Buy the Range That Pays for Itself!

IT'S THE **Monarch** MALLEABLE The Stay Satisfactory Range

Built air tight with rivets—not fastened together with stove bolts and plastered up with stove putty.

If ranges aren't supposed to be air tight, why are the seams and joints of the common steel range plastered up with stove putty? Ask this of the man who tries to sell you a grey iron and steel range.

Everyone who has ever used this kind of range knows how these puttied seams open up, how the range requires more and more fuel every month it is burned, and the worst

of it is, the more fuel it uses, the harder it is to get good results. What a contrast to the Monarch—built permanently air-tight by hand riveting its heavy steel plates to the Malleable Iron frames.

It does its work just as promptly, with just as little fuel after many years as when new. As stove dealers of long experience we know that the Monarch saves the fuel that is wasted by other ranges. Give us a chance to convince YOU that—
