"WEARS LIKE IRON" is an old phrase but true. Experience has taught well informed buyers that steel does not compare with high grade iron for heat endurance and general wear.

They also know that high grade iron alloyed with copper as a rust resistant adds tremendously to the service and life of a range. For this reason, only copper alloy iron is used in constructing COLE'S Down Draft Range. Added to this wonderful advantage, it has more special features of construction than any other moderate priced range on the market. We mention Cole's Hot Blast money-saving system of combustion—a one-piece non-warping even-quick heating, unbreakable malleable lids (not found in other ranges at this price) and ventilated fresh air (insuring greater service). Cole's Down-Draft Range unites the highest quality of materials, workmanship and heavy nickel plating into the ideal range for those who are thrifty and economical of fuel. For low first cost—economy of fuel—long service and handsome appearance—it is an acknowledged leader. See the name "Cole's Down Draft"—on the high closed door—none genuine without it.
