

WITH THE WOMEN OF TODAY

COUNTRESS COOK IN WARSAW TEA ROOM

Baroness Who Waits on Table Refuses Tips—Women of Old World Taking Active Part in Daily Work.

Tippling is tabooed in the most fashionable restaurant in Warsaw. A patron, thoughtless enough to follow the elsewhere universal custom, is graciously informed by the waitress that she has an interest in the business and, of course, does not expect a fee for service.

And the patron, confused, watches her move away only to be stopped by an influential looking gentleman, who jumps up from his chair, makes her a courtly bow and kisses her hand.

FEMININE ACTIVITIES

Since January 1, the number of women employed by the railroads of the United States has been reduced from 100,000 to 75,000.

Miss Mary O'Neil, purchasing agent for the American Machine and Foundry company, of Brooklyn, spends hundreds of thousands of dollars annually securing supplies for her firm.

Female laundry workers in Winnipeg, Canada, receive a minimum weekly wage of \$2.50.

Miss Adelaide Thorman is chief investigator for a large New York fire insurance company.

In Egypt divorce can be obtained for about 2 cents, while marriages cost from \$500 to \$1,000.

CUTICURA HEALS ECZEMA. On face in large red spots. Later formed into blisters on both cheeks. Sore, red and itched so could hardly bear it.

SHE GETS JOBS FOR DISABLED SOLDIERS

Miss Carol Pursa.

Securing suitable positions for wounded, gassed and shell-shocked veterans is the task of Miss Carol Pursa with the re-employment bureau for soldiers, sailors and marines.

Securing suitable positions for wounded, gassed and shell-shocked veterans is the task of Miss Carol Pursa with the re-employment bureau for soldiers, sailors and marines.

"Mother Pursa" is what the soldier boys called her, although she is still in her twenties.

More than 400 men have applied for positions through the "division for disabled heroes," of which Miss Pursa is in charge, since this section was opened three months ago.

Prior to her connection with the re-employment bureau, Miss Pursa was engaged in placing blind people during the war in various industries.

While we are placing more disabled men than ever before, we still need jobs for about 100 applicants, said Miss Pursa.

There is at this time so much to be accomplished in the world that men and women alike need all the tools of accomplishment possible.

BETTER THAN CALOMEL. Thousands Have Discovered Dr. Edwards' Olive Tablets Are a Harmless Substitute.

STUDENT LOAN FUND HIGHLY INDORSED

President of Idaho Federation of Women's Clubs Addresses Undergraduates at University of Idaho.

Introduced by President Lindley as "the university's best friend," Mrs. M. J. Sweeley of Twin Falls, president of the Idaho Federation of Women's Clubs, was given a genuine ovation by a University of Idaho undergraduate audience which she addressed one day this week on work which is being done in obtaining student loan funds.

After outlining briefly the history and phenomenal of the Federated Women's club movement in Idaho, Mrs. Sweeley told in some detail the story of persistent endeavor which finally has resulted in the granting of university memorial scholarships by virtually every high school in the state and which also has produced a substantial general loan fund.

"We will endeavor to care for the boy and girl whose college paths cannot be smoothed by devoted parents," she said. "We are striving to make it unnecessary for students to work their way through college, much though we honor the boy or girl who proves able to do so."

Referring to a students' rate bill defeated at the recent session of the legislature which contemplated a 35 fare to educational institutions from all parts of the state, Mrs. Sweeley declared that such a proposal is not only feasible, but that it would be of vast benefit to students in southern Idaho.

Several receptions were held in Mrs. Sweeley's honor in the course of her stay in Moscow.

Formulation of a definite program on which college Y. M. C. A. s will proceed in the course of the coming year was perhaps the outstanding achievement of the Inland Empire Bible study conference to which the University of Idaho recently played host, according to James Macpherson, university secretary.

"Our organizations in the colleges of the Inland Empire expect to make substantial progress in the coming few months," said Mr. Macpherson. "Association friendship councils will be organized in each institution and an attempt will be made to reach every phase of campus life."

WOMEN NEEDED TO HELP QUIET UNITED STATES. Miss Gertrude Barnum, one of the three women representatives of the public at the industrial conference in Washington, thinks that prompt ratification of the Woman Suffrage amendment so that women can vote in the 1920 election will help to solve the problem of unrest in this country.

"The problem of industrial democracy," she said, "can never be satisfactorily worked out so long as our political democracy is incomplete. It is most important all women be given at once the direct power of the ballot through which they are made responsible and are forced, if they use it intelligently, to keep themselves informed on public affairs. Lack of information and absence of responsibility are great dangers both in the political and industrial field. Women's influence when a responsible influence will inevitably be a conservative force in politics and industry."

CHICHESTER'S PILLS. Head or chest— are best treated "externally" with VICKS' VAPORUB.

Unsightly Hair DeMiracle

DeMiracle, the original sanitary liquid, is truly a revelation in modern hairdressing. It is fast and efficient for removing coarse, brittle growths as it is for ordinary ones.

My HEART and My HUSBAND. Adele Garrison's New Phase of Revelations of a Wife.

The Way Mrs. Durkee "Made up" to Leila Fairfax.

"Hi! I know I'm a perfect fool, but I can't help it—I can't!" Little Mrs. Durkee's voice rose in a wall strongly tinged with hysteria.

"You are all of that," my mother-in-law's voice was as grimly disapproving of giving offence as is generally characteristic of her.

"Oh!" Mrs. Durkee's childish voice held vast astonishment and more than a little resentful chagrin.

"Of course, I might have known that you would be against me too," she said petulantly, and I knew just how her expressive lips were pouting.

"And I must confess that I didn't expect it of you either," she went on, "after what you said on the way out here, about knowing all about it."

"You ought to know, having once had a mother-in-law yourself," went on my mother-in-law with relentless logic.

"You can just bet I do," replied little Mrs. Durkee. "I had the most cantankerous old dame you ever set your eyes on, but I managed it so that she never succeeded in interfering between my husband and me, although she tried it often enough, goodness knows. But I had my own way in everything."

"Oh!" Mrs. Durkee capitulated swiftly, entirely, at the dismal picture my mother-in-law had deftly painted.

"You'll find Alf and Leila in the library," Lillian said a second later.

"Better tip them off and get them back into the dining room, so everything will be as it was when Mrs. Durkee sewed the coop."

"My dear," she said with the charming "dear" which always endears little Mrs. Durkee's friends to her.

"Ask your grocer for Steppan's Harvest Bread. It is of the highest quality and always uniform.—Adv."

THE DEEP SEA DIVER AND HOW HE OPERATES

Deep-sea diving is only a side issue in the great navy schools. This does not infer that diving is not given an exhaustive study by the student sailors.

Deep-sea diving is a post graduate course, which begins with ten-foot dives and ends when the student has proven his ability to think and act quickly at the depth of 90 feet.

Food souring, gas, acidity? Wonder what upset your stomach? Well, don't bother. The moment you eat a tablet or two of Pape's Diapepsin all the lumps of indigestion pain, the sourness, heartburn and belching of gases, due to acidity, vanish—truly wonderful!

The Idaho Mutual Sugar Company

R. E. SHEPHERD, Pres. R. C. M'KINNEY, V.-Pres. A. M. M'OMIE, Sec.-Treas. OFFERS

SUBJECT to prior sale, through its General Fiscal Agents, a limited number of shares of the first issue of its Preferred and Common Stocks at their par values of \$10.00 and \$2.50, respectively.

Earn from Forty to One Hundred Per Cent HERBERT HOOVER, in a letter to the Senate Committee on Finance, says: "A good case in point is sugar. In considering the cost of production we find that a certain level is necessary in order to protect the high cost producer. Yet at this level a minority of the beet factories will be earning profits of from forty to one hundred per cent. Their profits are inordinate."

The high cost producer mentioned in Mr. Hoover's letter is the Louisiana Cane Producer. United States Tariff Commission, Bulletin No. 9, shows that the average cost to produce a ton of refined beet sugar in the United States was \$28.31 less than the average cost of producing a ton of Louisiana cane sugar.

From the same report we find that 40 per cent of the beet sugar was made at a cost of less than \$99.90 per ton, while 40 per cent of the Cuban cane sugar cost \$124.70. The lowest cost of Beet sugar was \$83.60 per ton. REFINED, while the average cost in Cuba was \$80.15, RAW SUGAR. Add to this \$47.00 to cover duty and refining cost and we find that a ton of refined Cuban sugar placed on the market in the United States cost \$127.15. The average cost of Beet sugar in the United States for the year 1917-1918 was \$118.78 per ton or \$8.37 less than Cuban sugar.

A Sound Investment OUR FACTORY, with a capacity of 500 tons every twenty-four hours, operating 120 days will slice approximately 60,000 tons of beets and produce about 8368 tons of refined sugar each year. On the basis of the average cost for the United States of \$118.78 per ton and the present price of sugar our factory should earn approximately \$512,288.96 or about fifty per cent on our investment.

Making Sugar Not An Experiment THE MANUFACTURE of sugar has long passed the experimental stage, is an essential industry and contributes more to the wealth of our state and nation than most any other industry. Hence, it is a safe and sound investment.

Phone 686 or call 905 Idaho Street for further information. MUTUAL INVESTMENT CO. General Fiscal Agents.
