Memorial Day was observed yesterday in Cresco in the usual manner, although the usual martial music by Rev. Burgess' drum corps was missing and the line of marching veterans much shorter than that of a few years ago. The M. E. church was completely filled for the afternoon exercises and the audience was amply rewarded for their attendance by a splendid address by Rev. Hartman.

The annual memorial services of the M. W. A. and R. N. of A. will be held in the Congregational church Sunday evening, June 5, at 7:30. Rev. Hinman will preach and there will be music by a male quartet. **J. I. Case Eclipse Cultivators**

Easiest to Handle. Best Working. Lightest Draft. Longest Wearing.

We admit that's a good deal to claim for one implement, but not more than is true of the Eclipse.

A boy old enough to drive can handle the Eclipse nicely, because every part is designed to make work light for the operator. For instance, the front ends of the gangs (the goose necks) are coupled to the frame in long bearings. This makes the gangs swing easily and gives the operator perfect control of them.

All levers are easily handled from the seat. The lifting springs almost entirely eliminate any effort from the operator in raising the gangs.

The hitch is from 12 to 14 inches closer to the load than on any other cultivator. That's one reason why the Eclipse is the lightest draft, and another reason is the self-lubricating, dust-proof wheels.

You can cultivate the same depth with both gangs, or you can cultivate in a furrow with one gang and on a ridge with the other, or you can cultivate only one side of the corn row—just as conditions make it necessary.

The shovels are adjustable on the shanks, and the shanks are adjustable on the gang beams, so that the shovels may be set in any desired position.

We would like nothing better than an opportunity to tell you the other good points about this Cultivator. Come in and see us as soon as you can, and in the meantime ask your neighbors what they think of the Eclipse.
