALE CAR LEAVES.

The scale car, which has been in use in all the towns in the Boise valley for more than a month, left last night for Rupert and the Twin Falls branch. The tests here last week were the

first ones of value ever made of the city's wagon scales, it is claimed. The 6000-pound weight permits of a closer adjustment than the 50-pound testing weight sometimes used, it is said. It is over the wagon scales that farmers sell much of their products and city dwellers buy their coal and other weight commodities. The corrections made will more than pay for the time of the experts in the savings that will result to users of the scales, the weight losses of which aggregate in the course of a year a huge sum.

WORK IS HAMPERED. The testing work is considerably hampered in the state by lack of appropriation. H. A. Lyon, director of the farm markets bureau, said yesterday afternoon. The deputy sealer is being paid out of the farm markets appropriation. Six men could be used all the time if funds were available, Mr. Lyons said.

The Boise wagon scales condemned were: Citizens Coal & Seed company, one of three owned by Boise Cold Storage company, one at fairgrounds owned by Union Seed & Fuel company, and one owned by Central Coal & Seed company.
