

WELCOME WORDS TO WOMEN

Women who suffer with disorders peculiar to their sex should write to Dr. Pierce and receive free the advice of a physician of over 40 years' experience...

Dr. Pierce's treatment will cure you right in the privacy of your own home. His "Favorite Prescription" has cured hundreds of thousands, some of them the worst of cases.

The I. H. C. Hay Press makes a straw in the bale worth two in the stack.

It's the simplest and the least complicated. Operates on direct pull power. Stays in order; therefore, lasts longer.

A stack of loose hay is a nuisance from the time it is put up until it is tramped down. The fence was never made that would keep a good bull out of the middle of it.

There are times when the demand for hay exceeds that of wheat; then the man with a bale cashes in; and the man with a stack doesn't.

You can't ship loose hay on the cars. You can't get the same price for the same quantity. Baled hay is stronger and sweeter, cleaner and richer.

A dealer everywhere.

LOOK FOR THIS MARK

International Harvester Company of America Chicago, U. S. A.

Dr. B. A. STOCKDALE

The Noted Specialist of Des Moines, Iowa, will visit Cresco, at STROTHER HOUSE, TUESDAY, NOV. 15 from 9 a. m. to 8 p. m.

DR. STOCKDALE wants every person who suffers from a chronic disease—it makes no difference how bad the case, or how long they have suffered, to call and consult him.

AIR CARS IN MARKET SOON

Great Activity in Manufacture of Aeroplanes is Predicted by American Manufacturer.

New York.—In ten years aeroplanes will be in general use by private citizens for business and pleasure; not, perhaps, to so great an extent as the automobile is now, but to such a degree that their appearance will excite no comment whatever.

STUDIO OPEN

From October 3rd

WILL CONTINUE TO try to give you the Very Best in my line. I have had the pleasure of calls and visit with some of the best artists.

WEDDINGS A SPECIALTY Telephone appointments to 306. Branch at Calmar is open Wednesdays. Yours truly,

C. A. BLOMQUIST

EXON ON HIS NATIVE SHORE

EARTHQUAKE COSTS TWO HUNDRED LIVES

ITALIAN PROVINCE SUFFERS HEAVILY FROM CATASTROPHE OF NATURE.

TWO PROVINCES HIT SEVERELY

Old Vesuvius Has An Outburst in Connection With Unusually Hard Rains.

Naples, Oct. 26.—Floods and an earthquake, due to volcanic action, claimed over 200 lives in Ischia and in the provinces of Salerno and Naples.

Here in Naples many houses collapsed. This was due to subsidence of the surface of the earth, due to the recent volcanic eruptions and the inhabitants of the city are in a state of panic.

The disaster was due to the combination of torrential rains and cloudbursts simultaneously with an outbreak of Mount Vesuvius.

The coasts of the island of Ischia, sixteen miles southwest of Naples, in the Mediterranean, were swept by a mountainous tidal wave. The extent of the damage from this source cannot be learned because of the destruction of the cable between Naples and the island.

A telegram received from the mayor of Casamicciola says that the city has been very badly damaged and that help is urgently needed. It is possible that the loss of life there may be heavy as there are rumors that the extinct volcano Mount Epomeo is again active.

The slopes of Mount Vesuvius were swept by cloudbursts and the thousands of tons of lava and ashes accumulated along the crests of the mountain since the last serious eruption, were swept down into the adjacent valleys, leaving death and desolation in their wake.

Floods are reported at Cetera, Amalfi, Salerno and other places. The damage is estimated in the millions, although no possible estimate is possible for several days and the later reports may materially reduce the figures.

Captains of vessels that were anchored in the Bay of Naples during Sunday night say there must have been a submarine earthquake, inasmuch as their craft heaved violently and in several instances dragged their anchor chains. It was about this time that Vesuvius belched mud and stones. This preceded the cloudbursts by less than an hour.

15,000 Garment Workers Strike. Chicago, Oct. 26.—With 15,000 garment workers on a strike the police force about all the shops affected has been materially strengthened.

AIR PILOTS LOST IN FAR NORTH

BLACK FASTNESS OF CANADA GIVE NO SIGN OF POST AND HAWLEY.

NOTORIETY SEEKERS SEE THINGS

Reports of America II Being Seen Not Generally Credited.—Opinion is Divided as to the Possibility of Rescuing the Men.

Ottawa, Ont., Oct. 26.—The black fastness of the north still holds the secret of the lost balloonists, Allan R. Hawley and Augustus Post of New York, and their sky ship, the America II, which left St. Louis eight days ago.

Various rumors have reached the bureau established here by Edmond F. Stratton, representing the Aero Club of America, but when sifted down of America, but when sifted down of America, but when sifted down of America...

ACQUIT CRIPPEN'S PARAMOUR

ETHEL CLARE LE NEVE GIVEN HER LIBERTY.

Trial Lasts But a Short Time in Court Which Convicted Crippen.

London, Oct. 26.—The jury acquitted Ethel Clare Le Neve, accused of being an accessory after the fact in the murder of Belle Elmore, wife of Dr. Hawley H. Crippen.

As at the physician's trial, the courtroom was crowded with members of the legal profession and as many others as could secure a place by right or influence. There was this difference in the audiences—If Crippen had any well wishers they kept in the background, while there was a noticeable sympathy for the girl who, for love of a man nearly twice her age, had sacrificed her reputation, deserted home and friends, and had remained true to him even when their association made her liable as an accessory to a brutal murder.

According to the report of the coroner, Mrs. Crippen, in the case made out against the doctor, Mrs. Crippen, or Belle Elmore, as she was known on the stage, was murdered on the morning of Feb. 1, and her dismembered body buried in the cellar of the Crippen home at 33 Hilldrop Crescent.

Miss Le Neve stayed in the Crippen home on the night of the day following. A third report came from Quebec but it is regarded as the least promising. Peter Brown, a constable of the provincial force, sent word that he had been a balloon over Lake Kipawa on Wednesday. Both the Germania and the Dusseldorf II passed through this territory and it is possible that it was either of them that Brown saw.

Opinion here is divided as to the possibility of rescuing the men even if they passed safely over Lake Huron and Georgian bay into the vast wilderness of northern Ontario and Quebec or the Ungava district, still further north. Professor R. W. Wood, director of the geological survey, who knows the rugged and unpopulated country like a book, is outspoken in his opinion that the aeronauts will surely perish if they sailed into the parts of it, he said, where Indians and half-breed hunters have gone and starved to death.

Other officials, including Sir Wilfrid Laurier, who is taking a keen interest in the search for the lost men, believe they will come out all right, provided they landed south of the new line of the Trans-Continental railway.

500 STUDENTS GO ON STRIKE

Edouard Cole, "U" Pupils Quit Because of Late A. S. Suspend.

Quebec, Oct. 26.—Because 100 students were suspended by the faculty of the university here for being in the strike line, the student body, numbering over 500, went on a strike and today the class rooms are deserted and student guards are posted at all the entrances to the campus to prevent faint-hearted brethren from entering.

ORE VALUATION WILL STAND

Tax Commission Upholds Individual Mineral Land Increases.

St. Paul, Oct. 26.—The individual increase of \$10,000,000 on the valuation of the mineral properties in upper Minnesota will be allowed to stand by the state tax commission. Objection to the increases were made by the representative of the mining companies at a conference held with the state commission. A few decreases were made, but further increases decided upon will make the total increase at \$10,000,000.

The mining companies had accepted the general 5 per cent increase announced several days ago but objected to the individual increase on the ground that they were unfair.

BIRD MAN FLIES IN SNOWSTORM

RALPH JOHNSTONE BEATS ALTITUDE RECORD AGAIN.

Pupil of Wright's Ascents 7,303 Feet and Encounters Icy Blast.

New York, Oct. 26.—The American altitude record that J. Armstrong Drexel brought down out of the clouds Monday afternoon in his Blériot monoplane, was snatched from his grasp by Ralph Johnstone, in a headless Wright climber. Drexel reached 7,105 feet, but Johnstone topped him by 198 feet, with a new mark of 7,303 feet.

He came down chilled to the bones, and his goggles rimmed with frost. For half an hour he had battled with a snowstorm above the clouds, seeking still higher levels.

Hubert Latham, in an Autolette monoplane, frightened the crowd when he began to do aerial flip-flops under the edge of a nasty looking storm cloud, half a mile up in the air. He fought and then shot to earth in one steep, rushing swoop. The edges of a tree brushed his descent, and punctured one of his wing surfaces, but he landed with only minor injuries to his machine and none to himself.

Hoxsey and Johnstone both went up for altitude. Johnstone had entered the ground, but just before he left the distance, Wilbur Wright instructed him to go after altitude. In the haste of the moment they both forgot that he was without a barograph, the instrument which records height, and when he came down from the upper levels he had nothing to show how high he had gone and was left unplaced. The Count de Lesseps pointed up much later than the two Wright pupils but caught them both and, soaring above them, brought down the prize for the first hour.

More interest attached to the first appearance of the Wright flier. With Orville Wright in the pilot's chair, it was given two tryouts. Garros of the French team caught its time for one lap in the morning trial at 1 minute, 26 seconds, and in the afternoon trial at 1 minute, 23 seconds.

WOMEN MAKE FLIGHTS

Quite a little bevy of venturesome women went up for short flights during the morning and afternoon. Count de Lesseps took up four during the day, and Miss Eleanor Sears of Boston, made another trip with Graham White, at a height of about 150 feet, for two rounds of the course. Allan A. Ryan, son of Thomas Fortune Ryan, and chairman of the committee on arrangements, was another enthusiastic passenger in the care of Hoxsey. He came down exuberant with delight.

SCHOLARSHIP EXAMS ON

Class of Six Competes for Rhodes Prize.

Minneapolis, Oct. 26.—The following students assembled in President Northrop's office at the university of Minnesota to take examinations for the Rhodes scholarships: Roy Cowling, Northfield, Minn., senior in Carleton college; John Kierzek, Argyle, N. D., sophomore at the University of Minnesota; Harold Scott Quigley, Cando, N. D., senior at Hamline university; Stanley Israel Rybins of St. Paul, junior at the University of Minnesota; Henry Bruchholz, Minneapolis, senior at the University of Minnesota, and Richard Ager Newhall of Minneapolis, graduate of the University of Minnesota.

Overby Held for Murder

Caladonia Minn., Oct. 26.—Christian K. Overby, aged 25 years, was arraigned before Justice A. J. Flynn for the murder of Theron O. Hemeny at Houston, on the 23rd of October, 1910. He waived examination and was held to answer for the charge of murder in the first degree to the district court at its next general term, to be held in Houston county. Intoxication was responsible for the deed.

Foundries to Make Canal Gates

Pittsburg, Oct. 26.—The manufacture of 60,000 tons of structural steel for the lock gates of the Panama canal at a cost of \$5,500,000 has been started in one of the Puttsburg mills.

Satire on Miss Elkins Fought

Elkins, W. Va., Oct. 26.—Machinery has been put into motion for preventing the production, in this country or abroad, of the Italian opera, or musical comedy, "La Belle Miss," satirizing Miss Katherine Elkins and the duke of the Abruzzi.

Coal Feeds Dock Fire

Superior, Oct. 26.—A huge anthracite coal storage shed on the M. A. Hanna coal dock caught fire and is a total loss. It contained 250,000 tons of anthracite coal. The entire fire department and several fire tugs are working to prevent the blaze from spreading to other docks and boats nearby. The loss will be \$500,000.

Aviator Plunged To Death

Magdeburg, Prussia, Oct. 26.—Heut Monte fell with a Wright aeroplane and was instantly killed. He was planning to the earth when he started his motor. The strain caused the machine to turn turtle. It crashed to the grounds, carrying the lieutenant beneath it.

Kaiser is Belgium's Guest

Brussels, Oct. 26.—Emperor William of Germany is now the guest of King Albert of Belgium. The emperor was met at the railroad station by the king and queen. He was accompanied by a large suite, and was cheered as he passed through the streets, lined with 10,000 troops.

Heredity

The Doctor (after examination)—You have an exceedingly bad case of tobacco heart.

The Patient—But I never use tobacco!

The Doctor—But your father did—I knew him well.

THOUSANDS OF PEOPLE HAVE

INTESTINAL PARASITES AND DON'T KNOW IT.

Dr. Theodore J. Cummings, an authority on all forms of intestinal parasites infecting the human body, is the author of the above statement. "Few people," states Dr. Cummings, "give this subject the serious thought that it deserves. The large sum of \$1,000,000, subscribed by John D. Rockefeller for the scientific study and eradication of the Hook Worm disease, has been the means of opening the eyes of the people to the danger to health from this source. I can safely say, without fear of successful contradiction, that 25 per cent of the people in the United States are affected with some form of intestinal parasites, of which the beef tape worm (Taenia Solium), round worms (Nematoda), and thread worms (Ascariidae) are the most common. The source of infection," says Dr. Cummings, "is the large consumption of raw, raw or insufficiently cooked meat, sewer polluted water, raw vegetables and fruit, which have not been carefully cleaned." One individual suffering from Tape Worm may infect a whole family.

T. Spencer Cobbold, M. D., the great English authority, in a treatise on intestinal parasites states that the recorded experience of Katchin was that five hundred hospital patients in the Balkan district had Tape Worm, although all of them were being treated for other disorders. Dr. Cobbold further states that whether dealing with the external or internal forms, the study of parasites of man is practically one of bounding enthusiasm and no person can derive advantage from the study of intestinal parasites of man unless the subject be approached in a right frame of mind. The trouble is there are no reliable people so difficult to instruct as those who are ignorant of their own ignorance.

As regards the injurious effects of Tape Worm upon man, I have remarked that this parasite may cause disease and death. When one or more sexually mature Tape Worms have developed in the human intestines, they are apt to give rise to a variety of unpleasant symptoms, more or less marked, according to the habits or irritability of the patient.

The principal features are vertigo, noises in the ear, impairment of sight, itching of the nose and rectum, salivation, dyspepsia and loss of appetite, colic, pains in different parts of abdomen, pains in interstices in the limbs, fainting, the sensation of weight in the abdomen, and in ordinary cases there is always more or less anxiety and nervousness, but in severe cases the sympathetic symptoms are very strongly marked, showing themselves in hysterical fits, chorea, epilepsy, and sometimes alarming convulsions.

Possibly you, the reader, are one of the many unfortunate people who have doctor for 3 or 4 years without benefit. Possibly you have been treated by half dozen different physicians and each has pronounced your disorder something different from the rest. If you are groping in the darkness of despair, uncertain as to your real trouble, it is possible that one of these ministers is sipping your vitality. Remember to the physician that you are a human being, a physical examination, determine if you have intestinal parasites.

Herbal-Ten-Na, the most Intestinal antiseptic, offers you the only sure, positive and harmless method of determining if you have intestinal parasites. It is the only preparation of its kind offered to the public. Herbal-Ten-Na not only ascertains if you have intestinal parasites but also a compound, its effect on the blood, liver, kidneys and bowels is most pronounced; as a laxative, it has no effect on the bowels. It is a medicine of great merit, absolutely harmless, guaranteed to give satisfaction or money refunded. Get your supply of Herbal-Ten-Na Medicine Co., under the Pure Food and Drugs Act, Serial No. 886, and to be procured only from the original source. Sent postpaid to any part of the world on receipt of price in U.S. currency, or postoffice or express money order or bank draft. Address: Herbal-Ten-Na Medicine Co., Vandalia, Illinois.
