Flo Clyde to act as registrar of said precinct.
12. White Knob Precinct—Shall consist of all that territory described as lying between White Knob creek and Lucky Gulch and between the summit of the range on the west and a line parallel with the general course of said range, which line passes through the upper reservoir on the bar above the Empire Copper company's smelter on the east. Mrs. Clyde Fishel to act as registrar for said precinct.

WE PRINT BUTTER WRAPS

"WEARS LIKE IRON" is an old phrase but true. Experience has taught well informed buyers that steel does not compare with high grade iron for heat endurance and general wear.

They also know that high grade iron alloyed with copper as a rust resistant adds tremendously to the service and life of a range. For this reason, only copper alloy iron is used in constructing COLE'S Down Draft Range. Added to this wonderful advantage, it has more special features of construction than any other moderate priced range on the market. We mention Cole's Hot Blast money-saving system of construction—a one-piece non-warping quick heating, unbreakable, gas-tight lids (not found in other ranges at this price) and ventilated fire-box (insuring greater service). Cole's Down Draft Range unites the highest quality of material, workmanship and heavy nickel plating into the ideal range for those who are thrifty and economical of fuel.

For low first cost—economy of fuel—long service and handsome appearance—it is an acknowledged leader. See the name "Cole's Down Draft"—on the high closet door—none genuine without it.

Advertisers will find this paper an excellent medium in which to display their bargains and make their wants known
