

# WHY YOU SHOULD BUY A WINONA MOUNTAIN WAGON

## Because It Is Long Lived

Second--because it will carry the maximum load with the minimum effort of the team. Being designed right and built right, it is the strongest and best wagon for use on these roads.

It has exclusive features. A few of them are: Wheels being made of but two-piece rims, bent into shape while green, then allowed to season--rims that cannot split; iron clad hubs; two more clips on the gears than are found on any other wagon, which bind bolster, axle, steel skein and outer-bearing block into practically one solid, substantial piece.

These and a host of other exclusive features will show you that quality and service are *built right into the Winona Mountain Wagon.*

First cost? Forget it! The price is slightly higher than you will be asked to pay for *some* wagons, but in the end this superb Winona Mountain Wagon is far and away the cheapest wagon you can buy.
