C. STMAS.

TOMORROW the Christian world observes the most holy of all calendar days—Christmas—commemorating the anniversary of the birth of Jesus Christ.

The time when the Christmas festival was first observed is not known with certainty; but it is spoken of in the beginning of the third century by Clement of Alexandria.

Many believe that the existence of heathen festivals celebrated on or about this day had great influence on its being selected; and the Brumalia, a Roman festival held at the winter solstice, when the sun as it were born anew, has often been instanced as having a strong bearing on the question.

The general spirit of the day is one of rejoicing over the birth of the Savior of mankind, a holy joy tightening the ties of kinship, softening the harshness of everyday life, caring for those less fortunate and bringing joy to those who are sick or in distress.

Following years of war and terrible sacrifice of lives, untold suffering, the second Christmas succeeding the signing of the armistice, is of great and unusual significance. In all countries involved in the terrible conflict, there will be reunions this Christmas where a year ago it was not possible owing to the absence of loved ones.

THE GOOD FELLOW FUND.

THE art of giving and causing pleasure by the act, is one of the most satisfying features of the Yuletide season. To know that by depriving ourselves of some small pleasure we really will not miss, we help and assist others, is the proper conscience spirit of Christmas.

The Good Fellows who donated to the Christmas fund the Capital News voluntarily raised for the needy whom the Salvation Army will care for, need no thanks from this paper, but the Capital News can not help but express to them its gratitude for helping to make it a success.

The country's health is greatly improved, according to reports from Washington, thus showing that radicalism is not so bad this year as influenza was last year.

RIPLING RHYMES

By WALT MARON.

JOB.

There was an ancient man named Job who worked the patience graft so well, his fame extended round the globe, and still the books his merits tell.

A CHRISTMAS MESSAGE.

OME unusually clever Christmas messages, combining the spirit of the holidays with the thought of greater Americanism, are being sent out.

Americanism enter more and more into our Christmas joy.

"With our best wishes and good resolutions for the coming year, may we all pledge ourselves more than ever before to the support of American Institutions and American Ideals."

There is something very solemn about this kind of a Christmas message. It seems to lift us up and beyond sordid enjoyments of this celebration. It offers a way to teach little children the added joy of loving America, with the pleasures of the gaily-lighted Christmas tree.

THE MONEY OUTLOOK

EFFORTS to contract the loan account of the reserve banks have thus far been very successful, and accordingly there is no reason to expect any reduction in call rates for the immediate present.

The reports of the reserve banks show that, in spite of technical improvement here and there, there has been only a very narrow margin of lending power, which is being almost entirely required for commercial uses.

The natural influence has been drawn from this situation that the call money volume now in the market could not be very greatly enlarged and that sudden or unusual demands upon it would accordingly result in higher prices for such funds as were available, the loans then going to the highest bidder.

Funds are now moving back into the banks, but they cannot be expected to bring about a material change in the situation before the end of the year. Buyers who are obliged to borrow must therefore not count upon cheaper money.

THE BOSS DECISION SERVES TO REMIND US THAT THE WAR IS STILL GOING ON.

New Year's eve may not be so merry but New Year's day is certain to be merrier.

Perhaps Villa has written to Santa Claus, asking for an American for Christmas.

Germany Yields With Reservations. —Headline.

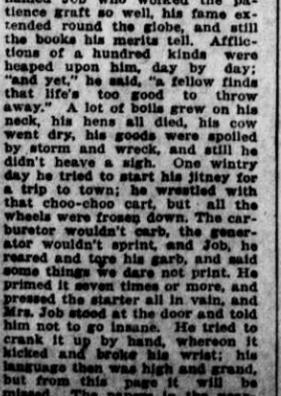

Just like the senate, except the senate does not yield.

In commenting on the clothes worn by some New York women Lieutenant Maynard, the flying parson, managed to say a good deal about a little bit.

The country's health is greatly improved, according to reports from Washington, thus showing that radicalism is not so bad this year as influenza was last year.

WHO'S WHO IN CURRENT EVENTS.

FRENCH PLAYWRIGHT BRINGS U. S. ACTOR HIS NEWEST PLAY

Al Debray.

Among the new arrivals in this country recently was Al Debray, well known play writer and actor.

PEPS

Mr. Pokins, creator of the Russian ballet, has reached this country and will invent an American dance, but will it be more exciting than the one the profiteers invented for the consumers?

No, fresh eggs are not \$1 a dozen. They are only 99 cents.

SOB STUFF. The band played "We're loyal, Dear Rockford, we're loyal to you," while a thrill ran over the audience, and somewhere in the crowd a girl sobbed.

One-half of the world wonders how the other half drinks.

The prize hard-luck artist of our neighborhood hid five quarts in a dark corner of the coal bin and the next day an unfeeling driver dumped four tons of anthracite on them.

THE IDEAL APARTMENT.

The ideal apartment is one which you are not living in. You can tell the world that.

When people in a small town get together, they talk about their operations. When people in a big city get together they talk about their apartments.

Chasing a mirage in the Sahara desert is an amateur sport compared to stalking the ideal apartment. You have got it and you tell all your friends you have got it and then—

You move in. Moving into an apartment in a mistake. If people could stay out of ideal apartments and admire them from a distance, they might retain a few of the 573 illusions they had when they rented the place.

It may continue to be the ideal apartment for 24 hours after you move in. On the second day you begin looking again for the ideal apartment.

The trouble with every ideal apartment is that there is something the matter with it.

When you give up searching for the ideal apartment you move out to the suburbs into a house that you buy, a dollar down and a dollar when caught.

As somebody once said: "What is home without another?"

Dr. Mayo says elderly men are the best assets of the nation. We can't say whether we agree with him until he tells us just where his idea of "elderly" begins. If it begins at forty, the doc. is undoubtedly correct.

"Guerr I'll quit work and go fishing," said the man.

"John," said the wife, "if you dig your own bait and honestly try to catch fish, it'll be the hardest work you've done in many a day."

A doctor came up to a patient in a lunatic asylum, slapped him on the back and said: "Well, old man, you're all right. You can run along and write your folks that you'll be back home in two weeks as good as new."

The patient went off gaily to write his letter. He had it finished and sealed, but as he was about to affix the stamp the latter slipped through his fingers to the floor, alighted on the back of a cockroach that was creeping, and stuck. The patient hadn't seen the cockroach. What he did see was his escaped postage stamp zigzagging aimlessly across the floor, and following a crooked trail up the wall and across the ceiling.

In depressed silence he tore up the letter that he had just written and dropped the pieces on the floor.

"Two weeks!" he said. "I won't be out of here in three years."

"You say you are a lifelong Democrat?"

"Yes, sir! That's what I am."

"But just what do you mean by 'Democrat'?"

"Guerr I'll quit work and go fishing," peculiar about the meaning. 'Democrat' is sort of part of my name, same as 'Bill'."

"Do you think marching in a parade helps a movement?"

"We don't always see immediate results, perhaps. However, I consider it better than running round in circles."

WHAT THE FRIENDS OF THE BASTION SAY

THE ARM OF THE LAW. (Post Boston).

When the legislature of West Virginia enacted that "war-time" compelling every able-bodied citizen between the ages of 16 and 60 years to work at least 36 hours a week, it was regarded as lacking in practicality.

How was it to be enforced in the case of a population among which the habit of loafing prevailed as happily as elsewhere in the land?

The test seems to have come in the arrest and arraignment of the president of the local branch of the United Mine Workers of America, who has led his men on a strike.

The upshot of the affair will not be known for some time to come; but as it stands it is suggestive of the long reach of the arm of the law in an unexpected direction.

REMOBILIZING WOMEN FOR THRIFT. (Tribune, Chicago).

During the war wonders were worked by organization and patriotic campaigning. Now we are suffering from a natural reaction. Then we saved. Now we have gone back, if not to waste, at least to the normal habit of the American people, which is far from careful.

Is far saving is almost as urgently needed at this time as in the war time. If we waste now we prepare certain misfortune later on.

How shall we turn the current of reaction? By using the same methods of organization and campaigning that produced such remarkable results in the war. Revive war work for peace.

A TRAGIC MYSTERY. (Eagle, Brooklyn).

Sensational developments have turned the death of little "Billy" Danzy into one of the most mysterious of tragedies.

So far there are only theories of the vaguest kind as to how the boy lost his life. The fact that Charles S. White and his business partner are under arrest is taken to mean that they are believed to be implicated in the death of the child, but it is also rumored that the boy was killed by a stone thrown at his dog while playing in the dahlia field of Mr. White.

It is almost unbelievable that such an accident could lead to so complicated a case. The theory presupposes many things contrary to human nature, and not necessarily impossible.

A HOUSE DIVIDED. (Public Ledger, Philadelphia.)

A suit for divorce brought in London by a woman whose husband had spoken to her but once in three years and a half, until the point-up passion of that long period found vent in a furious debate, gives clinical material for the study of those who are interested in problems of society and its fundamental institution of marriage.

Family life is appointed for the defeat of the selfish plan of a hermitage and a solitude. It is a recognized need for each of us to be alone once in a while. We do not want even our dearest with us constantly. But silence on the part of one member of a marital partnership toward the other for a long time is horrible and utterly abnormal.

Banker Takes Hopeful View of Conditions in France. (Wall Street Journal.)

A hopeful view of the French outlook is expressed by Moses Taylor, chairman of the board of directors of the Lackawanna Steel company, who has just returned from a trip to that country.

He is of the opinion that by spring there will have been a pronounced recovery in franc exchange due to improvement of conditions generally throughout the country.

Arrangements are being made to plant large crops and with the realization of fair harvests the condition of the devastated areas, there is little or no evidence of war and the peasant population is more prosperous than ever before.

STRANGE FACTS THAT FEW PEOPLE KNOW.

New York City, just now being criticized as a hotbed of agitators, is cited by a bulletin of the National Geographic society for its tremendous service in absorbing our immigrant citizens.

If the general concern about the alien menace leads to broader national sympathy for those places which have borne the brunt of a national burden, it will not have been in vain, says the bulletin, which quotes from a communication by William Joseph Shewalter concerning New York's immigration problem as follows:

"Any story of New York begins with its people, and in its vast aggregation of humanity there is a wealth of interest."

JAPANESE TOOK GREAT STEP IN WORLD'S WORKING HOURS. (Wall Street Journal.)

Senator Koch, chief charity inspector of the ministry of labor in Sweden, who was one of his government's delegates at the international labor conference, said that his main impression of the conference was the great interest that the Japanese delegates took in the discussions and their apparent efforts to keep in line with the European delegates.

"A great step was made when the Japanese delegates had their government to bring about the industrial working day there equivalent to 36 hours. The new work day or month of the city's population that is of na-

"ONE O'CLOCK AN' ALL'S WELL!"

The success of the conference depended largely on this action.

The oral labor question is complex and the European delegates were satisfied with the 9 1/2 hour day for Japanese workers.

Along with many other cities, New York long since learned that a vast majority of the children who attend public schools do not go to college afterward.

From that suggestion developed the idea of vocational education, which is now accomplishing wonders.

The immigrant children are being fitted for that economic independence which comes with skilled hands instead of being sent forth from school with untrained hands and poorly trained minds.

When one reflects that seven out of every nine children of school age in New York are of immigrant parentage, a situation is disclosed that might be termed startling, especially when it is remembered that the school army of Greater Gotham is so large that if it marched 10 abreast in close formation, the front rank would be boarding a North River ferryboat when the rear guard was crossing the Schuylkill out of Philadelphia.

One might write at length about striking features of the New York public schools, which stand first among all the agencies for Americanizing the immigrant children.

How these schools take 70 odd tongues and substitute good English; how they not only labor to fit boys and girls for intelligent and useful places in the country's great industrial system, but also, through employment bureaus, bring the trained pupil and the open job together; how they provide every year for the children of an added population equal to that of Memphis, Tenn.—are achievements and problems worthy consideration by Americans everywhere.

Secrets of Health and Happiness Why Cheerfulness Depends On Digestion and Exercise

By DR. LEONARD KEENE HIRSHBERG A. B., M. A., M. D. (Johns Hopkins University)

CHEERFULNESS of disposition inevitably brings a sparkle to the eyes and portrays good health and a sound mind. It brings to the surface of the cheeks a pretty pink due to the natural enlargement of the tiny vessels in which the scarlet stream flourishes.

A happy temperament coupled with a supply of plain food and outdoor air, and in addition to these a sound digestion, make a complexion such as no cosmetic could bring about, no matter what it cost.

Fresh air and sunlight, essential to human life, DR. HIRSHBERG when they come in great quantities, not only help give life, but also strength, beauty and cheerfulness. The more air you breathe, the more food you eat and digest properly, the more energy you generate. This quickens the flow of the blood stream and your thoughts and actions become more vigorous.

Abstain from too many fats and sugars. This means that fewer nuts, leaner meats and less gravy are to be eaten.

Plenty of exercise in the form of tennis, golf and hockey stimulates the flow of the life fluid and help cast out waste material from the anatomy and hastens the purification of the scarlet stream in the lung coils.
