Spring is here at last. We can tell it by the influx of knights of the grip.

Mr. and Mrs. Adolph Hinkleman were trading in the city Monday from near Winona.

M. L. Martin came up from Lewiston the first of the week to look after property interests here and visit his sons for a few days.

Mrs. G. W. Phillips returned the first of the week from Hot Lake, Ore., where she had been for several weeks for the benefit of her health.

Government Reports

indicate there is a serious shortage in the acreage and prospective yields of food producing crops for this year, especially of winter wheat.

The natural results of such a condition should be high prices again this fall for all grains and food stuff.

If these reports are correct this should be the year in which to plant every available acre to some food producing crop. By so doing you will be rendering a real service to your country and incidentally adding materially to your income for the year.
