George Downer, manager of local farmers union warehouse, is preparing to install a new pit of large capacity to replace the one installed when the elevator was built, the first scale having proved unsatisfactory.

John Schneider is hauling new wheat crop into town in a large wagon tank which was secured from the farmers union house company. He brings from 125 to 150 bushels at a time and stores it in the elevator, doing away entirely with sacks which, by the way, are some in this year at 9 1/4 cents each. John Marquis wheat is of extra quality and made almost 100 bushels to the acre.
