

## SHARE OUR SUGAR WITH THE ALLIES

British Get Two Pounds a Month.  
French Pound and Half,  
Italians One Pound.

### GERMAN SUPPLY PLENTIFUL

All Nations Permit Use of Sweetening for Home Preserving Purposes.

America's new sugar ration of two pounds a month per person is equitable when compared with the sugar ration enforced by rigid governmental order in England, France and Italy, nations with which we are sharing sugar. Each Allied nation—in the matter of sugar consumption—is sharing on nearest possible equal terms the hardships imposed by greatly altered conditions in the world sugar situation.

Formerly classed as a luxury, sugar is now a war time essential. The fair and just division of this essential is in the hands of the various Allied food controllers.

The United States Food Administration has asked this nation to observe a voluntary sugar ration of two pounds per person a month.

In the other countries at war with Germany sugar is one of the scarce articles on every menu—whether in the households of both rich and poor, or in the hotels.

England today has a sugar ration of two pounds per month per person. In France the ration is a pound and a half and in Italy it is one pound a month. And the prices in allied countries are from two to three times as high as in America.

If you go to a hotel in England or France these days and order tea or coffee they serve absolutely no sugar with it. If you want sugar you must bring it with you.

In England it is allowable to use one-seventh of an ounce of sugar in the preparation of each luncheon. In France many persons carry little saccharine tablets about with them for use in hotels and in England rich and poor must take their sugar with them if they wish to have sweetened tea while visiting friends.

Before the war started France had 625,000 acres devoted to sugar production. By 1917 the French sugar acreage had decreased to 180,000 acres. Today the French man or woman with a sugar card has no assurance whatever that he or she will be able to actually buy sugar. To buy it, one must first find it.

### Italy Has "State Sugar."

Especially drastic regulations govern the use of sugar in Italy. Its manufacture, distribution and sale are closely controlled, and in part actually taken over by the state.

Saccharine is permitted to be sold and used as a substitute for sugar and the government manufactures a mixture of saccharine and sugar called "State Sugar," which is largely used.

### German Sugar Ration Adequate.

Germany, before the war, produced a great surplus of sugar and exported large quantities. Today the Germans have virtually gone out of the export business, but have plenty of cheap sugar for home use.

Wholesale prices prevalent in the Allied nations, according to information received by the United States Food Administration are as follows: England, 10 cents a pound; France, 15 cents; Italy, 20 cents.

While these high prices are being paid abroad the American wholesale price is being held at 7½ cents.

# MEN REGISTER!

All men, whether citizens or otherwise, who are 18 years of age and under the age of 46 years, Who have not heretofore registered

# MUST REGISTER!

ON THE

## 12TH DAY OF SEPTEMBER, 1918

Between the hours of 7 a. m. and 9 p. m. of said day

Registration for \_\_\_\_\_ Precinct  
WILL be HELD AT \_\_\_\_\_ BEFORE  
REGISTRAR

THIS IS IN ACCORDANCE WITH THE  
PROCLAMATION of the PRESIDENT of the UNITED STATES  
AND THE  
Penalty for FAILURE or REFUSAL to Register is IMPRISONMENT  
W. K. HUNTINGTON, Sheriff

## War Time Sweeteners

AMERICA has several excellent war time sweeteners that will be used largely during the shortage in the sugar supply.

They are maple sugar, syrups, honey and molasses and may be used in preparing desserts and other dishes requiring sweetening.

When a cup of syrup or honey is used to replace a cup of sugar the liquid in the recipes should be decreased one-fourth. One-third of a cupful of sugar is equivalent to one-third of a cup of honey, about one-half cup of syrup and about one-half cup of corn sugar. One-fourth of a cup of sugar is equal to about one-half cup of syrup or one-third cup of corn sugar. One tablespoon of sugar is equal to one tablespoon of honey, about one and one-half tablespoons of syrup and one and one-third tablespoons of corn sugar.

Sugar may be saved by the use of raisins, dates, figs, dried pears and fruit pastes used on the breakfast cereals.

Fruit marmalades, butters and jellies should be used to take the place of the ordinary sweetening at a meal and not as accessories to it. Fruits may be preserved without sugar. It may be added when sugar is more plentiful.

Preserving demands this year a thin syrup instead of a heavy syrup.

If sugar is used one-half of the amount may be replaced by another sweetener.

Drying is a means of preserving (without sugar) apples, cherries, strawberries and black caps.

When ready to use they may have added the needed sugar in the form of a syrup. When sugar is more plentiful fruit juices may be made into jellies or may be used as fruit juices with or without sugar, as beverages, fruit gelatins and frozen desserts.

Fresh fruits supply the place of sugar in the diet. They should be used freely. Desserts where sugar is scarce may be made of gelatins, junkets, custards, puddings and cakes.

## A BOX FROM HOME

Drawn by Gear Williams, Division of Pictorial Publicity.

Food savings of millions of Americans during our first year of war enabled this government to send enormous food shipments abroad for our fighting forces and the Allied nations. Our savings in cereals—out of a short crop—amounted to 154,800,000 bushels; all of which was shipped to Europe. We increased our meat and fat shipments 844,600,000 pounds. This was America's "box from home" to our army abroad and the civilians and military forces of the Allied nations.

## You Say You Can't Advertise?

That's what others have said and all of a sudden found some competitor was doing what they thought they couldn't do. And getting away with it.

Get the bulge on your competitors by telling your story in an attractive manner so it will be read. You'll get the results.
