P & O Diamond Plow

The Greatest of all Riding Plows. For over twelve years the leader. Strong and Simple. Easy on the team and driver.

The Diamond Gang has every convenience required in a high-class plow. Is the only plow with an automatic controlling rod, the one that takes care of itself. The best raising and lowering levers. The strongest frame. It is backed by an unqualified guarantee. It stands head and shoulders over any other riding plow made anywhere, by anybody, at any price. We can back up all our claims by the plow itself.

NISCO MANURE SPREADERS.

LOW DOWN. WIDE SPREAD.
THE RECOGNIZED LEADER.

Thorough Pulverizing. Easily Adjusted Feed. Wide and Even Spreading. Direct Drive.

Simplicity and Durability. Low Down and Easy Loading. Steel Wheels. Braced Sides.

You should use a Nisco Manure Spreader as it will bring you big returns on the investment. Ask your neighbor who is using one.

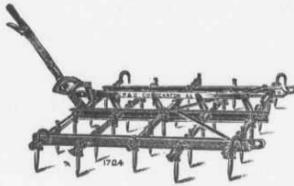

P & O POTATO DIGGER

The only one made with a pair of runners back of the mold—makes it run as steadily as a walking plow—there is no jerking, and no jarring on the team.

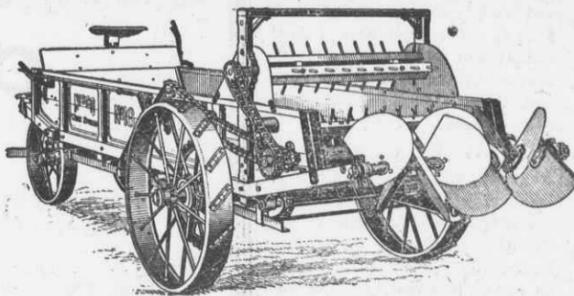

Why take such good care of your potato crop all through the growing season, and then take chances on cutting them up, or leaving some of them in the ground, with a common plow or an inferior digger? The P. & O. Digger will pay for itself in an ordinary potato patch in a single season. Has Truck, Fender, and Shaker grate. Thrust is deep and the mold goes to the bottom of the hill, digging up all of the potatoes, and they are all thoroughly sifted from the soil and exposed on the surface.

Canton "U" Bar Lever Harrow.

The improved style is reinforced and well braced. Teeth are 8 inches long and are adjustable up or down; besides they are reversible so that a uniformly sharp edge can be maintained. This Harrow will serve your purpose to the very best advantage.

Canton Disc Harrow.

Strong and durable in construction and is easily operated. The inner gangs are held firmly down so as not to raise out of ground, but they can readily adapt themselves to dead furrows or low places on the ground.
